

# Contents

<b>1</b>	<b>Derivation and Proofs in the Propositional Logic</b>	<b>1</b>
1.1	Motivation	1
1.2	Syntax of the Propositional Logic	1
1.3	Structural Induction	4
1.4	Natural Deductions and Proofs in the Propositional Logic	10
1.5	Semantics of the Propositional Logic	25
1.6	Soundness and Completeness of the Propositional Logic	28
1.6.1	Soundness of the Propositional Logic	29
1.6.2	Completeness of the Propositional Logic	33
<b>2</b>	<b>Derivations and Proofs in the Predicate Logic</b>	<b>43</b>
2.1	Motivation	43
2.2	Syntax of the Predicate Logic	43
2.3	Natural Deduction in the Predicate Logic	47
2.4	Semantics of the Predicate Logic	54
2.5	Soundness and Completeness of the Predicate Logic	57
2.5.1	Soundness of the Predicate Logic	57
2.5.2	Completeness of the Predicate Logic	59
2.5.3	Compactness Theorem and Löwenheim-Skolem Theorem	66
2.6	Undecidability of the Predicate Logic	68
<b>3</b>	<b>Deductions in the Style of Gentzen's Sequent Calculus</b>	<b>73</b>
3.1	Motivation	73
3.2	A Gentzen's Sequent Calculus for the Predicate Logic	74
3.3	The Intuitionistic Gentzen's Sequent Calculus	80
3.4	Natural Deduction Versus Deduction <i>à la</i> Gentzen	82
3.4.1	Equivalence Between ND and Gentzen's SC—The Intuitionistic Case	83
3.4.2	Equivalence of ND and Gentzen's SC—The Classical Case	89

<b>4</b>	<b>Derivations and Formalizations</b> . . . . .	95
4.1	Formalizations in PVS Versus Derivations. . . . .	95
4.1.1	The Syntax of the PVS Specification Language . . . . .	96
4.1.2	The PVS Proof Commands Versus Gentzen Sequent Rules . . . . .	100
4.2	PVS Proof Commands for Equational Manipulation . . . . .	108
4.3	Proof Commands for Induction . . . . .	112
4.4	The Semantics of the PVS Specification Instructions . . . . .	118
<b>5</b>	<b>Algebraic and Computational Examples</b> . . . . .	121
5.1	Proving Simple Algebraic Properties . . . . .	121
5.2	Soundness of Recursive Algorithms Through Induction. . . . .	126
<b>6</b>	<b>Suggested Readings</b> . . . . .	139
6.1	Proof Theory . . . . .	139
6.2	Formal Logic . . . . .	140
6.3	Automated Theorem Proving and Type Theory . . . . .	142
	<b>References</b> . . . . .	145
	<b>Index</b> . . . . .	147
