<b>Prof. Padmanabhan: A Personal and Professional History</b> . . . . .	1
Jasjeet Singh Bagla and Sunu Engineer	
<b>Measuring Baryon Acoustic Oscillations with Angular Two-Point Correlation Function.</b> . . . .	11
Jailson S. Alcaniz, Gabriela C. Carvalho, Armando Bernui, Joel C. Carvalho and Micol Benetti	
1 Introduction . . . . .	11
2 The Angular Two-Point Correlation Function . . . . .	12
3 Cosmological Constraints . . . . .	16
4 Conclusions . . . . .	18
References . . . . .	19
<b>Resonant Disruption of Binary Stars by a Catalytic Black Hole.</b> . . . .	21
C.M. Boily	
1 Introduction . . . . .	21
2 Anisotropic Motion . . . . .	22
3 Binary Stars . . . . .	25
4 Numerical Examples . . . . .	26
5 Outlook . . . . .	28
References . . . . .	29
<b>Mechanics of Apparent Horizon in Two Dimensional Dilaton Gravity</b> . . . . .	31
Rong-Gen Cai and Li-Ming Cao	
1 Introduction . . . . .	31
2 General Dilaton Gravity Theory in Two Dimensions . . . . .	33
3 Some Solutions of the Theory . . . . .	34
4 Apparent Horizon . . . . .	35
5 The Mechanics of the Apparent Horizon . . . . .	37
References . . . . .	41

<b>Boundary Terms of the Einstein–Hilbert Action</b> . . . . .	43
Sumanta Chakraborty	
1 Introduction . . . . .	43
2 Reconciling Boundary Terms for the Einstein–Hilbert Action . . . . .	45
3 (1+3) Decomposition, Time Derivatives and Canonical Momenta . . . . .	51
4 Null Surfaces: Completing the Circle . . . . .	55
5 Concluding Remarks . . . . .	58
References . . . . .	59
<b>Decay of the Cosmic Vacuum Energy</b> . . . . .	61
Timothy Clifton and John D. Barrow	
1 Introduction . . . . .	61
2 Background Evolution . . . . .	63
3 Energy Exchange in the Presence of a Non-interacting Fluid . . . . .	64
4 Perturbations Generated During Inflation . . . . .	66
5 Discussion . . . . .	70
References . . . . .	71

Gravity and the Quantum

Pedagogical Essays on Cosmology, Astrophysics, and  
Quantum Gravity

Bagla, J.S.; Engineer, S. (Eds.)

2017, XII, 494 p. 54 illus., Hardcover

ISBN: 978-3-319-51699-8
