

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	The Three-Body Problem and the Efimov Scenario	1
1.2	Efimov States and Universality in Modern Quantum Mechanics	7
1.3	The Heteronuclear Efimov Scenario	10
1.4	Thesis Outline	13
	References	14
<b>2</b>	<b>Two-Body Interactions Between Li and Cs Atoms</b>	<b>17</b>
2.1	Interactions in Ultracold Mixtures of Li and Cs Atoms	17
2.2	Low-Energy Scattering in Ultracold Quantum Gases	19
2.2.1	Basic Physics of Two-Body Scattering at Ultracold Temperatures	20
2.2.2	Scattering in External Magnetic Field	22
2.2.3	Interactions and Weakly-Bound Dimers Close to a Feshbach Resonance	25
2.3	Producing and Probing Ultracold Li-Cs Mixtures	28
2.3.1	Experimental Procedure for the Sample Preparation at 400 nK	29
2.3.2	Homogenous Magnetic Fields	31
2.3.3	Radio- and Microwave Frequency Fields	33
2.4	Radio-Frequency Association of Weakly-Bound LiCs Dimers	36
2.4.1	Spectroscopy of LiCs Feshbach dimers	37
2.4.2	Model of the association lineshape	39
2.4.3	Li-Cs scattering length and Feshbach resonances	43
	References	47

<b>3</b>	<b>Universality of Li-Cs-Cs Efimov Resonances</b>	51
3.1	The Efimov Scenario in Ultracold Gases	52
3.1.1	Experiments	54
3.2	Three-Body Scattering and the Efimov Effect	55
3.2.1	Key Concepts of the Hyperspherical Formalism	55
3.2.2	The Efimov Effect Within the Zero-Range Model	58
3.2.3	The Efimov Scenario as Recombination Resonances	61
3.3	Producing Ultracold Li-Cs Mixtures II	65
3.3.1	Bichromatic Optical-Dipole Trap	67
3.3.2	Experimental Procedure for the Sample Preparation at 100 nK	71
3.4	Observation of Li-Cs-Cs Efimov Resonances	72
3.4.1	Atom-Loss Spectra	73
3.4.2	Determination of Three-Body Loss Rates	74
3.4.3	Simple Analysis of Efimov Resonance Positions	79
3.4.4	Recombination Spectra at Finite Temperatures	81
	References	86
<b>4</b>	<b>Finite-Range Effects in Li-Cs-Cs Efimov Resonances</b>	91
4.1	The Three-Body Parameter and Finite-Range Interactions	92
4.2	Minimalistic Model for the Three-Body Problem with Finite-Range Interactions	94
4.2.1	The Born-Oppenheimer Approximation	94
4.2.2	Weakly Bound Li-Cs-Cs Efimov Trimers with van der Waals Interactions	99
4.3	Observation of Li-Cs-Cs Efimov Resonances with Tunable Cs Background Scattering Length	103
4.3.1	Three-Body Recombination at Negative $a_{\text{CsCs}}$	103
4.3.2	Three-Body Recombination at Positive $a_{\text{CsCs}}$	105
4.3.3	Efimov Resonance Positions from the Hyperspherical Formalism	109
4.3.4	Crossover Between the VdW and Efimov Regimes	110
	References	115
<b>5</b>	<b>Conclusion and Outlook</b>	119
	References	123

Heteronuclear Efimov Scenario in Ultracold Quantum  
Gases

Universality in Systems with Large Mass Imbalance

Ulmanis, J.

2017, XVIII, 125 p. 45 illus., 44 illus. in color., Hardcover

ISBN: 978-3-319-51861-9
