

Contents

1	Introduction	1
2	Models of Threshold Collective Behavior	5
3	Micro- and Macromodels	9
3.1	Micromodel	9
3.2	Macromodel	10
3.3	Threshold Model of Agents Behavior	13
3.4	Identification and Simulation Experiments	16
4	Deterministic Models of Mob Control	29
4.1	A Threshold Model of Mob Behavior	29
4.2	Threshold Control	32
4.3	Reputation Control	39
4.4	Reflexive Control	40
5	Stochastic Models of Mob Control	43
5.1	Mob “Excitation” Control	44
5.2	Mob “Immunization” Control	47
5.3	Informational Confrontation	48
6	Game-Theoretic Models of Mob Control	61
6.1	Centralized Control Problem	62
6.2	Decentralized Control Problems	64
7	Dynamic Models of Mob Control in Discrete Time	73
7.1	Mob Control Problem	73
7.2	Models with Constraints on the Total Number of Provokers	74
7.3	Continuous Control	76
7.4	Probabilistic Models of Provokers Detection	83
8	Dynamic Models of Mob Control in Continuous Time	87
8.1	Attainability Set and Monotonicity	88

8.2	Constant Control.	92
8.3	Excitation of Whole Mob	92
8.4	Positional Control.	93
9	Micromodels of Informational Confrontation	97
9.1	Micromodel and Informational Control.	98
9.2	“Antagonistic” Game	99
9.3	“Nonantagonistic” Game.	101
9.4	Reflexive Game	103
9.5	Secure Strategies Equilibrium.	103
10	Macromodels of Informational Confrontation.	105
10.1	Model of Informational Confrontation	105
10.2	Normal-Form Game	106
10.3	Threshold Goal Functions.	109
10.4	Hierarchical Game	114
10.5	Reflexive Game	117
11	Models of Mob Self-excitation	121
	Conclusion	129
	References	131

Mob Control: Models of Threshold Collective Behavior

Breer, V.V.; Novikov, D.A.; Rogatkin, A.D.

2017, VIII, 134 p. 29 illus., 13 illus. in color., Hardcover

ISBN: 978-3-319-51864-0
