

Contents

1	Gauge Theories and the Standard Model	1
1.1	An Overview of the Fundamental Interactions	1
1.2	The Architecture of the Standard Model	3
1.3	The Formalism of Gauge Theories	8
1.4	Application to QED and QCD	10
1.5	Chirality	12
1.6	Quantization of a Gauge Theory	13
1.7	Spontaneous Symmetry Breaking in Gauge Theories	15
1.8	Quantization of Spontaneously Broken Gauge Theories: R_ξ Gauges	22
2	QCD: The Theory of Strong Interactions	27
2.1	Introduction	27
2.2	Non-perturbative QCD	30
2.2.1	Progress in Lattice QCD	31
2.2.2	Confinement	32
2.2.3	Chiral Symmetry in QCD and the Strong CP Problem	36
2.3	Massless QCD and Scale Invariance	40
2.4	The Renormalization Group and Asymptotic Freedom	44
2.5	More on the Running Coupling	53
2.6	On the Non-convergence of Perturbative Expansions	55
2.7	e^+e^- Annihilation and Related Processes	55
2.7.1	$R_{e^+e^-}$	55
2.7.2	The Final State in e^+e^- Annihilation	59
2.8	Deep Inelastic Scattering	61
2.8.1	The Longitudinal Structure Function	70
2.8.2	Large and Small x Resummations for Structure Functions	71
2.8.3	Polarized Deep Inelastic Scattering	74

2.9	Hadron Collider Processes and Factorization	76
2.9.1	Vector Boson Production	78
2.9.2	Jets at Large Transverse Momentum	81
2.9.3	Heavy Quark Production	82
2.9.4	Higgs Boson Production	85
2.10	Measurements of α_s	87
2.10.1	α_s from e^+e^- Colliders	88
2.10.2	α_s from Deep Inelastic Scattering	91
2.10.3	Recommended Value of $\alpha_s(m_Z)$	93
2.10.4	Other $\alpha_s(m_Z)$ Measurements as QCD Tests	94
2.11	Conclusion	96
3	The Theory of Electroweak Interactions	97
3.1	Introduction	97
3.2	The Gauge Sector	98
3.3	Couplings of Gauge Bosons to Fermions	99
3.4	Gauge Boson Self-Interactions	104
3.5	The Higgs Sector	106
3.6	The CKM Matrix and Flavour Physics	111
3.7	Neutrino Mass and Mixing	118
3.8	Quantization and Renormalization of the Electroweak Theory	123
3.9	QED Tests: Lepton Anomalous Magnetic Moments	126
3.10	Large Radiative Corrections to Electroweak Processes	129
3.11	Electroweak Precision Tests	131
3.12	Results of the SM Analysis of Precision Tests	135
3.13	The Search for the SM Higgs	140
3.14	Theoretical Bounds on the SM Higgs Mass	141
3.15	SM Higgs Decays	143
3.16	The Higgs Discovery at the LHC	146
3.17	Limitations of the Standard Model	151

Collider Physics within the Standard Model

A Primer

Altarelli, G. - Wells, J.D. (Ed.)

2017, XIV, 173 p. 60 illus., 34 illus. in color., Softcover

ISBN: 978-3-319-51919-7
