

Contents

1	The Evolution of Mammalian Adipose Tissues	1
	Caroline M. Pond	
2	Adipocyte Progenitors from Human Pluripotent Stem Cells	61
	A.-L. Hafner and C. Dani	
3	Adipocyte Differentiation	69
	José María Moreno-Navarrete and José Manuel Fernández-Real	
4	Brown Adipose Tissue	91
	Martin Klingenspor, Andrea Bast, Florian Bolze, Yongguo Li, Stefanie Maurer, Sabine Schweizer, Monja Willershäuser, and Tobias Fromme	
5	White Adipose Tissue	149
	Stephane Gesta and C. Ronald Kahn	
6	The Physiological Significance of Brown Adipose Tissue and the Beiging of White Adipose Tissue in People	201
	Maria Chondronikola and Labros S. Sidossis	
7	Macrophages and Inflammation	229
	Elise Dalmas, Joan Tordjman, Michèle Guerre-Millo, and Karine Clément	
8	Sex Differences in Body Fat Distribution	257
	Mohamed Fouad Mansour, Chon-Wai Jeremy Chan, Sofia Laforest, Alain Veilleux, and André Tchernof	
9	Brown Adipose Tissue as a Therapeutic Target	301
	Wouter D. van Marken Lichtenbelt and Emmani B.M. Nascimento	
10	Dietary Determinants of Fat Mass and Body Composition	319
	María A. Zulet, María J. Moreno-Aliaga, and J. Alfredo Martínez	

11	The Genetic Determinants of Common Obesity-Susceptibility.....	383
	Ruth J.F. Loos	
12	Early Origins of Obesity and Developmental Regulation of Adiposity	427
	Shalini Ojha and Helen Budge	
	Index.....	457

Adipose Tissue Biology

Symonds, M.E. (Ed.)

2017, VI, 460 p. 40 illus., 28 illus. in color., Hardcover

ISBN: 978-3-319-52029-2
