1	Feature Representation and Extraction for Image Search and Video Retrieval	1
	Qingfeng Liu, Yukhe Lavinia, Abhishek Verma, Joyoung Lee, Lazar Spasovic and Chengjun Liu	
1.1	Introduction	1
1.2	Spatial Pyramid Matching, Soft Assignment Coding, Fisher Vector Coding, and Sparse Coding	3
1.2.1	Spatial Pyramid Matching	3
1.2.2	Soft Assignment Coding	4
1.2.3	Fisher Vector Coding	4
1.2.4	Sparse Coding	5
1.2.5	Some Sparse Coding Variants	6
1.3	Local Binary Patterns (LBP), Feature LBP (FLBP), Local Quaternary Patterns (LQP), and Feature LQP (FLQP)	8
1.4	Scale Invariant Feature Transform (SIFT) and SIFT Variants	9
1.4.1	Color SIFT	10
1.4.2	SURF	10
1.4.3	MSIFT	11
1.4.4	DSP-SIFT	12
1.4.5	LPSIFT	12
1.4.6	FAIR-SURF	13
1.4.7	Laplacian SIFT	14
1.4.8	Edge-SIFT	14
1.4.9	CSIFT	15
1.4.10	RootSIFT	15
1.4.11	PCA-SIFT	15
1.5	Conclusion	16
	References	16

2 Learning and Recognition Methods for Image Search and Video Retrieval	21
Ajit Puthenputhussery, Shuo Chen, Joyoung Lee, Lazar Spasovic and Chengjun Liu	
2.1 Introduction	21
2.2 Deep Learning Networks and Models	23
2.2.1 Feedforward Deep Neural Networks	24
2.2.2 Deep Autoencoders	25
2.2.3 Convolutional Neural Networks (CNNs)	26
2.2.4 Deep Boltzmann Machine (DBM)	27
2.3 Support Vector Machines	27
2.3.1 Linear Support Vector Machine	28
2.3.2 Soft-Margin Support Vector Machine	29
2.3.3 Non-linear Support Vector Machine	30
2.3.4 Simplified Support Vector Machines	31
2.3.5 Efficient Support Vector Machine	33
2.3.6 Applications of SVM	34
2.4 Other Popular Kernel Methods and Similarity Measures	37
2.5 Conclusion	39
References	39
3 Improved Soft Assignment Coding for Image Classification	45
Qingfeng Liu and Chengjun Liu	
3.1 Introduction	45
3.2 Related Work	47
3.3 The Improved Soft-Assignment Coding	48
3.3.1 Revisiting the Soft-Assignment Coding	48
3.3.2 Introduction to Fisher Vector and VLAD Method	50
3.3.3 The Thresholding Normalized Visual Word Plausibility	51
3.3.4 The Power Transformation	53
3.3.5 Relation to VLAD Method	54
3.4 Experiments	54
3.4.1 The UIUC Sports Event Dataset	55
3.4.2 The Scene 15 Dataset	56
3.4.3 The Caltech 101 Dataset	57
3.4.4 The Caltech 256 Dataset	59
3.4.5 In-depth Analysis	60
3.5 Conclusion	61
References	61

4	Inheritable Color Space (InCS) and Generalized InCS Framework with Applications to Kinship Verification	65
	Qingfeng Liu and Chengjun Liu	
4.1	Introduction	65
4.2	Related Work	67
4.3	A Novel Inheritable Color Space (InCS)	68
4.4	Properties of the InCS	70
4.4.1	The Decorrelation Property	71
4.4.2	Robustness to Illumination Variations	72
4.5	The Generalized InCS (GInCS) Framework	74
4.6	Experiments	76
4.6.1	Experimental Results Using the KinFaceW-I and the KinFaceW-II Datasets	77
4.6.2	Experimental Results Using the UB KinFace Dataset	78
4.6.3	Experimental Results Using the Cornell KinFace Dataset	78
4.7	Comprehensive Analysis	79
4.7.1	Comparative Evaluation of the InCS and Other Color Spaces	80
4.7.2	The Decorrelation Property of the InCS Method	81
4.7.3	The Robustness of the InCS and the GInCS to Illumination Variations	82
4.7.4	Performance of Different Color Components of the InCS and the GInCS	84
4.7.5	Comparison Between the InCS and the Generalized InCS	86
4.7.6	Generalization Performance of the InCS Method	86
4.8	Conclusion	87
	References	87
5	Novel Sparse Kernel Manifold Learner for Image Classification Applications	91
	Ajit Puthenpuvathu and Chengjun Liu	
5.1	Introduction	91
5.2	Related Work	94
5.3	Novel Sparse Kernel Manifold Learner Framework	95
5.3.1	Fisher Vector	95
5.3.2	DAISY Fisher Vector (D-FV)	96
5.3.3	Weber-SIFT Fisher Vector (WS-FV)	96
5.3.4	Fused Color Fisher Vector (FCFV)	97
5.3.5	Sparse Kernel Manifold Learner (SKML)	97
5.4	Experiments	99
5.4.1	Painting-91 Dataset	100
5.4.2	Fifteen Scene Categories Dataset	107

5.4.3	CalTech 101 Dataset	109
5.5	Conclusion	111
	References	111
6	A New Efficient SVM (eSVM) with Applications to Accurate and Efficient Eye Search in Images	115
	Shuo Chen and Chengjun Liu	
6.1	Introduction	116
6.2	An Efficient Support Vector Machine	117
6.2.1	The Conventional Soft-Margin Support Vector Machine	117
6.2.2	Efficient Support Vector Machine	119
6.2.3	Modified Sequential Minimal Optimization Algorithm	122
6.3	Accurate and Efficient Eye Localization Using eSVM	124
6.3.1	The Eye Candidate Selection Stage	125
6.3.2	The Eye Candidate Validation Stage	129
6.4	Experiments	130
6.4.1	Performance Evaluation of the eSVM Method	131
6.4.2	Performance Evaluation of the Eye Localization Method	137
6.5	Conclusion	142
	References	143
7	SIFT Features in Multiple Color Spaces for Improved Image Classification	145
	Abhishek Verma and Chengjun Liu	
7.1	Introduction	145
7.2	Related Work	146
7.3	Color Spaces	148
7.3.1	RGB and rgb Color Spaces	148
7.3.2	HSV Color Space	148
7.3.3	YCbCr Color Space	149
7.3.4	oRGB Color Space	149
7.4	SIFT Feature Extraction, Clustering, Visual Vocabulary Tree, and Visual Words	149
7.4.1	SIFT Feature Extraction	149
7.4.2	Clustering, Visual Vocabulary Tree, and Visual Words	150
7.5	Color SIFT Descriptors	152
7.6	EFM-NN Classifier	152
7.7	Description of Dataset	155
7.7.1	Caltech 256 Object Categories Dataset	155
7.7.2	UPOL Iris Dataset	156
7.8	Experimental Evaluation of Color SIFT Descriptors on the Caltech 256 and the UPOL Iris Datasets	157

7.8.1	Experimental Methodology	157
7.8.2	Experimental Results on the Biometric 100 Categories Dataset	157
7.9	Conclusion	164
	References	164
8	Clothing Analysis for Subject Identification and Retrieval	167
	Emad Sami Jaha and Mark S. Nixon	
8.1	Introduction	167
8.1.1	Motivations and Applications	167
8.1.2	Human Identification and Retrieval	169
8.1.3	Soft Biometrics	170
8.1.4	Clothing Information Analyses	172
8.1.5	Research Context	174
8.2	Methodology	175
8.2.1	Experimental Framework of Soft Clothing Biometrics	175
8.2.2	Soft Clothing Description Database	177
8.2.3	Clothing Description Data Acquisition	177
8.3	Analysing Soft Clothing Attributes	180
8.3.1	Attribute Significance and Correlation	180
8.4	Analysing the Clothing Feature Space	183
8.4.1	Clothing Trait Distribution Statistics	183
8.4.2	Analysis of Variance (ANOVA) of Clothing Traits	185
8.4.3	Mutual Dependence Analysis of Clothing Traits	187
8.4.4	Evaluating Clothing Features by Performance	191
8.5	Experiments	198
8.5.1	Identification Using Soft Clothing Biometrics	198
8.5.2	Retrieval by Soft Clothing Biometrics	200
8.6	Conclusion	207
	References	207
9	Performance Evaluation of Video Analytics for Traffic Incident Detection and Vehicle Counts Collection	213
	Kitae Kim, Slobodan Gutesa, Branislav Dimitrijevic, Joyoung Lee, Lazar Spasovic, Wasif Mirza and Jeevanjot Singh	
9.1	Introduction	213
9.2	Relevant Studies	214
9.3	Design of Pilot Test	217
9.3.1	System Integration	217
9.3.2	Video Quality Setting	218
9.3.3	Test Bed Locations	219
9.3.4	Camera Preset and Detection Zone Set Up	220
9.3.5	Incident Detection Rule Setting	220
9.3.6	System Validation Approach	221

9.4 Validation Results 223

 9.4.1 Incident Detection 223

 9.4.2 Traffic Count Data 227

9.5 Conclusions 229
