

Contents

1	Environmental Impact Assessment—State of the Art	1
1.1	Environmental Impact Assessment	2
1.1.1	Origins and Development of EIA	2
1.1.2	The State of Environmental Impact Assessment	4
1.1.3	Strengths, Weaknesses, Threats and Opportunities of EIA	9
1.1.4	EIA Methods	11
1.1.5	EIA in Slovakia	22
1.2	Risk Analysis	28
1.2.1	Historical Background	28
1.2.2	The Importance of Risk Analysis	29
1.2.3	Definition of Risk Analysis	30
1.2.4	Risk-Analysis Methods	32
1.2.5	Parts of Risk Analysis	39
1.2.6	The Uses of Risk Analysis and Assessment	39
1.3	Risk Analysis and Assessment Within Environmental Impact Assessment	46
1.3.1	Background to EIA and RA	46
1.3.2	Similarities Between Environmental Risk Assessment and Environmental Impact Assessment	49
1.3.3	Existing Approaches to Integrating RA into EIA	51
1.4	Summary and Implications	61
	References	63
2	Risk Analysis in Impact Assessment	73
2.1	Methodology and Research Design	74
2.1.1	Methodology	74
2.1.2	Research Design	76
2.2	Establishing the Context	76
2.2.1	Characteristics of the Current State of the Environment in the Affected Area	77

2.2.2	Explanation of the Reasons Why the Proposed Activity Is Required in the Locality	78
2.2.3	Brief Description of Alternatives to the Proposed Activity $A_j (A_0, A_I, A_{II})$	78
2.3	Risk Analysis	79
2.3.1	Creation a Set of Risk Factors (A–Z)	79
2.3.2	Determine the Relative Importance (Weight) of the Risk Factors (w_i).	81
2.3.3	Creation of Risk Criteria for Risk Factors.	82
2.3.4	Determination Score of Criterion (0.2–1.0)	83
2.4	Decision-Making	83
2.4.1	Comparison of Alternatives of the Proposed Activity and the Proposal of the Optimal Alternative	87
2.4.2	Proposed Measures for the Prevention, Elimination, Minimization, and Compensation of Impacts on the Environment and Health.	89
	References.	89
3	Case Study—Flood-Protection Measures at Kružlov, North-Eastern Slovakia.	91
3.1	Basic Data About the Nature and Localization of the Proposed Activity.	92
3.2	Establishing the Context.	94
3.2.1	Characteristics of the Current State of the Environment in the Affected Area	94
3.2.2	Explanation of the Reasons Why the Proposed Activity is Required in the Locality	97
3.2.3	Brief Description of Alternatives of the Proposed Activity $A_j (A_0, A_I, A_{II})$	100
3.3	Risk Analysis	104
3.4	Decision-Making	106
3.4.1	Comparison of Alternatives of the Proposed Activity and the Proposal of the Optimal Alternative	106
3.4.2	Proposed Measures for the Prevention, Elimination, Minimization and Compensation of Impacts on the Environment and Health.	111
	References.	113
4	Conclusions and Recommendations	115
4.1	Theoretical and Practical Benefits.	116
4.2	Recommendations for Future Research.	117
	References.	118
	Appendix: Description of Individual Parameters	119

Using Risk Analysis for Flood Protection Assessment

Zeleňáková, M.; Zvijáková, L.

2017, XII, 128 p. 34 illus., 18 illus. in color., Hardcover

ISBN: 978-3-319-52149-7
