## Part I Mathematical Model of Network System

<b>1</b>	<b>Introduction</b> . . . . .	3
1.1	Network System . . . . .	3
1.2	Modeling Network System . . . . .	4
1.3	Solving Network System . . . . .	5
1.4	Network Laws . . . . .	6
<b>2</b>	<b>Basic Notions</b> . . . . .	9
2.1	Network Graph Notions . . . . .	9
2.2	Electrical Network Notions . . . . .	9
<b>3</b>	<b>Algebraic Model of Network Graph</b> . . . . .	13
3.1	Cut-Set and Loop-Set Vectors . . . . .	13
3.2	Topology of Network . . . . .	14
3.3	Topological Model of Loop-Sets . . . . .	15
3.4	Topological Model of Cut-Sets . . . . .	16
3.5	Orthogonality of Cut-Sets and Loop-Sets . . . . .	18
3.6	Linear Space Model of Network Topology . . . . .	19
3.7	Topological Transformation . . . . .	20
3.8	Topological Matrix $T$ . . . . .	22
<b>4</b>	<b>Algebraic Model of Network Currents</b> . . . . .	25
4.1	Matrix Model of Network Currents . . . . .	25
4.2	Linear Space Model of Network Currents . . . . .	26
4.3	Topological Transformation of Current Space . . . . .	28
4.4	Current Relations Using Topological Matrix $T$ . . . . .	29
<b>5</b>	<b>Algebraic Model of Network Voltages</b> . . . . .	31
5.1	Matrix Model of Network Voltages . . . . .	31
5.2	Linear Space Model of Network Voltages . . . . .	33

5.3	Topological Transformation of Voltage Space . . . . .	34
5.4	Voltage Relations Using Topological Matrix $T$ . . . . .	35
<b>6</b>	<b>Algebraic Model of Current–Voltage Vectors</b> . . . . .	<b>37</b>
6.1	Orthogonality of Current and Voltage Vectors . . . . .	37
6.2	Current–Voltage Vector . . . . .	38
6.3	Linear Space Model of Current–Voltage Vectors . . . . .	39
6.4	Current–Voltage Vectors’ Relations Using Matrix $T$ . . . . .	40
6.5	Comment . . . . .	41
<b>7</b>	<b>Kirchhoff’s Laws Using Matrix <math>T</math></b> . . . . .	<b>43</b>
7.1	Basic $b$ -Dimensional Formulation. . . . .	43
7.2	Pseudo-Unit Formulation . . . . .	45
7.3	Current–Voltage Formulation . . . . .	46
<b>8</b>	<b>Current–Voltage Functional Relations</b> . . . . .	<b>47</b>
8.1	Branch Parameters . . . . .	47
8.2	Ohm’s Law of Network System—Algebraic Model . . . . .	50
8.3	Linear Space Model of Current–Voltage State Vectors in Network System. . . . .	52
8.4	Formulation of Ohm’s Law Using Matrix $T$ . . . . .	55
8.5	Matrices of System Admittance and System Impedance. . . . .	57
<b>9</b>	<b>General Comments to Part I</b> . . . . .	<b>59</b>
9.1	Part II Application Examples . . . . .	60
 <b>Part II Application Examples</b>		
<b>10</b>	<b>Applications of <math>b</math>-Dimensional Formulation of Kirchhoff’s Laws</b> . . . . .	<b>63</b>
10.1	Basic $b$ -Dimensional Formulation. . . . .	63
10.2	Pseudo-Unit Formulation . . . . .	65
<b>11</b>	<b>Network Solution Method Using Algebraic Network Model</b> . . . . .	<b>69</b>
11.1	Derivation of Method Using Matrix $T$ . . . . .	69
11.2	Classical Network Solution Methods . . . . .	71
<b>12</b>	<b>Method of Current and Voltage Sensitivity Analysis</b> . . . . .	<b>73</b>
12.1	Derivation of Method . . . . .	73
12.2	Numerical Example . . . . .	75
<b>13</b>	<b>Method of Arbitrary Input Data</b> . . . . .	<b>77</b>
13.1	Description of Arbitrary Input Data . . . . .	77
13.2	Derivation of Solution Equations . . . . .	78
13.3	Solvability Analysis . . . . .	80
13.4	Numerical Example . . . . .	81

<b>14</b>	<b>Logical Optimization Method of Network System</b>	87
14.1	Example of Network System Matrices	87
14.2	Logical Analysis of Network System Equations	89
14.3	Application Possibilities	94
<b>15</b>	<b>Current-Based Method of Load Flow Solution</b>	97
15.1	Current State-Oriented Topology of Network	97
15.2	Current State Vector and Current Flow Method	98
15.3	Current-Based Load Flow Method	101
15.4	Verification of Method	102
15.5	Conclusions	104
