1 On the Fundamentals of Intelligent Process-Aware Information Systems	1
Gregor Grambow, Roy Oberhauser and Manfred Reichert	
1.1 Introduction	1
1.1.1 Evolution of Process Management Systems	3
1.2 The IPAIS Lifecycle	5
1.2.1 Intelligent Process Design	5
1.2.2 Intelligent Process Implementation	6
1.2.3 Intelligent Process Enactment	7
1.2.4 Intelligent Process Diagnosis	8
1.2.5 IPAIS Approaches Discussed in This Book	8
1.3 Outlook	11
References	11
2 Adaptive Process Management in Cyber-Physical Domains	15
Andrea Marrella and Massimo Mecella	
2.1 Introduction	16
2.2 Related Work	18
2.2.1 Exception Handling	18
2.2.2 Ad Hoc Process Change	20
2.2.3 AI-based Process Adaptation	21
2.3 Managing Processes in Cyber-Physical Domains	22
2.3.1 A Running Example from the Emergency Management Domain	23
2.3.2 High-Level Features for Managing Processes in Cyber-Physical Domains	25
2.4 The SmartPM Approach and System	27
2.4.1 Overview of the Approach	28
2.4.2 The SmartPM Environment and Architecture	30
2.4.3 Applying SmartPM to the Running Example	36

2.5	Discussion	41
2.6	Conclusion	43
	References	44
3	Towards Executable Specifications for Case Management Processes	49
	Irina Rychkova, Bénédicte Le Grand and Carine Souveyet	
3.1	Introduction	49
3.2	Case Management Process Example and Terminology	52
3.2.1	Crisis Management in Cases of Flood	52
3.2.2	Terminology Used in This Chapter	54
3.3	Related Work	54
3.3.1	Adaptive Case Management	55
3.3.2	Modeling Paradigms for CMP Specification	55
3.4	Finite State Machines, Hierarchical State Machines and Statecharts	58
3.4.1	CMP Versus Complex Discrete-Event Systems	59
3.4.2	Finite State Machines	59
3.4.3	Hierarchical State Machines and Statecharts	59
3.5	Statecharts Semantics for Case Management Processes	62
3.5.1	Statecharts Semantics for CMP Specification	63
3.5.2	Adaptation and Extension of the Statecharts Formalism for CMP Specification	67
3.6	Perspectives and Roadmap for Future Research	69
3.6.1	Design and Simulation-Based Testing	69
3.6.2	Simulation-Based Recommendations	72
3.6.3	Enhancing the CMP-supporting PAIS with Recommendations for Agile Activity Planning	73
	References	75
4	Towards Autonomically-Capable Processes: A Vision and Potentially Supportive Methods	79
	Roy Oberhauser and Gregor Grambow	
4.1	Introduction	79
4.2	Background on Autonomic Computing	80
4.3	A Vision for Autonomically-Capable Processes	82
4.3.1	Vision	83
4.3.2	Challenges	83
4.4	Achieving Autonomically-Capable Processes	85
4.4.1	Aspects Affecting ACP	86
4.4.2	ACP Capabilities	94
4.5	Towards ACP: A Hybrid Extension Approach Example	102
4.5.1	Towards Context-Aware Processes	105
4.5.2	Towards Self-configuring Processes	105

4.5.3	Towards Self-adapting Processes	108
4.5.4	Towards Self-healing Processes	110
4.5.5	Towards Self-optimizing Processes	114
4.6	Summary	117
	References	118
5	Process-Oriented Information Logistics: Requirements, Techniques, Application	127
	Bernd Michelberger, Markus Hipp and Bela Mutschler	
5.1	Introduction	127
5.1.1	Problem Statement	128
5.1.2	Information Logistics	129
5.1.3	Requirements	129
5.2	Process-Oriented Information Logistics	130
5.2.1	Step 1: Integration	131
5.2.2	Step 2: Analysis	132
5.2.3	The Semantic Information Network	133
5.2.4	Determining the Relevance of Process Information	135
5.3	POIL in Practice	140
5.3.1	Use Case 1: Process Navigation and Visualization	140
5.3.2	Use Case 2: Medical Information Logistics	145
5.4	Discussion	149
5.5	Summary	150
	References	150
6	A Predictive Approach Enabling Process Execution Recommendations	155
	Johannes Schobel and Manfred Reichert	
6.1	Introduction	155
6.2	Background	157
6.3	Business Process Intelligence	157
6.3.1	Methodology	158
6.3.2	Architecture	158
6.4	Predictive Business Process Intelligence	160
6.4.1	Predictive Process Analysis	160
6.4.2	Recommendations on Process Instances	163
6.5	Evaluation	163
6.5.1	Process Scenario	164
6.5.2	Results	164
6.6	Related Work	167
6.7	Summary and Outlook	168
	References	168

7 Reasoning About Process Models: What Description Logic Offers to Business Process Model Analysis	171
Michael Fellmann	
7.1 Introduction	172
7.2 Semantics-Related Challenges of Semi-formal Modelling	172
7.2.1 Ambiguities of the Natural Language	172
7.2.2 Lack of Machine Processable Semantics	173
7.2.3 Lack of Semantics-Based Tool Support	173
7.3 Description Logic-Based Process Representation	174
7.3.1 Conceptual Overview	175
7.3.2 Ontology-Based Process Model Representation	176
7.4 Querying Process Knowledge	179
7.5 Use of Machine Reasoning	181
7.5.1 Overview	183
7.5.2 Characterization of the Four Types of Inferences	183
7.6 Tool Support	187
7.7 Discussion and Outlook	188
References	190
8 Improving Process Portability Through Metrics and Continuous Inspection	193
Jörg Lenhard	
8.1 Why Process Portability Matters	193
8.2 How Software Measurement Can Help	196
8.2.1 Standards Are Not Enough	196
8.2.2 Quality Improvement with Continuous Inspection	199
8.2.3 Portability and the ISO/IEC 25010 Quality Model	201
8.3 Metrics for Process Portability	204
8.3.1 Direct Portability	204
8.3.2 Installability	209
8.3.3 Adaptability	212
8.3.4 Replaceability	215
8.4 Related Work	217
8.4.1 Work on Process Unit Testing and Conformance Validation	217
8.4.2 Approaches for Tackling Portability Issues	217
8.4.3 Metrics for Selected Quality Characteristics	218
8.5 Summary and Conclusion	219
References	220

9 Business Process Intelligence Tools	225
Johannes Schobel and Manfred Reichert	
9.1 Introduction	225
9.1.1 Strategies for Using a BPI Tool	226
9.1.2 Dimensions for Evaluating BPI Tools	226
9.2 Methodology	227
9.3 A Practical Case	228
9.3.1 Purchase-To-Pay Process	229
9.3.2 Leveraging the Strengths of BPI Tools	229
9.4 Assessment Criteria and Strategies	230
9.4.1 Strategies	230
9.4.2 Dimensions	231
9.4.3 Attributes	231
9.5 Business Process Intelligence Tools	231
9.5.1 Tool Shortlist	232
9.5.2 Tool Categories	233
9.5.3 Fact Sheets for the Evaluated BPI Tools	234
9.6 Applying the Tools to the Case	238
9.6.1 System	238
9.6.2 Data Integration & Extraction	239
9.6.3 Data Processing & Analysis	239
9.6.4 Mining	240
9.6.5 Data Visualization	241
9.7 Discussion	242
9.7.1 One Time Usage	242
9.7.2 Long Term Usage	243
References	248

Advances in Intelligent Process-Aware Information
Systems

Concepts, Methods, and Technologies

Grambow, G.; Oberhauser, R.; Reichert, M. (Eds.)

2017, XI, 249 p. 99 illus., Hardcover
