1	Introduction	1
1.1	General	1
1.2	Trend Definition and Analysis	3
1.2.1	Conceptual and Visual Trends	4
1.2.2	Mathematical Trend	7
1.2.3	Statistical Trend	9
1.3	Trend in Some Disciplines	11
1.3.1	Atmospheric Sciences	12
1.3.2	Environmental Sciences	12
1.3.3	Earth Sciences	12
1.3.4	Engineering	13
1.3.5	Global Warming	13
1.3.6	Climate Change	14
1.3.7	Social Sciences	14
1.4	Pros and Cons of Trend Analysis	17
1.5	Future Research Directions	17
1.6	Purpose of This Book	18
	References	19
2	Uncertainty and Time Series	21
2.1	General	21
2.2	Random and Randomness	24
2.3	Empirical Frequency and Distribution Function	25
2.3.1	Empirical Frequency and Trend	28
2.4	Theoretical Probability Distribution Function (Pdf)	30
2.5	Statistical Modeling	32
2.5.1	Deterministic-Uncertain Model	34
2.5.2	Probabilistic-Statistical Model	35
2.5.3	Transitional Probability Model	36
2.6	Stochastic Models	37
2.6.1	Homogeneity (Consistency)	38
2.6.2	Stationarity	39
2.6.3	Periodicity (Seasonality)	40

2.7	Time Series Truncation	45
2.7.1	Statistical Truncations	47
2.8	Data Smoothing	49
2.8.1	Moving Averages	50
2.8.2	Difference Smoothing	50
2.9	Jump (Shift)	52
2.10	Correlation Coefficients	53
2.10.1	Pearson Correlation Coefficient	54
2.10.2	Kendall Correlation Coefficient	58
2.10.3	Spearman Correlation Coefficient	59
2.11	Persistence/Nonrandomness	61
2.11.1	Short-Memory (Correlation) Components	61
2.11.2	Long-Memory (Persistence) Component	62
	References	65
3	Statistical Trend Tests	67
3.1	General	67
3.2	Nonparametric Tests	68
3.2.1	Data Ordering (Ranks)	69
3.3	Statistical Tests	70
3.3.1	Wald–Wolfowitz	70
3.3.2	Sign Test	70
3.3.3	Sign Difference Test	71
3.3.4	Run Test	72
3.3.5	Mann–Whitney (MW) Test	73
3.3.6	Kruskal–Wallis (KW) Test	79
3.3.7	Nonparametric Correlation Coefficient	83
3.3.8	Spearman’s Rho Test of Trend	84
3.3.9	Turning Point Test	85
3.3.10	Mann–Kendall (MK) Test	86
3.3.11	Two-Sample Wilcoxon Test	92
3.3.12	von Neuman Test	94
3.3.13	Cumulative Departures Test	95
3.3.14	Bayesian Test	97
3.3.15	Relative Error Test	98
3.3.16	t Test	99
3.3.17	Cramer Test	102
3.3.18	F Test	103
3.3.19	Truncation Test	106
3.3.20	Deviations Test	107
3.3.21	Subtraction Test	107
3.3.22	Şen Autorun Test	108
3.3.23	Seasonal Kendall Test	111

3.4	Unit Root Model Trend Determination	112
3.4.1	Integration and Dickey–Fuller (DF) Test	113
3.4.2	The Kwiatkowski, Phillips, Schmidt, and Shin Test	114
3.4.3	Critical Values of the KPSS Test	117
3.4.4	Empirical Power of the KPSS	118
3.4.5	Example: Comparison of the DF and KPSS Tests for Several Macro-Economic Time Series	121
3.5	Parametric Tests	124
3.5.1	Regression Analysis	126
3.5.2	Regression Line Assumptions	127
3.5.3	Goodness of Fit (R^2) for Regression	128
3.5.4	Cumulative Sum (CUSUM) Method	129
	References.	130
4	Temporal Trend Analysis	133
4.1	General.	133
4.2	Visual Inspection	135
4.3	Monotonic Trend Analysis	137
4.4	Scatter Diagrams and Regression Model.	138
4.5	Linear Regression Model	141
4.5.1	Statistical Procedure	142
4.6	Unrestricted Regression Model.	145
4.6.1	Application	147
4.7	Partial Regression Method (PRM)	148
4.8	Cluster Regression and Markov Chain	151
4.8.1	Cluster Regression Model	152
4.8.2	Application and Discussion	153
4.9	Trend Over-whitening Procedures.	159
4.9.1	Over-whitening (OW) Process.	160
4.9.2	Simulation	164
4.9.3	Application	165
	References.	173
5	Innovative Trend Analyses	175
5.1	General.	175
5.2	Probability Distribution-Statistical Parameter Trend Implications	177
5.3	Innovative Trend Identification Methodologies.	182
5.3.1	Application	184
5.4	Innovative Trend Simulation.	186
5.4.1	Fundamental Methodology	188
5.5	Innovative Trend Significance Test.	199
5.5.1	Deterministic Basis	200
5.5.2	Stochastic Basis.	202

5.5.3	Statistical Innovative Trend Test	204
5.5.4	Application	205
5.6	Crossing Trend Analysis Methodology	210
5.6.1	Rational Concept	212
5.6.2	Theoretical Background	212
5.6.3	Monte Carlo Simulations	215
5.6.4	Application	215
	References	225
6	Spatial Trend Analysis	227
6.1	General	227
6.2	Numerical Solution	230
6.3	Spatial Data Analysis	232
6.4	Homogeneity and Isotropy	235
6.5	Spatial Trend Surfaces	238
6.5.1	Horizontal Plane	240
6.5.2	Horizontal Planes	241
6.5.3	Inclined Trend Plane	241
6.5.4	Inclined Trend Planes	242
6.5.5	Curved Trend Surface	243
6.5.6	Random Surface	243
6.6	Spatial Dependence Function (SDF)	245
6.6.1	Spatial Correlation Parameter Calculation	247
6.7	Double Mass Curve Test	250
6.8	Trend Surface Analysis	254
6.8.1	Planer Trend Regression Analysis	254
6.8.2	Polynomial Trend Regression Analysis	257
6.8.3	Kriging Methodology	262
6.9	Triple Diagram Model (TDM)	271
6.9.1	Parallel-Triple Model	272
6.9.2	Serial-Triple Model	276
	References	280
7	Trend Variability Detection	281
7.1	General	281
7.2	Variability Measures	283
7.2.1	Range	283
7.2.2	Standard Deviation	284
7.2.3	The Interquartile Range (IQR)	286
7.2.4	Investment Variability	287
7.3	Trend and Variability Detection by Innovative Methodology	288
7.3.1	Methodology	289
7.3.2	Simulation Study	292
7.3.3	Applications	294
7.4	Trend Significance Limits	297

7.5	Trend and Variability Analyses by Innovative and Classical Methodologies	304
7.5.1	Şen Innovative Trend Analysis	305
7.6	Application and Interpretations	306
7.6.1	Probability Distribution Functions (pdf)	308
7.6.2	Different Trends	309
7.7	Trend and Variability	311
7.8	Innovative Trend Template and Significance Limits	314
	References.	317
8	Partial Trend Detection	321
8.1	General.	321
8.2	Qualitative Partial Trend Methodology	324
8.3	Previous Works	326
8.4	Innovative Piecewise Trend Analysis	330
8.5	Innovative Trend Template.	335
8.6	Stochastic Simulation Approach.	337
8.7	Data and the Study Area	341
8.7.1	Partial Trend Groups	341
8.7.2	Partial Trend Lines	342
	References.	345
	Index	347

Innovative Trend Methodologies in Science and
Engineering

Şen, Z.

2017, XIII, 349 p. 163 illus., 51 illus. in color., Hardcover

ISBN: 978-3-319-52337-8
