

Contents

1	Introduction	1
1.1	Carbon Offsets	1
1.2	Offset Markets	2
1.3	California’s Cap-and-Trade Program	3
1.4	Role of Offsets in California’s Cap-and-Trade Program	4
1.5	Cap-and-Trade Program Performance and Early Results	5
1.6	Comparison of Forest-Based Offset Protocols	7
2	Overview of the Compliance Offset Protocol for U.S. Forest Projects	13
2.1	Types of Forest Projects	13
2.2	Eligibility Requirements for Projects	14
2.3	Offset Principles	16
2.4	Monitoring, Reporting, and Verification	17
2.5	Commitments and Penalties	18
2.6	Project Timeline	19
3	Flow of Calculations for Quantifying Net GHG Reductions and Removals	21
3.1	Forest Offset Accounting Process	21
3.2	On-Site Carbon Stocks	22
3.3	Carbon Stored in Wood Products	23
3.4	Secondary Effects and Other Deductions	25
4	Adherence to Accounting Principles	29
4.1	Accounting Principles Supporting the Protocol Objectives	29
4.2	Application of Accounting Principles in the Forest Offset Protocol	33
4.2.1	Boundary Definitions	33
4.2.2	Determining Baselines and Additionality	34
4.2.3	Incorporating Leakage and Secondary Effects	35

4.2.4	Treatment of Temporal Boundaries and Ensuring Permanence.....	35
4.2.5	Treatment of Carbon Stored in Landfills from Harvested Wood Products	36
4.2.6	Penalties for Intentional Reversal	36
5	Challenging Issues.....	37
5.1	Boundary Issues.....	38
5.1.1	Political Domain	38
5.1.2	Property Rights	39
5.1.3	Leakage	41
5.2	Additionality and Baselines	42
5.2.1	On-Site Carbon Stock Baseline	43
5.2.2	Wood Products Baseline	44
5.3	Measurement and Quantification Challenges	45
5.3.1	Uncertainty in Scientific Estimation and Model Predictions.....	45
5.3.2	Incorporating Risk	45
5.3.3	What Is an Offset Ton?	47
5.4	Offset Credits from Wood Products.....	48
5.5	Participation Challenges	52
5.5.1	Cost Barriers	53
5.5.2	Property Size.....	54
5.5.3	Project Contract Length	55
5.5.4	Additional Market Barriers	56
6	Some Strategic Alternatives to Program Design, Management, and Implementation	57
6.1	Adopting a Program-Level Approach to Risk Management.....	57
6.2	A Market-Oriented Approach to Permanence and Additionality	58
6.3	Integrating Project Types into a Single Life-Cycle Methodology	59
7	Role of Forest Service Data and Methodologies.....	61
7.1	Developing an Inventory of Forest Project Carbon Stocks: ARB Appendix A	62
7.2	Modeling Carbon Stocks: ARB Appendix B	63
7.3	Estimating Carbon in Wood Products: ARB Appendix C.....	63
7.4	Determination of a Forest Project's Reversal Risk: ARB Appendix D.....	64
7.5	Reforestation Project Eligibility: ARB Appendix E	64
7.6	Determining a Value for Common Practice: ARB Appendix F	64
8	Conclusion and Recommendations	65
	References.....	69

Understanding and Analysis: The California Air
Resources Board Forest Offset Protocol
