

Contents

1	Introduction	1
1.1	Energy Sources in the Scale of the Universe	2
1.2	Energy Sources in the Scale of Mankind	5
1.3	Laws, Principles, and Physical Units	7
1.4	Food Energy	8
1.5	The Environmental Issues	10
1.6	Basic Tools for Processing and Display of Spatial and Temporal Data Dealing with Energy Assessment	18
1.6.1	Processing Spatial and Temporal Data in Spreadsheets	18
1.6.2	Development Kits for Data Visualization on Website	21
1.6.3	Statistical Programs	22
	Bibliography	26
2	Spatial and Temporal Analysis for Energy Systems	29
2.1	Energy Sources and Energy Consumption in the Scale of the Earth	29
2.2	Spatial Data Models in GIS	31
2.2.1	Representing of Spatial Data with Vectors	33
2.2.2	Representing of Spatial Data with Raster Datasets	35
2.2.3	Representing of Spatial Data with Triangulated Irregular Network	35
2.2.4	Other Data Structures in Spatial Models	35
2.3	Spatial Data Types	36
2.4	Coordinate Systems	39
2.5	Spatial and Temporal Modeling in GIS	41
2.6	Computer Systems for Spatial Data Management in GIS	46
2.7	GIS Tools for Processing and Presentation of Data Focused on Energy Sources	48
2.7.1	Web-Based Applications	51

2.7.2	GIS Projects	52
2.7.3	Development of Case-Oriented Software Applications	54
	Bibliography	59
3	Energy Outlook: Spatial and Temporal Mapping of Energy Sources Using GIS	61
3.1	Global Primary Energy Consumption	61
3.1.1	The Energy Outlook from EIA	67
3.1.2	The Energy Outlook from IEA	72
3.1.3	The Energy Outlook from EEA	76
3.2	Oil, Natural Gas, and Coal	82
3.3	Nuclear Energy	87
3.4	Hydroelectricity	90
3.5	Renewable Energy	91
3.6	Environmental Effects	94
3.7	Mapping Energy Sources Using GIS	99
3.7.1	Geodatabase Data Management	100
3.7.2	Spatial and Temporal Analysis	101
3.7.3	Display of Spatial and Temporal Data	102
	Bibliography	108
4	Energy from Fossil Fuels: Digital Mapping of Sources and Environmental Issues	111
4.1	Description of Fossil Fuels	111
4.1.1	Coal as an Energy Source	113
4.1.2	Oil as an Energy Source	117
4.1.3	Natural Gas as an Energy Source	125
4.2	Mapping of Fossil Sources with GPS and GIS	127
4.3	Mapping of Fossil Sources with Remote Sensing and GIS	133
4.4	Environmental Effects of Fossil Fuel Use	140
4.5	Integration of Spatial and Temporal Data in GIS	144
4.6	Spatial and Temporal Modeling with GIS	145
4.7	Case-Oriented Studies	151
4.7.1	Using GPS and Mobile GIS for Mapping of Fossil Fuels in a Local Scale	151
4.7.2	Mapping Surface Coal Mines in a Regional Scale with Landsat Images	153
4.7.3	Modeling of Coal Dust Dispersion in a Local Scale	158
	Bibliography	163
5	Hydropower: Assessment of Energy Potential and Environmental Issues in the Local and Global Scales	165
5.1	Description of Hydropower Sources	165
5.2	Potential Sources of Hydropower	169
5.2.1	Storage Hydropower	171
5.2.2	Pumped-Storage Hydropower	172
5.2.3	Run-of-River Hydropower	173

5.2.4	Tidal Hydropower	176
5.2.5	Wave Hydropower	178
5.2.6	Hydropower Based on Temperature and Salinity Gradients	178
5.3	Environmental Effects of Hydropower Installations	179
5.3.1	Land Use	180
5.3.2	Wildlife Impacts	181
5.3.3	Life Cycle Global Warming Emissions	182
5.4	Risk Assessment of Hydropower Plants with GIS	183
5.5	Case-Oriented Studies	186
5.5.1	Processing of Data About Hydropower Sources in GIS ...	187
5.5.2	Mapping Potential Sources for Small Hydropower Plants in the Basin	187
	Bibliography	193
6	Wind Power: Estimates of Energy Potential and Environmental Issues	195
6.1	Description of Wind Power Sources	195
6.2	Potential Sources of Wind Power	201
6.3	Environmental Effects of Wind Turbine Installations	209
6.4	Risk Assessment of Wind Turbines and Wind Farms with GIS ...	210
6.5	Case-Oriented Studies	213
6.5.1	Processing of Data About Wind Power Sources in GIS ...	213
6.5.2	Mapping Potential Sources for Wind Turbines	217
	Bibliography	219
7	Solar Energy: Estimates of Energy Potential and Environmental Issues	221
7.1	Description of Solar Energy Sources	221
7.2	Potential Sources of Solar Energy	228
7.3	Environmental Effects of Photovoltaic Power Plants	235
7.4	Risk Assessment of Photovoltaic Power Plants with GIS	238
7.5	Case-Oriented Studies	240
7.5.1	Processing of Data About Solar Energy in GIS	240
7.5.2	Mapping Potential Sources of Solar Energy in a Local Scale	240
	Bibliography	243
8	Biomass: Assessment of Bioenergy Potential Within Existing Energy Systems	245
8.1	Description of Bioenergy Sources	245
8.2	Potential Bioenergy Sources	250
8.3	Environmental Effects of Using Bioenergy Sources	252
8.4	Risk Assessment of Bioenergy Sources with GIS	259

8.5	Case-Oriented Studies	262
8.5.1	Processing of Data About Bioenergy in GIS	262
8.5.2	Mapping Potential Sources of Bioenergy in a Local Scale	262
	Bibliography	266
9	Nuclear Power: Historical Overview, Bright Side, and Environmental Issues	269
9.1	Description of Nuclear Power and Historical Overview	269
9.2	Mapping of Existing Power Plant Installations	277
9.3	Environmental Effects of Using Nuclear Energy	284
9.4	Risk Assessment of Nuclear Power Plants with GIS	286
9.5	Case-Oriented Studies	286
9.5.1	Risk Assessment of Operational Nuclear Installations and Their Global Environmental Impacts	286
9.5.2	Risk Assessment of Operational Nuclear Installations and Their Regional Environmental Impacts	287
	Bibliography	289
10	Energy Storage: Assessment of Selected Tools in Local and Global Scales	291
10.1	Electricity Transmission, Distribution, and Storage Systems	291
10.2	Energy Storage Principles	292
10.3	Environmental Effects of Using Selected Storage Systems	299
10.4	Case-Oriented Studies	301
10.4.1	Environmental Evaluation of Selected Energy Storage Installations for Electricity Grids	301
10.4.2	Mapping of Environmental Impacts with GIS for the Energy Storage Installation Kopswerk II	302
	Bibliography	308
11	Advanced Assessment Tools for Spatial and Temporal Analysis of Energy Systems	311
11.1	Integration of Spatial and Temporal Data in a Geodatabase	311
11.2	Assessment of Renewables by Multi-Criteria Analysis in the GIS Environment	312
11.2.1	Spatial Analysis and Modeling	313
11.2.2	Input Datasets for Assessment of Potential Energy Sources Using GIS	314
11.2.3	Spatial Data Processing and Multi-Criteria Analysis in the GIS Environment	315
11.2.4	Final Comments and Recommendations	321
	Bibliography	324

Assessment of Energy Sources Using GIS

Matejicek, L.

2017, XIV, 327 p. 314 illus., 296 illus. in color.,

Hardcover

ISBN: 978-3-319-52693-5
