

# Contents

<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Curves and Tangents</b>	7
2.1	Curves	7
2.2	Continuous Curves	45
2.2.1	Defining Continuity	45
2.2.2	Properties of Continuity	59
2.2.3	Peano's Space-Filling Curve	72
2.3	Smooth Curves	79
2.3.1	Traditional Views of Tangents	79
2.3.2	Isaac Barrow	90
2.3.3	Transition to Newton and Leibniz	98
2.3.4	Newton	99
2.3.5	Leibniz	109
2.3.6	Bumps in the Road	112
2.3.7	The Derivative Defined	123
<b>3</b>	<b>The Mean Value Theorem</b>	151
3.1	The Mean Value Theorem and Related Results	151
3.1.1	Variants of the Mean Value Theorem	151
3.1.2	The Mean Value Theorem and Integration	159
3.1.3	Applications of the Mean Value Theorem	168
3.2	Precursors to the Mean Value Theorem	180
3.2.1	Generalities	180
3.2.2	Conic Sections in Classical Greece	182
3.2.3	The Analytic Approach in Mediæval India	188
3.2.4	The Mean Speed Theorem in Mediæval Europe	216
3.2.5	Valerio and Cavalieri	222
3.2.6	Rolle	228
3.2.7	Taylor's Theorem	235

3.3	Lagrange and the Mean Value Theorem . . . . .	239
3.4	Transition to Cauchy: Ampère . . . . .	264
3.5	Cauchy and the Mean Value Theorem . . . . .	274
3.6	Bolzano and the Mean Value Theorem . . . . .	291
3.7	More Textbooks but No Progress . . . . .	312
3.8	Weierstrass, Bonnet, Serret, and the Mean Value Theorem . . . . .	333
3.9	Peano and the Mean Value Theorem . . . . .	351
3.10	Gilbert Revisited . . . . .	360
3.10.1	Gilbert's Final Words . . . . .	360
3.10.2	Thomas Flett and the Vindication of Gilbert . . . . .	364
3.10.3	Generalisations of the Mean Value Theorem . . . . .	375
3.11	Acker and the Mean Value Theorem . . . . .	381
3.12	Loose Ends . . . . .	386
3.12.1	Flett's Theorem . . . . .	386
3.12.2	Finding the Mean Value . . . . .	391
3.12.3	Complex Considerations . . . . .	405
3.12.4	An Anticlimax . . . . .	441
<b>4</b>	<b>Calculus Reform . . . . .</b>	<b>445</b>
4.1	The Great Debate . . . . .	445
4.2	Beyond Polemics . . . . .	465
4.3	Constructive Thoughts on the Subject . . . . .	469
	<b>Appendix A: Short Bibliography . . . . .</b>	<b>485</b>
	<b>Index . . . . .</b>	<b>489</b>
