

Contents

1	Introduction	1
1.1	Networked Control Systems	1
1.2	Signal Sampling	3
1.3	Signal Quantization	7
1.4	Communication Delay	10
1.5	Packet Dropouts	14
1.6	Medium Access Constraint	18
1.7	Wireless Communication	20
1.8	Overview of the Book	22
	References	24
2	Fundamentals	31
2.1	Mathematical Preliminaries	31
2.2	LTI Systems	32
2.3	Markovian Jump Systems	35
2.4	Switched Systems	40
2.5	Linear Matrix Inequalities	44
	References	48
3	H_∞ Filtering with Time-Varying Transmissions	51
3.1	Introduction	51
3.2	Problem Statement	51
3.3	Filter Analysis and Design	56
3.4	Illustrative Examples	62
3.5	Conclusions	66
	References	67
4	H_∞ Filtering with Energy Constraint and Stochastic Gain Variations	69
4.1	Introduction	69
4.2	Problem Formulation	69

4.3	Filter Analysis and Design	72
4.4	An Illustrative Example	78
4.5	Conclusions	81
	References.	81
5	H_∞ Filtering with Stochastic Signal Transmissions.	83
5.1	Introduction	83
5.2	Problem Formulation	83
5.3	Filter Analysis and Design	87
5.4	An Illustrative Example	91
5.5	Conclusions	95
	References.	96
6	H_∞ Filtering with Stochastic Sampling and Measurement Size Reduction	97
6.1	Introduction	97
6.2	Problem Formulation	97
6.3	Filter Analysis and Design	101
6.4	An Illustrative Example	106
6.5	Conclusions	109
7	Distributed Filtering with Communication Reduction	111
7.1	Introduction	111
7.2	Problem Formulation	112
7.3	Filter Analysis and Design	116
7.4	An Illustrative Example	122
7.5	Conclusions	127
	References.	128
8	Distributed Filtering with Stochastic Sampling	129
8.1	Introduction	129
8.2	Problem Formulation	129
8.3	Filter Analysis and Design	133
8.4	A Simulation Example	138
8.5	Conclusions	141
9	Distributed Filtering with Random Filter Gain Variations	143
9.1	Introduction	143
9.2	Problem Formulation	144
9.3	Filter Analysis and Design	147
9.4	A Simulation Example	151
9.5	Conclusions	154
	References.	154

10	Distributed Filtering with Measurement Size Reduction and Filter Gain Variations	155
10.1	Introduction	155
10.2	Problem Statement	155
10.3	Filter Analysis and Design	159
10.4	An Illustrative Example	164
10.5	Conclusions	168
11	Distributed Control with Controller Gain Variations	169
11.1	Introduction	169
11.2	Problem Formulation	169
11.3	Main Results	172
11.4	An Illustrative Example	175
11.5	Conclusions	179
	References	179
12	Distributed Control with Measurement Size Reduction and Random Fault	181
12.1	Introduction	181
12.2	Problem Formulation	181
12.3	Main Results	184
12.4	An Illustrative Example	190
12.5	Conclusions	197
	References	198
13	Distributed Control with Communication Reduction	199
13.1	Introduction	199
13.2	Problem Formulation	199
	13.2.1 Sampling	201
	13.2.2 Measurement Size Reduction	202
13.3	Main Results	204
13.4	An Illustrative Example	209
13.5	Conclusions	213
14	Distributed Control with Event-Based Communication and Topology Switching	215
14.1	Introduction	215
14.2	Problem Formulation	216
14.3	Main Results	220
14.4	A Simulation Study	226
14.5	Conclusions	232
	References	232

Filtering and Control of Wireless Networked Systems

Zhang, D.; Wang, Q.-G.; Yu, L.

2017, XI, 232 p. 80 illus., 50 illus. in color., Hardcover

ISBN: 978-3-319-53122-9
