

Contents

1	Introduction to Digital Simulation	1
	Idalia Flores De La Mota, Antoni Guasch and Miquel Angel Piera	
1.1	Introduction	1
1.2	Definition of Simulation	1
1.3	When to Use Simulation	2
1.4	Concepts of Systems	4
1.4.1	Construction by Composition	5
1.4.2	Construction by Decomposition	5
1.4.3	Definition of System	6
1.4.4	State of a System	6
1.5	Types of Models	8
1.5.1	Static Models Versus Dynamic Models	10
1.5.2	Deterministic Models Versus Stochastic (Probabilistic) Models	10
1.5.3	Continuous Models Versus Discrete Models	11
1.6	Advantages, Disadvantages and Risks of Simulation	11
1.7	Lifecycle of a Simulation Project	13
	References	17
2	Elements of Statistics for Simulation	19
	Idalia Flores De La Mota and Antoni Guasch	
2.1	Introduction	19
2.2	Generation of Random Numbers	23
2.3	Properties of a Good Random Number Generator	24
2.4	Generation of Random Numbers with a Uniform Distribution Between Zero and One	26
2.5	Selection of a Distribution Function	28
2.6	Continuous Distribution Functions	29
2.6.1	Exponential Distribution Function	30
2.6.2	Gamma Distribution Function	31
2.6.3	Log-Normal Distribution Function	32

2.6.4	Normal Distribution Function	32
2.6.5	Triangular Distribution Function	34
2.6.6	Uniform Distribution Function	34
2.6.7	Weibull Distribution Function	35
2.7	Discrete Distribution Functions.	37
2.7.1	Bernoulli Distribution Function	37
2.7.2	Discrete Uniform Distribution Function.	38
2.7.3	Binomial Distribution Function	38
2.7.4	Poisson Distribution Function	39
2.7.5	Geometric Distribution Function	40
2.8	Development of a Statistical Model	41
2.9	Statistical Analysis of the Simulation Results.	44
2.10	Conclusions	47
	References.	47
3	Modeling Discrete Event Systems Using Petri Nets.	49
	M. Narciso and M.A. Piera	
3.1	Introduction	49
3.2	Petri Nets	50
3.2.1	Description of Petri Nets	50
3.2.2	Formal Definition of Petri Nets	52
3.2.3	Behavior or Dynamics of Petri Nets	53
3.3	Development of Petri Net Models of Systems	55
3.4	Redundant Place Nodes	65
3.5	Limitations of Petri Nets.	66
3.6	Colored Petri Nets	66
3.6.1	Elements Involved in the Modeling of Colored Petri Nets.	67
3.6.2	Formal Definition of Colored Petri Nets	69
3.6.3	Behavior or Dynamics of Colored Petri Nets	70
3.7	Timed Colored Petri Nets	76
	References.	85
4	The Coupling of Coloured Petri Nets with SIMIO	87
	Miguel Mujica Mota	
4.1	Introduction	87
4.2	Review of the Methodology	88
4.3	SIMIO: Modelling Environment	88
4.3.1	Objects	90
4.3.2	Useful Elements for Implementation	90
4.4	SIMIO/Petri Nets Equivalence	92
4.4.1	Equivalence Between the Dynamics of SIMIO and the Coloured Petri Nets	92
4.4.2	Conditioned Events and Satisfaction of Constraints.	95
4.4.3	Modelling Synchrony	98

4.4.4	Modelling Parallelism	100
4.4.5	Modelling Processes	102
4.4.6	Modelling Queues	104
4.4.7	Shared Resources	105
4.4.8	Time Consumption	106
4.4.9	Insertion of Petri Net Transitions in SIMIO	107
4.5	Examples of Coloured Petri Net Implementation in SIMIO	109
4.5.1	Example 1: Boarding of Passengers at an Aircraft Cabin.	109
4.5.2	Example 2: Sequential Manufacturing System.	117
4.5.3	Modelling of Place Nodes in SIMIO.	119
4.5.4	Definition of Token Colours	121
4.5.5	Modelling Transitions	122
4.5.6	Time Consumption	125
4.5.7	Modelling Exit Arcs	127
4.5.8	Final Model.	128
4.6	Conclusion	129
	References.	130
5	Simulation Examples.	131
	Antoni Guasch and Jaume Figueras	
5.1	Introduction	131
5.2	Canal-Lock System.	132
5.3	Two-Robot and 5-Machine Process	137
5.4	The Philosophers' Dinner	142
5.5	Manufacturing Process	148
5.6	Automated Warehouse	156
	References.	162

Robust Modelling and Simulation

Integration of SIMIO with Coloured Petri Nets

De La Mota, I.F.; Guasch, A.; Mujica Mota, M.; Piera, M.A.

2017, XVII, 162 p. 112 illus., 70 illus. in color.,

Hardcover

ISBN: 978-3-319-53320-9
