

Contents

1	Solidification	1
1.1	The General Solidification Problem	1
1.2	Equations Describing the Solidification Problem	2
2	Solidification of PCMs	7
2.1	Heat Storage Based on the Solidification Process	7
2.1.1	Multidimensional Solidification Heat Transfer	8
2.1.2	Solutions of the Practical Solidification Problem	9
2.2	The Geometry of Outer PCMs	11
2.3	The Criterion for the Selection of Accumulator Design	12
3	The Model of Solidification of a Liquid with the Contact Layer	15
3.1	Equations Describing the Problem with the Contact Layer	15
3.2	Strict and Approximate Solution of the One-Dimensional Solidification Problem	18
3.2.1	Strict Solution of the One-Dimensional Solidification Problem	18
3.2.2	Approximate Solution of the One-Dimensional Solidification Problem	22
4	Solidification on a Rectangular Geometries	25
4.1	The Immovable Layer of Liquid Solidification	25
4.2	Forced Convection Effects	28
4.2.1	The Effect of the Boundary Layer on the Solidification Process	29
4.2.2	Solidification on a Plate with Variable Temperature	38
4.3	Free Convection Effect	45
4.3.1	Quasi-Stationary Convection in a Vertical Channel	46
4.3.2	Quasi-Stationary Convection in a Horizontal Channel	50
4.3.3	The Simplified Model of Convection with Solidification	55

5 Solidification in an Annular Space	63
5.1 The Solidification of a Non-heated Liquid	63
5.2 Solidification of a Superheated Liquid	67
5.2.1 Theoretical Solution of the Solidification Problem	68
5.2.2 The Beginning of a Solidification Process—Asymptotic Solution.	73
5.3 The Experiment	74
5.3.1 Research Equipment	74
5.3.2 The Course of the Experiment	74
5.3.3 The Results of the Research and Discussion	78
5.3.4 Conclusions.	82
6 Solidification of a Liquid Flowing into the Channel	83
6.1 The General Analysis	83
6.2 The Solidification of a Liquid Flowing into a Channel with Weakly Conducting Walls	87
6.3 The Solidification of a Liquid Flowing into a Channel with Conducting Walls	92
7 Role of the Contact Layer in a Solidification Process	97
7.1 Studies of the Thermal Contact Resistance	97
7.2 A Theoretical Analysis of Thermal Contact Resistance on the Basis of Experimental Investigations	101
7.2.1 Thermal Contact Resistance for Solidification on a Plate	101
7.2.2 Thermal Contact Resistance for Solidification on a Cylinder	103
7.3 Development of the Contact Layer During the Solidification Process	105
7.3.1 Development of Contact Layer and Its Role in Phase-Change Process on a Rectangular Plate	108
7.3.2 Development of a Contact Layer in Solidification on an Annular Surface	111
8 Phase Heat Accumulator	119
8.1 Selected Review of the Units Used for Heat Storage	119
8.2 Cooperation of the Heat Accumulator Storage with the Heat Pump	120
8.3 Example of Calculations	123
Summary	127
Annexe 1 (Zalba i in., 2003; Domański, Moszyński, 1983; and Others)	129
