Part I Fundamentals and Architecture of Internet of Things

Relay Technology for 5G Networks and IoT Applications	3
Abderrahmane BenMimoune and Michel Kadoch	
Two-Way Authentication for the Internet-of-Things	27
Corinna Schmitt, Thomas Kothmayr, Wen Hu and Burkhard Stiller	
Mobility Support and Service Discovery for Industrial Process Monitoring	57
Tuan Dang, Pascale Minet, Patrick Bellot, Christophe Mozzati and Erwan Livolant	
MAC Protocols in Body Area Network-A Survey	87
Manish Kumar and Mayank Dave	
Internet of Nano Things and Industrial Internet of Things	109
Hemdan Ezz El-Din and D.H. Manjaiah	

Part II Distributed Systems and Security in Internet of Things

Secure Distributed Group Rekeying Scheme for Cluster Based Wireless Sensor Networks Using Multilevel Encryption	127
Mohsen Yazdinejad, Faezeh Nayyeri, Omid Mahdi Ebadati E. and Nasim Afshari	
Recognizing Attacks in Wireless Sensor Network in View of Internet of Things	149
D.P. Acharjya and N. Syed Siraj Ahmed	
Wireless Sensor Network in Automation and Internet of Things	173
G.R. Sakthidharan and A. Punitha	
Challenges of Distributed Storage Systems in Internet of Things	193
Madhvaraj M. Shetty and D.H. Manjaiah	

Part III Challenges, Issues and Healthcare Applications of Internet of Things

Internet of Things Based Intelligent Elderly Care System 207

J. Arunnehr and M. Kalaiselvi Geetha

Challenges, Issues and Applications of Internet of Things 231

Madhvaraj M. Shetty and D.H. Manjaiah

Application of Technologies in Internet of Things 245

P. Geethanjali

Part IV Industry and Societal Applications of Internet of Things

An Appraisal on Human-Centered Internet of Things 263

A. Geetha and M. Kalaiselvi Geetha

**A Survey on Internet of Things: Case Studies, Applications,
and Future Directions** 281

Kalavathy Perumal and Murali Manohar

Internet of Things in Cloud Computing 299

Hemdan Ezz El-Din and D.H. Manjaiah

Internet of Things: Novel Advances and Envisioned
Applications
