

Contents

1	The Properties of Refractory and Heat Insulation Materials	1
1.1	Classifications and Some Words About Quality Control	1
1.2	Density, Porosity, and Related Characteristics; Types of Porosity	6
1.3	Mechanical Characteristics	13
1.3.1	Compressive and Bending Strength	13
1.3.2	Elasticity Modulus, Hardness, and Weibull Modulus	18
1.3.3	Elements of Fracture Mechanics	23
1.4	Thermomechanical Properties	26
1.4.1	Refractoriness	26
1.4.2	Hot Modulus of Rupture	30
1.4.3	Reheat Change: Permanent Linear Change on Reheating	30
1.4.4	High-Temperature Deformation: Characteristic Points and Softening Point	32
1.4.5	Creep	34
1.5	Thermal Conductivity, Heat Capacity, and Temperature Conductivity (Heat Diffusivity)	35
1.5.1	Elements of Theory	37
1.5.2	Measurement of Thermal Conductivity	44
1.5.3	Methods of Thermal Conductivity Measurements Based on Principle of Stationary Heat Flow	45
1.5.4	Methods of Thermal Conductivity Measurements Based on Principle of Nonstationary Heat Flow (Dynamic Methods)	46
1.6	Thermal Coefficient of Linear Expansion, Thermal Strains, and Thermal Shock Resistance	47
1.6.1	Thermal Coefficient of Linear Expansion	47
1.6.2	Thermal Expansion of Refractory and Heat Insulation Materials: Elements of Theory	48

1.6.3	Measurement of Linear Coefficients of Thermal Expansion	51
1.6.4	Thermal Strains	52
1.6.5	Thermal Shock	54
1.6.6	Thermal Shock Factors	56
1.6.7	Thermal Shock Resistance Measurements	57
1.7	Corrosion Resistance	58
1.7.1	Elements of Theory	60
1.7.2	Tests	66
	References	68
2	Refractories and Carbon Cathode Materials for Aluminum Reduction Cells	75
2.1	Aspects of Aluminum Reduction	75
2.2	Lining of Reduction Cells; Preheating, Startup, and Operation; Retrofit of Cells and Trends; Main Causes of Failures; Dry Autopsies	85
2.2.1	Brief Discussion on Reduction Cell Linings	85
2.2.2	Preheating and Startup of Reduction Cells	91
2.2.3	Service Life and the Main Causes for Shutdowns	94
2.2.4	Dry Autopsies	97
2.3	Carbon Cathode Bottom Blocks	100
2.3.1	Types and Properties	100
2.3.2	Elements of Technology, Raw Materials, and Processing	102
2.3.3	Defects in Carbon Cathode Blocks	120
2.3.4	Testing and Characterization	126
2.3.5	Grades of Carbon Cathode Blocks	131
2.3.6	Structure of Carbon Cathode Blocks in Connection with Grain Size Composition, Sintering, and Pore Size Structure	133
2.3.7	Interaction of Carbon Cathode Blocks with Steel Shell and Collector Bars	135
2.3.8	Interaction of Carbon Cathode Blocks with Electrolyte During Startup and in Service: Wear, Infiltration	139
2.3.9	Carbon Ramming Paste	149
2.4	Coatings of Carbon Cathode Blocks and New Cathode Materials	159
2.5	Side Lining Materials	166
2.5.1	Carbon Side Linings and the Causes of Their Decay	167
2.5.2	SiC Side Lining	170
2.5.3	Variants of SiC Materials (and Others) as a Side Lining	172
2.5.4	SiC Mortars, Ramming Mixes, and Castables for Installation of SiC Side Lining	193

2.6	Refractory Barrier Materials of Cell Lining. Dry Barrier Mixes and Bricks. Properties and Chemical Resistance. Processes During Service. Interactions with Infiltrated Electrolyte. Change of Properties. Lenses	197
2.6.1	Bricks and Dry Barrier Mixtures	197
2.7	Heat Refractory Insulation Materials for Reduction Cell Linings	209
2.7.1	Diatomaceous (Moler) Heat Insulation Materials	210
2.7.2	Perlite-Based Heat Insulation Materials	211
2.7.3	Vermiculite-Based Heat Insulation Materials	211
2.7.4	Calcium Silicate Heat Insulation Materials	213
2.7.5	Thermal Aging of Heat Insulation Materials at Service and Thermal Conductivity of Infiltrated Heat Insulation Materials	216
	References	219
3	Refractories and Heat Insulation Materials for Cast Houses	229
3.1	Cast House	229
3.2	Physical and Chemical Interaction of Refractories with Aluminum and Aluminum Alloys	231
3.2.1	Chemical Interaction of Aluminum and Aluminum-Based Alloys with Components of Refractories	231
3.2.2	Antiwetting Admixtures to Alumina Silica Refractories	235
3.2.3	Wetting of Alumina Silica Refractories by Molten Aluminum and Aluminum Alloys	237
3.2.4	Some Words on Corrosion Mechanism	238
3.2.5	Tests for Corrosion Resistance	242
3.3	Refractory Materials	243
3.4	Elements of Lining Design	249
3.4.1	Some Words on Drying and Preheating of Furnaces	250
3.5	Melting and Holding Furnaces	254
3.6	Induction Furnaces, Ladles	257
3.6.1	Ladles	259
3.7	Launders (Runners), Casting Equipment: Elimination of Asbestos-Containing Materials	259
3.7.1	Casting Equipment (Tooling)	261
3.7.2	Ceramic Foam Filters	263
3.8	Considerations on Future Trends: Physical Chemistry of Technical Engineering Improvements?	263
	References	264

4 Refractories for Anode Baking Furnaces	267
4.1 Lining	267
References	271
Glossary	273

Refractories for Aluminum

Electrolysis and the Cast House

Yurkov, A.

2017, XIV, 278 p. 183 illus., 78 illus. in color., Hardcover

ISBN: 978-3-319-53588-3
