

Contents

- 1 Introduction: Climate Overview** 1
 - 1.1 Weather and Climate 2
 - 1.2 Solar Radiation and Climate 3
 - 1.2.1 Radiation Balance of Earth and Atmosphere 4
 - 1.3 Greenhouse Effect 7
 - 1.3.1 The Natural Greenhouse Effect 7
 - 1.3.2 Discovery of the Science of Greenhouse Effect 10
 - 1.3.3 Enhanced Greenhouse Effect 11
 - 1.4 Natural Versus Anthropogenic Climate Change 14
 - 1.4.1 Climate System 14
 - 1.4.2 Climate Change 19
 - 1.5 Conclusions 22
 - References 22
- 2 Variability and Change in Climate** 27
 - 2.1 Introduction 28
 - 2.2 Radiative Forcing 31
 - 2.3 Detection and Attribution of Climate Change 35
 - 2.4 Climate Change 37
 - 2.4.1 Signs of Changing Climate 41
 - 2.4.2 Climate Change Metrics 47
 - 2.5 Conclusions 52
 - References 53
- 3 Introduction to Global Carbon Cycling: An Overview of the Global Carbon Cycle** 61
 - 3.1 Introduction 62
 - 3.2 Photosynthesis and Respiration 64
 - 3.3 Timescales and Modes of the Carbon Cycle 65

3.4	Introduction to Carbon Budget	66
3.4.1	Changes in Atmospheric Carbon Dioxide and Methane Concentrations	67
3.4.2	Impacts of Changing Global Carbon Cycle	68
3.5	Global Warming	72
3.6	Conclusion	73
	References.	73
4	The Global Carbon Inventory	77
4.1	Introduction	78
4.2	Atmospheric Carbon Inventory	80
4.2.1	Carbon Dioxide	80
4.2.2	Methane.	82
4.2.3	Other Trace Compounds	83
4.2.4	Sinks	84
4.3	Carbon Inventory of the Biosphere and Soils	86
4.4	Carbon Inventory of the Oceans	89
4.5	Carbon Inventory of the Lithosphere	93
4.6	Conclusions	96
	References.	97
5	Historical Perspectives of the Global Carbon Cycle	103
5.1	Introduction	104
5.2	Mechanisms of Geologic Carbon Cycling.	107
5.2.1	Timescales of Carbon Cycling.	107
5.2.2	The Carbonate Weathering-Sedimentation	113
5.2.3	The Organic Carbon Production-Consumption Oxidation Cycle.	113
5.3	Geologic Carbon Cycling Evidence from Geological Proxy Data	115
5.4	Precambrian History of Carbon Cycling	121
5.5	Carbon Cycling During Phanerozoic.	122
5.6	Carbon Cycling During Cenozoic.	123
5.6.1	Carbon Cycling and Climate of the Early Cenozoic	123
5.6.2	Carbon Cycling and Climate of the Warmer Greenhouse World.	124
5.6.3	Paleocene-Eocene Thermal Maximum Event.	126
5.7	Carbon Cycling and Climate of the Cool Icehouse World	130
5.7.1	Transition to Glaciation in Northern Hemisphere	130
5.7.2	Carbon Cycle Variations During Glacial-Interglacial Cycles	134
5.8	The Last Glacial Termination and Holocene Carbon Cycle Variations	142

5.9	Carbon Cycling During the Most Recent Past	144
5.10	Conclusions	146
	References.	146
6	The Modern Carbon Cycle.	163
6.1	Introduction	164
6.2	Natural Global Carbon Cycle Before the Anthropogenic Influence.	168
6.2.1	Atmospheric Carbon Dioxide Concentration	169
6.2.2	Natural Fluxes of Carbon	169
6.3	Anthropogenic Perturbations to the Global Carbon Cycle.	177
6.3.1	Carbon Dioxide Emissions	178
6.3.2	Anthropogenic Fluxes of Carbon.	195
6.4	The Global Carbon Budget.	207
6.5	Conclusions	209
	References.	210
7	Historical and Contemporary Global Methane Cycling	227
7.1	Introduction	228
7.2	Atmospheric Methane.	232
7.2.1	Variability of Methane Concentration During Glacial- Interglacial Cycles.	233
7.2.2	Methane Concentrations During Holocene.	235
7.2.3	Methane Concentration During the Industrial Era	238
7.3	Global Methane Budget	241
7.3.1	Methane Sources	244
7.3.2	Methane Sinks.	253
7.4	Contemporary Global Methane Budget.	253
7.5	Atmospheric Chemistry of Methane	255
7.6	Biological Aspects of Methanogenesis	260
7.6.1	Methane Oxidation in Soils.	262
7.6.2	Methane Oxidation in Marine Environments.	263
7.6.3	Methane Oxidation in the Atmosphere	264
7.7	Methane Clathrate Hydrates	265
7.7.1	Origin and Formation of Methane Hydrates	266
7.7.2	Methane Hydrate Reservoir.	266
7.7.3	Methane Hydrate Decomposition Climate Change.	268
7.7.4	How Can We Estimate the Rate of Methane Clathrate Decomposition?.	269
7.8	Conclusions	270
