

Contents

1	Consciousness, Crosstalk, and the Mereological Fallacy	1
1.1	Introduction.....	1
1.2	Some Cognitive Global Broadcasts	3
1.3	Animal Consciousness	8
1.4	Cognition as “Language”	10
1.5	No Free Lunch.....	12
1.6	Multiple Broadcasts, Punctuated Detection	15
1.7	Metabolic Constraints	16
1.8	Environmental Signals	17
1.9	Dynamic “Regression Models”	18
1.10	Phase Transition Approaches	22
1.11	The Rate Distortion Approach.....	25
1.12	Discussion and Conclusions	30
	References.....	32
2	Cultural Epigenetics: On the Missing Heritability of Complex Diseases	37
2.1	Introduction.....	37
2.2	A Cognitive Paradigm for Gene Expression	41
2.3	Models of Development.....	42
2.4	Tunable Epigenetic Catalysis	46
2.5	The Groupoid Free Energy	48
2.6	“Phase Change” and the Developmental Holonomy Groupoid in Phenotype Space	51
2.7	Holonomy on the Manifold of Dual Information Sources.....	53
2.8	Rate Distortion Models	57
2.9	Expanding the Mathematical Approach.....	63
2.10	Discussion	64
	References.....	66

3	Western Atomism and Its Culture-Bound Syndromes	71
3.1	Introduction	71
3.2	Western Atomistic Economics	73
3.3	Cognition as an Information Source	75
3.4	Environment as an Information Source	78
3.5	Interacting Information Sources	80
3.6	Crosstalk Topologies	81
3.7	Punctuated Critical Phenomena	82
3.8	Discussion and Conclusions	84
	References	86
4	Environmental Induction of Neurodevelopmental Disorders	89
4.1	Introduction	89
4.2	A Control Theory Model	92
4.3	A “Cognitive” Model	96
4.4	The Mitochondrial Connection	99
4.5	Discussion and Conclusions	100
	References	102
5	Sleep, Psychopathology, and Culture	105
5.1	Introduction	105
5.2	Reaction Rate	107
5.3	The Data Rate Theorem	110
5.4	Rate Distortion Dynamics	111
5.5	The Sleep Cycle: An Optimization Model	114
5.6	Transition Dynamics	117
5.7	Cultural Catalysis of the Sleep Cycle	118
5.8	Environmental Induction of Sleep Disorders	119
5.9	Chronic Dysfunctions of the Sleep Cycle	121
5.10	Discussion and Conclusions	124
	References	126
6	Embodied Cognition and Its Disorders	129
6.1	Introduction	129
6.2	The Data Rate Theorem	131
6.3	Cognition as an Information Source	132
6.4	Environment as an Information Source	135
6.5	Body Dynamics and Culture as Information Sources	136
6.6	Interacting Information Sources	137
6.7	Simple Regulation	139
6.8	Extending the Data Rate Theorem	140
6.9	Another Picture	142
6.10	Large Deviations and Epileptiform Disorders	144
6.11	Ground State Collapse 1: Anxiety/Depression Analogs	145
6.12	Ground State Collapse 2: Obsessive Compulsive Disorders	146

6.13	Topological Dysfunctions: Autism Spectrum and Schizophreniform Analogs	147
6.14	Discussion and Conclusions	148
	References	150
7	Tools for the Future: Hidden Symmetries	153
7.1	Introduction	153
7.2	The Cognitive Paradigm for Gene Expression	155
7.3	The Group Structures of Information Processes	157
7.4	The Topology of “Code Networks”	158
7.5	Expanding the Model	160
7.6	Developmental Canalization and Directed Homotopy	162
7.7	Discussion	163
	References	164
8	Psychopathologies of Automata I: Autonomous Vehicle Systems	167
8.1	Introduction	167
8.2	Central Problems	168
8.3	Data Rate Theorem	172
8.4	Multimodal Traffic on Bad Roads	174
8.5	The Dynamics of Service Collapse	175
8.6	Multiple Phases of Dysfunction	177
8.7	Turbulence	179
8.8	Reconsidering Network Flow	181
8.9	Directed Homotopy	184
8.10	Discussion and Conclusions	186
	References	188
9	Psychopathologies of Automata II: Autonomous Weapons and Centaur Systems	191
9.1	Introduction	191
9.2	The Data Rate Theorem	192
9.3	The Fog-of-War Ecosystem	194
9.4	The Dynamics of Control Failure	195
9.5	The Dynamics of High-Level Cognitive Dysfunction	197
9.6	Discussion and Conclusions	199
	References	199
10	The Dynamics of Environmental Insult	201
10.1	Introduction	201
10.2	Institutional Evolution	204
10.3	Discussion and Conclusions	207
	References	208

11 Social Psychopathology: Military Doctrine and the Madness of Crowds	209
11.1 Introduction	209
11.2 A Control Theory Model	211
11.3 A Cognitive Model	215
11.4 Discussion and Conclusions	218
References	219
12 Mathematical Appendix	221
12.1 Groupoids	221
12.2 The Tuning Theorem	222
12.3 Metabolic Constraints	226
12.4 Morse Theory	227
12.5 An RDT Proof of the DRT	229
12.6 An Information Black–Scholes Model	231
12.7 Estimating the Quadratic Variation from Data	232
12.8 A Metabolic Black–Scholes Model	232
References	233
Index	235

Computational Psychiatry

A Systems Biology Approach to the Epigenetics of
Mental Disorders

Wallace, R.

2017, XII, 236 p. 31 illus., Hardcover

ISBN: 978-3-319-53909-6
