

# Contents

## Use Case Models

Incremental Reconfiguration of Product Specific Use Case Models for Evolving Configuration Decisions . . . . .	3
<i>Ines Hajri, Arda Goknil, Lionel C. Briand, and Thierry Stephany</i>	
Aligning the Elements of the RUP/UML Business Use-Case Model and the BPMN Business Process Diagram . . . . .	22
<i>Yves Wautelet and Stephan Poelmans</i>	

## Ecosystems and Innovation

Modeling and Analyzing Openness Trade-Offs in Software Platforms: A Goal-Oriented Approach. . . . .	33
<i>Mahsa H. Sadi and Eric Yu</i>	
A Contribution Management Framework for Firms Engaged in Open Source Software Ecosystems - A Research Preview. . . . .	50
<i>Johan Linåker and Björn Regnell</i>	

## Human Factors in Requirements Engineering

Defect Prevention in Requirements Using Human Error Information: An Empirical Study. . . . .	61
<i>Wenhua Hu, Jeffrey C. Carver, Vaibhav Anu, Gursimran Walia, and Gary Bradshaw</i>	
Requirements Quality Assurance in Industry: Why, What and How? . . . . .	77
<i>Michael Unterkalmsteiner and Tony Gorschek</i>	
The Impact of Specification Structure on Human Memory Performance - Experiences from a First Experiment. . . . .	85
<i>Kim Lauenroth, Erik Kamsties, and Tim Pfeiffer</i>	

## Goal-Orientation in Requirements Engineering

How Can You Improve Your As-Is Models? Requirements Analysis Methods Meet GQM . . . . .	95
<i>Shoichiro Ito, Shinpei Hayashi, and Motoshi Saeki</i>	
Integrating Goal Model Analysis with Iterative Design . . . . .	112
<i>Claudio Menghi, Paola Spoletini, and Carlo Ghezzi</i>	

## Communication and Collaboration

Patterns of Collaboration Driven by Requirements in Agile Software Development Teams: Findings from a Multiple Case Study . . . . .	131
<i>Irum Inayat, Sabrina Marczak, Siti Salwah Salim, and Daniela Damian</i>	
Common Mistakes of Student Analysts in Requirements Elicitation Interviews . . . . .	148
<i>Beatrice Donati, Alessio Ferrari, Paola Spoletini, and Stefania Gnesi</i>	

## Process and Tool Integration

How Can Quality Awareness Support Rapid Software Development? – A Research Preview . . . . .	167
<i>Liliana Guzmán, Marc Oriol, Pilar Rodríguez, Xavier Franch, Andreas Jedlitschka, and Markku Oivo</i>	
Using Tags to Support Feature Management Across Issue Tracking Systems and Version Control Systems: A Research Preview . . . . .	174
<i>Marcus Seiler and Barbara Paech</i>	
From Requirements Monitoring to Diagnosis Support in System of Systems . . . . .	181
<i>Michael Vierhauser, Rick Rabiser, and Jane Cleland-Huang</i>	

## Visualization and Representation of Requirements

On the Equivalence Between Graphical and Tabular Representations for Security Risk Assessment . . . . .	191
<i>Katsiaryna Labunets, Fabio Massacci, and Federica Paci</i>	
Visualization of Quality of Software Requirements Specification Using Digital Elevation Model . . . . .	209
<i>Diding Adi Parwoto, Takayuki Omori, Hiroya Itoga, and Atsushi Ohnishi</i>	

## Agile Requirements Engineering

Quality Requirements in Large-Scale Distributed Agile Projects – A Systematic Literature Review . . . . .	219
<i>Wasim Alsaqaf, Maya Daneva, and Roel Wieringa</i>	
Improving User Story Practice with the Grimm Method: A Multiple Case Study in the Software Industry . . . . .	235
<i>Garm Lucassen, Fabiano Dalpiaz, Jan Martijn E.M. van der Werf, and Sjaak Brinkkemper</i>	

## **Natural Language Processing, Information Retrieval and Machine Learning**

Semi-automatic Software Feature-Relevant Information Extraction from Natural Language User Manuals: An Approach and Practical Experience at Roche Diagnostics GmbH . . . . .	255
<i>Thomas Quirchmayr, Barbara Paech, Roland Kohl, and Hannes Karey</i>	

Mining User Requirements from Application Store Reviews Using Frame Semantics . . . . .	273
<i>Nishant Jha and Anas Mahmoud</i>	

## **Traceability**

Using Interaction Data for Continuous Creation of Trace Links Between Source Code and Requirements in Issue Tracking Systems. . . . .	291
<i>Paul Hübner and Barbara Paech</i>	

A Requirements Traceability Approach to Support Mission Assurance and Configurability in the Military . . . . .	308
<i>James Lockerbie, Neil Maiden, Chris Williams, and Leigh Chase</i>	

## **Quality of Natural Language Requirements**

On the Ability of Lightweight Checks to Detect Ambiguity in Requirements Documentation . . . . .	327
<i>Martin Wilmlink and Christoph Bockisch</i>	

Using NLP to Detect Requirements Defects: An Industrial Experience in the Railway Domain . . . . .	344
<i>Benedetta Rosadini, Alessio Ferrari, Gloria Gori, Alessandro Fantechi, Stefania Gnesi, Iacopo Trotta, and Stefano Bacherini</i>	

## **Research Methodology in Requirements Engineering**

Specifying Software Requirements for Safety-Critical Railway Systems: An Experience Report . . . . .	363
<i>Luciana Provenzano and Kaj Hänninen</i>	

Usefulness of a Human Error Identification Tool for Requirements Inspection: An Experience Report . . . . .	370
<i>Vaibhav Anu, Gursimran Walia, Gary Bradshaw, Wenhua Hu, and Jeffrey C. Carver</i>	

<b>Author Index</b> . . . . .	379
