1	Introduction	1
	Arno Behr and Andreas J. Vorholt	
1.1	Advantages of Homogeneous Catalysis in Derivatisation of Renewables	1
1.2	Introduction into the Chemistry of Renewables	3
1.3	Introduction into the Main Groups of Renewables	5
1.3.1	Oleochemicals	5
1.3.2	Terpenes	7
1.3.3	Carbohydrates	10
1.3.4	Lignin	13
1.3.5	Peptides	14
1.3.6	Carbon Dioxide	15
	References	17
2	Hydrogenation of Renewables	21
	Andreas J. Vorholt and Arno Behr	
2.1	Introduction	21
2.2	Hydrogenations of Carbon Dioxide	22
2.2.1	Interconversion of CO ₂ /Formic Acid as Hydrogen Storage	27
2.2.2	Methanol	28
2.3	Lignin	30
2.4	Sugars	34
2.5	Fats	35
2.6	Conclusions	37
	References	37
3	Hydroformylation of Renewables	41
	Tom Gaide, Arno Behr and Andreas J. Vorholt	
3.1	Introduction	41
3.1.1	Mechanisms	41

3.1.2	Side Reactions	43
3.1.3	Catalyst Development in Industrial Hydroformylation Processes	45
3.2	Oleocompounds in Hydroformylation	46
3.2.1	Catalyst Development	46
3.2.2	Catalyst Recycling	49
3.2.3	Applications	53
3.3	Terpenes and Naturally Occurring Allylbenzenes	55
3.3.1	Catalyst Development	55
3.3.2	Catalyst Recycling	60
3.4	Conclusions	62
	References	62
4	Amination of Renewables	65
	S. Fuchs, H. Warmeling, Arno Behr and Andreas J. Vorholt	
4.1	Introduction	65
4.2	Carbohydrates	68
4.2.1	5-Hydroxymethylfurfural (HMF)	69
4.2.2	Levulinic Acid	69
4.2.3	Oils and Fats—Fatty Acid Esters	72
4.2.4	Terpenes	75
4.2.5	Myrcene	75
4.2.6	Citronellal	76
4.3	Conclusion	78
	References	78
5	Telomerisation of Renewables	81
	T.A. Faßbach, Arno Behr and Andreas J. Vorholt	
5.1	Introduction	81
5.2	Telomerisation Using Renewable Dienes	83
5.3	Telomerisation Using Renewable Nucleophiles	84
5.3.1	Lignin-Derived Phenols	84
5.3.2	Renewable Polyols	85
5.3.3	Telomerisation with CO ₂	88
5.4	Conclusion	89
	References	89
6	Oxidation of Renewables	93
	Sabrina Baader and Melanie Kim Müller	
6.1	Introduction	93
6.2	Fatty Acids and Fatty Acid Derivatives	95
6.3	Terpenes and Terpene Alcohols	100
6.4	Lignin and Phenylpropanoids	102
6.5	Conclusions	103
	References	104

7 Tandem Reactions with Renewables	107
T. Seidensticker, K.A. Ostrowski and Andreas J. Vorholt	
7.1 Introduction	107
7.2 Tandem Reactions with Metathesis	110
7.2.1 Cross-Metathesis	110
7.2.2 Intramolecular Ring-Closing Metathesis	112
7.3 Tandem Reactions with Hydroformylations	112
7.3.1 Hydroformylation/Hydrogenation	113
7.3.2 Hydroformylation and C–O Bond Formation	114
7.3.3 Hydroformylation and C–C Bond Formation	118
7.3.4 Hydroaminomethylation for C–N Bond Formation	121
7.3.5 Alternative Syngas Resources for Hydroformylation	126
7.4 Defunctionalisation—Overcoming Over-Functionalisation	131
7.4.1 Decarbonylative Dehydration	131
7.4.2 Glycerol Degradation	135
7.5 Isomerising Tandem Catalyses	136
7.5.1 Isomerising Metathesis	137
7.5.2 Isomerising Hydroformylation	139
7.5.3 Isomerising Hydroboration	141
7.5.4 Isomerising Trialkylsilylation	143
7.5.5 Isomerising Lactonisation	143
7.5.6 Isomerising Michael-Reactions	144
7.5.7 Isomerising Decarboxylation	145
7.5.8 Isomerising Transfer Hydrogenation	146
7.5.9 Isomerising Alkoxycarbonylations	146
References	150
8 Continuously Operated Telomerisations with Renewables in Miniplants	155
Arno Behr and Andreas J. Vorholt	
8.1 Telomerisation of Butadiene with Carbon Dioxide	156
8.2 Telomerisation of Butadiene with Glycerol	159
8.3 Telomerisation of Butadiene with Sucrose	160
References	161
9 Continuously Operated Cooligomerisation of Fatty Compounds with Ethylene	163
J. Hasselberg, Arno Behr and Andreas J. Vorholt	
9.1 Introduction	163
9.1.1 Cooligomerisation of Fatty Compounds with Ethylene	164
9.2 Batch Investigations	164
9.2.1 Conjugation and Cooligomerisation in Laboratory Scale	164
9.2.2 Catalyst Recycling	166

9.2.3	Catalyst Leaching	167
9.2.4	Application of Ligands	167
9.3	Miniplant Investigations	169
9.3.1	Miniplant Concept for Continuous Operation	169
9.3.2	Miniplant Equipment	170
9.3.3	Miniplant Operation in Continuous Manner	172
9.3.4	Hydrogenation	173
9.3.5	Optimised Miniplant Concept	173
	References	176
10	Hydroamination and Telomerisation of β-Myrcene	177
	T. Färber, Arno Behr and Andreas J. Vorholt	
10.1	Introduction	177
10.2	Laboratory Experiments	179
10.2.1	Control of Reaction Pathways	179
10.2.2	Catalyst Recycling	181
10.3	Miniplant Investigations	182
10.3.1	Choice of Reactor	182
10.3.2	The Taylor-Couette Reactor	182
10.3.3	Design Aspects and Construction	184
10.3.4	Batch Experiments	185
10.3.5	Miniplant Concept	186
10.3.6	Continuous Experiments	187
10.4	Conclusion and Outlook	188
	References	189
11	Continuously Operated Hydroformylation	191
	J. Dreimann, Arno Behr and Andreas J. Vorholt	
11.1	Introduction	191
11.2	Batch Investigations: Catalyst Screening and Catalyst Recycling	192
11.3	Miniplant Process	195
11.3.1	Hydroformylation of Renewables in a Continuous Process	200
11.4	Conclusions	202
	References	203
12	Future Developments in Homogenous Catalysis with Renewables	205
	Arno Behr and Andreas J. Vorholt
