

Contents

1	Introduction	1
1.1	Traffic Growth and First Mile Evolution	1
1.1.1	DSL Technologies	5
1.1.2	Cable Technology	8
1.1.3	BPL (Broadband Power Line) Technology	13
1.1.4	FTTH Technology	16
1.1.5	Wireless Broadband	21
1.2	Next-Generation Networks and Service Evolution	28
2	Quality of Service Implementation	35
2.1	QoS Definition	35
2.2	QoS Parameters	36
2.3	QoS Implementation	40
2.3.1	IntServ Model	41
2.3.2	DiffServ Model	46
2.4	QoS Mechanisms	54
2.4.1	Classification	54
2.4.2	Scheduling Mechanism	57
2.4.3	Network Provisioning	66
3	PON Evolution	67
3.1	PON Development	67
3.2	TDM PON	72
3.2.1	ATM PON (APON)	74
3.2.2	Gigabit PON (GPON)	78
3.2.3	Ethernet PON (EPON)	89
3.2.4	Comparison of BPON, GPON, and EPON Technologies	95
3.3	WDM PON	98

4	Single-Channel EPON	101
4.1	Introduction	101
4.2	Characteristics of the MPCP Protocol	101
4.2.1	MPCP Control Frames	103
4.2.2	Autodiscovery Mode	106
4.2.3	Bandwidth Assignment Mode (Normal Mode)	108
4.2.4	RTT Measurement and MPCP Timing Model	110
4.2.5	Logical Topology Emulation	113
4.2.6	Final MPCP Deployment	114
4.3	EPON Transmission	116
4.3.1	Downstream Transmission	117
4.3.2	Upstream Transmission	117
4.4	Dynamic Bandwidth Allocation in EPON	120
4.4.1	Review of the DBA Algorithms	121
4.5	QoS Support in EPON	127
4.5.1	Traffic Classification	129
4.5.2	Inter-ONU Scheduling	130
4.5.3	Intra-ONU Scheduling	131
4.6	Algorithms for QoS Support in EPON	133
4.6.1	DBA for Multimedia Services Over Ethernet PONs	133
4.6.2	IPACT Extension to Multiple Service Classes	134
4.6.3	DBA for the QoS Model	135
4.6.4	Hybrid Granting Protocol with Priority-Based Scheduling (HG(PBS))	136
5	Multichannel EPON	143
5.1	Introduction	143
5.2	Network Architecture	145
5.2.1	Point-to-Multipoint WDM EPON	148
5.2.2	Logical Structure of the OLT	150
5.2.3	Logical Structure of the ONU	151
5.3	Information Exchange	152
5.4	MPCP Extensions	152
5.4.1	Wavelength Band Announcement	154
5.4.2	Upstream Coordination	156
5.4.3	Downstream Coordination	158
5.5	WDM EPON Resource Allocation	159
5.6	Separate Time and Wavelength Assignment	160
5.6.1	Static Wavelength Allocation	160
5.6.2	Dynamic Wavelength Allocation	160
5.7	Joint Time and Wavelength Allocation	161
5.7.1	Offline Scheduling	163
5.7.2	Online Scheduling	163
5.8	Review of the Related Work	165

6	WDM EPON Architecture	175
6.1	Introduction	175
6.2	DWBA Schemes.	178
6.3	FWPBA Model.	180
6.4	DWPBA Model	184
6.5	Future Model Development	187
7	Performance Evaluation	193
7.1	Model Simulation	193
7.2	FWPBA Model Analysis	194
7.3	DWPBA Model Analysis	198
7.4	FWPBA and DWPBA Model Comparison	200
7.4.1	Model Scalability Analysis	204
7.4.2	Comparison of Results Among Different DWBA Models	206
7.4.3	Comparison with a Single-Channel EPON	207
7.5	The DWPBA-FS Model Analysis	210
8	Conclusion	217
	References	223
	Index	227

The Emerging WDM EPON

Radivojević, M.; Matavulj, P.

2017, XXI, 235 p. 152 illus., 151 illus. in color.,

Hardcover

ISBN: 978-3-319-54222-5
