

Contents

Re-envisioning Computing Across Disciplines	1
Samuel B. Fee, Amanda M. Holland-Minkley and Thomas E. Lombardi	
Part I The Case for Interdisciplinary Computing Education	
Good (and Bad) Reasons to Teach All Students Computer Science	15
Colleen M. Lewis	
Approaching Computer Science Education Through Making	35
Michael Eisenberg	
Computer Science and the Liberal Arts: Hidden Synergies and Boundless Opportunities	45
Gary R. Skuse, Daniel A. Walzer, Kathryn Tomasek, Douglas Baldwin and Mark Bailey	
Task-Driven Programming Pedagogy in the Digital Humanities	63
David J. Birnbaum and Alison Langmead	
Macroanalysis in the Arts and Sciences	87
Thomas E. Lombardi	
Part II Pedagogical and Curricular Approaches	
An Unnamed Intersection: Where Computing Meets Liberal Arts	103
Enid Arbelo Bryant	
Adapting the Studio Based Learning Methodology to Computer Science Education	119
Paula Alexandra Silva, Blanca J. Polo and Martha E. Crosby	

The Curricular Soundtrack: Designing Interdisciplinary Music Technology Degrees Through Cognitive Apprenticeship and Situated Learning	143
Daniel A. Walzer	
An Interdisciplinary Model for Liberal Arts Computing Curricula	161
Amanda M. Holland-Minkley and Samuel B. Fee	
Part III Case Studies and Examples	
The Development of a B.A. in Computer Science and Computational Thinking	187
Kathie A. Yerion, Robert L. Bryant and Shawn Bowers	
Disciplinary Thinking, Computational Doing: Collaborating for Mutual Enrichment.	201
Valerie Barr	
A Capstone Experience in Information Technology	217
William H. Thomas, Loren K. Rhodes and Gerald W. Kruse	
Trial by a Many-Colored Flame: A Multi-disciplinary, Community-Centric Approach to Digital Media and Computing Education	237
Adrienne Decker, Andrew Phelps and Christopher A. Egert	
A GitHub Garage for a Digital Humanities Course	259
Elisa E. Beshero-Bondar and Rebecca J. Parker	
Educators as Clinicians: Small Data for Education Research	277
Thomas E. Lombardi and Amanda M. Holland-Minkley	
Common Threads: Directions for Computing Education.	295
Samuel B. Fee, Amanda M. Holland-Minkley and Thomas E. Lombardi	
Author Index.	305
Subject Index.	307

New Directions for Computing Education
Embedding Computing Across Disciplines

Fee, S.B.; Holland-Minkley, A.; Lombardi, Th.E. (Eds.)

2017, XI, 308 p. 11 illus., Hardcover

ISBN: 978-3-319-54225-6
