

Contents

1	Fungi: Characteristics and Classification	1
1.1	Basic Characteristics of Fungi	2
1.2	A Broad Classification of Fungi	6
1.2.1	Kingdom Mycetozoa	6
1.2.2	Kingdom Stramenopila	10
2	The Marine Environment and the Role of Fungi	15
2.1	Divisions of the Marine Environment	16
2.2	The Marine Food Web	18
2.2.1	Primary Production in Marine Ecosystems	19
2.3	The Major Marine Ecosystems	19
2.3.1	Coastal Environments	19
2.3.2	Offshore Pelagic, Benthic, and Deep-sea Habitats	22
2.4	Fungi in Marine Ecosystem Processes	24
2.4.1	Symbiosis	24
2.4.2	Saprotrophy	25
2.5	Diversity of Marine Fungi	31
2.5.1	Kingdom Mycetozoa	32
2.5.2	Kingdom Stramenopila	34
3	History of Marine Mycology	37
4	Allochthonous Wood in Coastal Waters	43
4.1	Diversity of Fungi on Allochthonous Wood in the Sea	45
4.2	Growth and Degradative Activities of Marine Lignicolous Fungi	49
4.2.1	Colonization and Growth	49
4.2.2	Enzymatic Degradation of Wood	52
4.2.3	Relationship of Lignicolous Fungi with Wood Borers and Bacteria	54

5	The Mangrove Ecosystem	59
5.1	Fungi in Woody Detritus of Mangroves	61
5.1.1	Diversity of Fungi in Decomposing Mangrove Wood	62
5.1.2	Enzymatic Degradation of Lignocellulosic Material by Mangrove Fungi	71
5.2	Fungi in Detritus of Mangrove Leaves and Seedlings	73
5.2.1	Fungi and Decompositional Phases	73
5.3	Fungi in Mangrove Sediments and Waters	82
6	The Salt Marsh Ecosystem	85
6.1	Fungi in Decomposing Salt Marsh Grass	87
6.1.1	Diversity of Fungi in Decomposing Salt Marsh Grass	87
6.1.2	Fungal Succession and Dynamics in Decomposing Salt Marsh Grass	90
7	The Seagrass Ecosystem	101
7.1	Symbiotic Fungi in Living Seagrasses	102
7.1.1	Endophytic Fungi	102
7.1.2	Fungal Diseases of Seagrass	104
7.2	Saprotrophic Fungi in Seagrass Detritus	106
7.3	Fungi in Sediments of Seagrass Vegetation	108
7.4	Fungi as Food for Seagrass Detritivores	108
8	The Macroalgal Ecosystem	111
8.1	Symbiotic Fungi in Macroalgae	113
8.1.1	Endophytic Fungi in Marine Algae	113
8.1.2	Mutualistic Associations Between Fungi and Algae	115
8.1.3	Parasites of Macroalgae	118
8.2	Saprobic Fungi in Marine Algae	128
8.2.1	Diversity of Fungi in Macroalgal Detritus	128
8.2.2	Dynamics of Fungi in Macroalgal Detritus	129
9	The Coral Reef Ecosystem	135
9.1	Fungi in Scleractinian Corals	136
9.1.1	Diversity of Fungi in Scleractinian Corals	137
9.1.2	Endolithic Mycelial Fungi in Corals and Bioerosion	139
9.1.3	Symbiotic Relationships Between Endolithic Fungi and Corals	141
9.2	Fungi in Gorgonians	144
9.2.1	The “Sea Fan Disease” or “Aspergillosis” of Gorgonian Soft Corals	144
9.3	Sponge-Associated Fungi	147
9.3.1	Diversity of Sponge-Associated Fungi	148
9.3.2	The Symbiotic Association of Fungi with Sponges	150
9.4	Fungi in Diverse Coral Reef Invertebrates and Algae	151

10	Animals in Coastal Benthic Ecosystem and Aquaculture	
	Systems	153
10.1	Nonpathogenic Symbiotic Fungi in Animals	153
10.2	Animal Diseases Caused by Fungi	155
10.2.1	Fungi that Cause Animal Diseases	156
10.2.2	Infections of Shrimps and Prawns	159
10.2.3	Infection of Crabs and Lobsters	161
10.2.4	Bivalves and Gastropods	163
10.2.5	Cultured Fish	166
10.2.6	Other Animals	166
10.3	Saprobic Fungi in Marine Animals	167
11	The Pelagic Ecosystem	173
11.1	Fungi in Pelagic Phytoplankton and Animals	176
11.1.1	Fungi Associated with Phytoplankton	176
11.1.2	Fungi in Mesozooplankton, Fish, and Mammals	182
11.2	Fungi in the Water Column	184
11.2.1	Diversity of Fungi in the Water Column	185
11.2.2	Abundance and Biomass of Fungi in the Water Column	189
11.3	Fungi in Coastal Sediments	202
12	Extreme Marine Environments	207
12.1	The Deep Sea	208
12.1.1	Deep-Sea Waters and Sediments	210
12.1.2	The Deep Biosphere	220
12.2	Hydrothermal Vents	224
12.2.1	Presence and Diversity of Fungi in Hydrothermal Vents	226
12.2.2	Fungi in Hydrothermal Vent Animals	228
12.3	Hypoxic and Anoxic Habitats	229
12.3.1	Diversity of Fungi in Hypoxic and Anoxic Marine Environments	231
12.3.2	Activity of Fungi in Anoxic Environments	233
12.4	Polar Environments	236
12.4.1	Fungi in Diverse Polar Habitats	237
12.5	Hypersaline Environments	240
12.5.1	Diversity of Fungi in Hypersaline Environments	242
12.5.2	Ecology of Fungi in Hypersaline Environments	245
12.5.3	Physiological Adaptations	247
13	Physiology, Biochemistry, and Biotechnology	251
13.1	Growth Conditions	252
13.1.1	Salinity	252
13.1.2	pH	256
13.1.3	Temperature	257
13.1.4	Carbon and Nitrogen Nutrition	258

13.2	Enzymes and Cellular Proteins	258
13.2.1	Enzymes and Proteins Tolerant to Extreme Conditions	258
13.2.2	Lignocellulolytic Enzymes	261
13.2.3	Enzymes that Degrade Marine Polymers	269
13.3	Metal Tolerance	270
13.4	Hydrocarbon Degradation	273
13.5	Secondary Metabolites and Bioactive Compounds	274
13.6	Omega-3 Fatty Acids, High Value Lipids, and Carotenoids from Thraustochytrids	284
13.7	Other Applications	289
14	Origin and Evolution of Marine Fungi	293
14.1	Evolution of Marine Mycetaen Fungi	293
14.1.1	Evolution of Obligate Marine Mycetaen Fungi	297
14.2	Evolution of Marine Straminipilan Fungi	302
15	Methods to Study Marine Fungi	309
15.1	Culturing of Marine Fungi	310
15.1.1	Direct Detection and Culturing	310
15.1.2	Plating	313
15.1.3	Baiting and Culturing	315
15.2	Taxonomic Identification and Diversity Studies of Marine Fungi	317
15.2.1	Identification Based on Morphology	317
15.2.2	Molecular Methods for Identification and Metagenomics	318
15.3	Detection of Fungi and Biomass Estimations	322
15.3.1	Detection and Estimation of Filamentous Fungi	322
15.3.2	Detection and Estimation of Labyrinthulomycetes	326
15.4	Culturing Deep-Sea Fungi	327
15.5	Culture Media	328
	Abbreviations	331
	References	333

Fungi in Coastal and Oceanic Marine Ecosystems

Marine Fungi

Raghukumar, S.

2017, XVII, 378 p. 95 illus., 73 illus. in color., Hardcover

ISBN: 978-3-319-54303-1
