## Part I The Legal and Regulatory Framework for Space Activities

<b>1</b>	<b>Introduction to the Study on Global Space Governance</b>	<b>3</b>
1.1	Background	3
1.2	The Purpose of the Study	5
1.3	Definitions of Global Space Governance	6
1.4	Methodology Used	7
1.5	Scope, Nature, and Expected Role of the Book	8
<b>2</b>	<b>Overview of the Existing Mechanisms of Global Space Governance</b>	<b>15</b>
2.1	Introduction and Background	15
2.1.1	The Evolution of a General Global Governance System	16
2.1.2	Is Global Space Governance Unique?	18
2.2	Is the Existing Global Space Governance Regime Adequate to Meet Present and Future Global Public Interest in Outer Space?	19
2.3	Recap of the Existing Five U. N. Space Law Treaties	20
2.3.1	The Law of Treaties	21
2.3.2	The 1967 Outer Space Treaty	21
2.3.3	The 1968 Rescue Agreement	24
2.3.4	The 1972 Liability Convention	24
2.3.5	The 1974 Registration Convention	26
2.3.6	The 1979 Moon Agreement	28
2.4	Are the United Nations and Its Specialized Agencies the Best Organizations to Regulate, Coordinate, or Standardize Space Activities and Practices?	30
2.4.1	The U. N. General Assembly	30
2.4.2	The U. N. Committee on the Peaceful Uses of Outer Space	32
2.4.3	The U. N. Office for Outer Space Affairs	33

2.4.4	U. N.-Space .....	34
2.4.5	The International Telecommunication Union.....	34
2.4.6	Other U. N. Agencies .....	35
2.5	What Alternative Forums Exist and How Can They Contribute to Effectively Address Issues of Global Space Governance?.....	36
2.5.1	Multilateral and Bilateral Treaties Outside of the U. N. System.....	37
2.5.2	Intergovernmental Organizations/Institutions.....	38
2.5.3	Intergovernmental Operating Organizations .....	40
2.5.4	Non-Governmental International Organizations .....	42
2.6	How and to What Extent Do Existing and Emerging “Soft Law” Regimes Influence Global Space Governance? .....	45
2.7	Are There Alternative or Complementary Mechanisms Available and to What Extent Are They Effective? .....	47
2.7.1	Voluntary Bilateral and Multilateral Arrangements .....	48
2.7.2	The International GNSS Service .....	49
2.7.3	The Commercial Spaceflight Federation.....	49
2.7.4	National Space Regimes as Model Laws .....	50
2.7.5	Insurance as Governance.....	50
2.8	Conclusion and Summary Table .....	51
	References.....	58
<b>3</b>	<b>Global Space Governance from Regional Perspectives .....</b>	<b>65</b>
3.1	Introduction.....	65
3.2	What Are the Governance Implications (Merits or Demerits) of Regional Cooperative Regimes and Intra-Regional and Inter-Regional Space Governance Initiatives? .....	67
3.2.1	Europe and Its Experience with Regional Space Governance.....	67
3.2.2	Asia and Its Experience with Regional Space Governance.....	71
3.2.3	Analysis of Regional Space Cooperation in Europe and Asia .....	76
3.3	What Are the Prospects for Regional Space Programs and Agencies in the Middle East, Africa, and Latin America? .....	80
3.4	Conclusion: Are the Regional Space Governance Mechanisms Complementary to Global Space Governance? .....	83
	References.....	84
<b>4</b>	<b>National Space Policies and Laws and Global Space Governance....</b>	<b>87</b>
4.1	Introduction: The Role of National Space Legislation in the Development of Global Space Governance .....	87
4.2	Some Examples of National Space Legislation .....	89
4.2.1	Argentina.....	89
4.2.2	Australia .....	89
4.2.3	Austria .....	90

4.2.4	Belgium .....	90
4.2.5	Brazil .....	91
4.2.6	Canada .....	91
4.2.7	Chile .....	92
4.2.8	China .....	93
4.2.9	France .....	94
4.2.10	Germany .....	94
4.2.11	India .....	95
4.2.12	Indonesia .....	95
4.2.13	Iran .....	96
4.2.14	Ireland .....	97
4.2.15	Italy .....	97
4.2.16	Japan .....	97
4.2.17	Kazakhstan .....	98
4.2.18	The Republic of Korea (South Korea) .....	99
4.2.19	The Netherlands .....	100
4.2.20	Nigeria .....	100
4.2.21	Norway .....	101
4.2.22	The Russian Federation .....	101
4.2.23	South Africa .....	103
4.2.24	Spain .....	104
4.2.25	Sweden .....	104
4.2.26	Ukraine .....	104
4.2.27	The United Kingdom .....	105
4.2.28	The United States .....	106
4.3	Conclusion and Summary Table .....	108
	References .....	111
<b>5</b>	<b>Private Commercial Space Enterprises and Global Governance System .....</b>	<b>113</b>
5.1	Introduction: Emerging Technologies and the Commercial Space Sector .....	113
5.2	International Treaties and Global Governance of Private Enterprises .....	118
5.2.1	State Responsibility for Private Enterprises .....	120
5.2.2	State Liability for Acts of Private Enterprises .....	121
5.2.3	Change of Ownership .....	122
5.2.4	Non-appropriation and Free Access/Use .....	123
5.2.5	Response to Emergencies .....	123
5.2.6	Orbital Slot and Radio Frequency Allocation .....	125
5.2.7	Relationship of National Legislation and Bilateral Agreements to Global Governance .....	125
5.3	Other Modes of Global Governance .....	126
5.3.1	Customary International Law and General Principles of Law .....	126

5.3.2	Soft Law .....	128
5.4	Analysis of Current Governance and Key Pending Issues.....	129
5.4.1	Adequacy and/or Inadequacy of the Current Governance System.....	129
5.4.2	Risks and Threat for Maintaining Status Quo.....	132
5.4.3	Specific, Potential, Innovative, and Appropriate Governance.....	134
5.4.4	Potential Forum(s) Where Action Might Be Taken.....	135
5.5	Conclusions: Key Challenges, Opportunities, and Summary Tables.....	136
	References.....	139

## **Part II Specific Space Applications (Uses) and Transportation**

<b>6</b>	<b>Satellite Telecommunications and Broadcasting.....</b>	<b>145</b>
6.1	Introduction.....	145
6.2	Issues of Governance and Concern Related to Satellite Telecommunications .....	150
6.2.1	Potential Conflicts Related to Telecommunications Technical and Operational Standards.....	150
6.2.2	Limits to the Policing Authority of the ITU.....	151
6.2.3	Accommodating the Future Growth in Demand for Telecommunication Satellite Services.....	152
6.3	How General Space Problems Affect the Telecommunications Sector .....	155
6.4	Potential Action Related to Institutional Arrangements, and Technical, Policy, and Legal Standards.....	156
6.5	Conclusion and Summary Tables.....	161
	References.....	165
<b>7</b>	<b>Remote Sensing, Earth Observation, and Meteorological Satellites .....</b>	<b>167</b>
7.1	Introduction.....	167
7.2	Key Technical Developments in Remote Sensing .....	169
7.2.1	Innovations in Remote Sensing Systems.....	170
7.2.2	Upgraded Sensor Capabilities and Implications for Remote Sensing and Meteorological Services .....	171
7.3	International Law Governing Remote Sensing Activities.....	172
7.4	National Regulation of Remote Sensing Activities.....	174
7.5	Possible Actions to Enhance the Governance of Remote Sensing .....	176
7.5.1	Regulatory Enhancements for Key International Organization to Ameliorate Current and Future Conditions .....	176
7.5.2	Expansion of Vital Information Made More Broadly Available.....	177

7.6	Conclusion and Summary Tables.....	177
	References.....	180
<b>8</b>	<b>Global Navigation Satellite Systems and Services .....</b>	<b>183</b>
8.1	Introduction.....	183
8.2	Evolution, Current Status, and Key Future Trends .....	185
8.2.1	Evolution and Current Status of GNSS: The Various Players' Systems and Policies.....	185
8.2.2	The Commercial Market.....	191
8.2.3	Future Trends.....	192
8.2.4	The Risk of GNSS Disruption .....	193
8.3	Current Governance System and Its Challenges .....	194
8.3.1	Legal and Ethical Issues with the Use of GNSS.....	194
8.3.2	Applicable Legal Instruments and International Forums .....	195
8.4	Adequacy of Current Governance System and Recommendations .....	198
8.4.1	Risks and Threat of Maintaining Status Quo.....	199
8.4.2	Specific, Potential, Innovative, and Appropriate Governance Solutions .....	199
8.5	Conclusion and Summary Tables.....	200
	References.....	202
<b>9</b>	<b>Space-Based Solar Power .....</b>	<b>205</b>
9.1	Introduction .....	205
9.2	Specificities of an SBSP Satellite System.....	207
9.3	Current Interest and Developments Pertaining to SBSP Satellites .....	210
9.4	Challenges Ahead of Realization of SBSP Technology .....	213
9.4.1	Technical Challenges .....	213
9.4.2	Regulatory Challenges.....	214
9.5	Current General Governance System for SBSP.....	217
9.5.1	The Outer Space Treaty .....	217
9.5.2	Liability for Damage Caused by SBSP .....	219
9.5.3	Registration of SBSP Satellites.....	220
9.5.4	Radio Frequencies and GEO Slots for SBSP Satellites.....	220
9.5.5	Microwave Radiation (Wireless Power Transmission).....	221
9.6	Conclusion and Summary Tables.....	223
	References.....	227
<b>10</b>	<b>Space Launch Services .....</b>	<b>231</b>
10.1	Introduction .....	231
10.2	Emerging Space Launch Technologies .....	232
10.2.1	Reusable Launch Technologies .....	232
10.2.2	Small Payload Launch Systems.....	235

10.2.3	Deployment of Small Satellites from Space Stations .....	236
10.2.4	Advanced Rocket-Based Launch Systems .....	236
10.2.5	Advanced Non-Rocket Based Launch System: Space Elevators.....	238
10.3	Issues of Governance and Concerns Related to Launch Services .....	240
10.3.1	Growing Involvement of Private Actors .....	240
10.3.2	Environmental Issues: Clean Technology for Earth and Space.....	240
10.3.3	Legal Gap with Upcoming Launch Service Technology.....	241
10.3.4	Possible Actions.....	242
10.4	Conclusion and Summary Tables.....	243
	References.....	245

**Part III Global Space Safety and Security Concerns**

<b>11</b>	<b>Human Spaceflight.....</b>	<b>249</b>
11.1	Introduction and Scope .....	249
11.2	National Human Spaceflight .....	250
11.3	International Human Spaceflight.....	251
11.4	Future International Human Spaceflight .....	252
11.5	Emerging Commercial Human Spaceflight .....	253
11.6	Governance of Commercial Human Spaceflight.....	256
	11.6.1 Current Governance Structure: Article VI of the Outer Space Treaty with Respect to State Responsibility .....	256
	11.6.2 Future Governance Structure .....	257
11.7	Conclusion and Summary Tables.....	262
	References.....	265
<b>12</b>	<b>Global Governance of Space Security .....</b>	<b>267</b>
12.1	Introduction .....	267
12.2	Evolution of Military and Security Activities in Outer Space .....	269
12.3	Current Challenges in Global Space Security Governance.....	271
	12.3.1 Space Weapons .....	274
	12.3.2 Other Security Challenges in Space .....	281
12.4	Inadequacy of the Current Governance System for Space Security .....	284
	12.4.1 Analysis of the Existing Legal System.....	284
	12.4.2 Prevention of an Arms Race .....	286
	12.4.3 Space Debris Mitigation .....	288

12.4.4	Guidelines and Regulations Related to Active Debris Removal/Management and On-Orbit Servicing .....	289
12.4.5	Laws of Armed Conflict .....	290
12.4.6	Global Efforts to Coordinate Planetary Defense .....	291
12.5	The Need for Restraint and Encouraging Responsible Behavior in Space .....	291
12.5.1	Clarifying the Regulatory Framework .....	293
12.5.2	Protecting Existing Space Infrastructure .....	296
12.5.3	Making Space Infrastructure More Recoverable .....	296
12.5.4	Developing Alternatives Where Possible So That Space Infrastructure Is Less Critical .....	296
12.5.5	Credible Repercussions for Irresponsible Behavior .....	297
12.6	Conclusion and Summary Tables.....	297
	References.....	300
<b>13</b>	<b>Space Traffic Management and Coordinated Controls for Near-space.....</b>	<b>305</b>
13.1	Introduction .....	305
13.2	Launch and Recovery of Launchers into Orbit or Sounding Rockets .....	308
13.2.1	Technical and Operational Challenges .....	310
13.2.2	Airspace Access and Economics .....	312
13.2.3	Risk and Threat Mitigation and Equity Issues.....	313
13.3	The Protozone .....	314
13.3.1	Technical and Operational Challenges .....	315
13.3.2	Airspace Access and Economics .....	316
13.3.3	Risk and Threat Mitigation and Equity Issues.....	317
13.4	Space Traffic Control .....	318
13.4.1	Technical and Operational Challenges .....	318
13.4.2	Airspace Access and Economics .....	318
13.4.3	Risk and Threat Mitigation and Equity Issues.....	319
13.5	Analysis of Current Governance and Considerations of Potential Action .....	320
13.6	Adequacy of Current Governance Structure .....	321
13.7	Risks and Threat in Maintaining the Status Quo .....	322
13.7.1	Current Spacefaring Nations.....	322
13.7.2	Future Spacefaring Nations .....	323
13.8	Specific Potential, Innovative, and Appropriate Governance Solutions .....	323
13.9	Conclusion: Key Risks, Challenges, Options, and Solutions and Tables.....	324
	References.....	327

## Part IV “NewSpace” Activities

<b>14 On-Orbit Servicing, Active Debris Removal, and Related Activities .....</b>	<b>331</b>
14.1 Introduction .....	331
14.2 Need for New Solutions and Capabilities to Cope with the Threat Posed by Space Debris.....	332
14.3 Current Status and Evolution of On-Orbit Servicing and Active Debris Removal.....	335
14.3.1 Orbital Express – DARPA/NASA .....	335
14.3.2 Deutsche Orbitale Servicing Mission – DLR .....	336
14.3.3 Phoenix – DARPA .....	336
14.3.4 Robotic Refueling Module – NASA.....	337
14.3.5 ConeXpress – Orbital Recovery Corporation.....	337
14.3.6 Space Infrastructure Servicing – MDA.....	338
14.3.7 Mission Extension Vehicle – ViviSat.....	339
14.3.8 X-37B Orbital Test Vehicle – U. S. Air Force .....	339
14.3.9 CleanSpace One – EPFL/eSpace .....	339
14.3.10 Other Key International On-Orbit Servicing Trials .....	340
14.4 Legal Issues and Policy Concerns Under the Current Framework for On-Orbit Servicing and Active Debris Removal.....	340
14.4.1 Is “Space Debris” a Space Object?.....	342
14.4.2 Lawfulness of the Act of Removal .....	344
14.4.3 Responsibility and Liability for On-Orbit Servicing and Active Debris Removal .....	346
14.5 Policy Concerns: The Additional Hurdles for Private Operators .....	347
14.6 Possible Regulatory Actions to Address the Future Evolution of Space Systems for On-Orbit Servicing and Active Debris Removal.....	348
14.7 Conclusion and Summary Tables .....	350
References.....	353
<b>15 Small Satellites and Large Commercial Satellite Constellations.....</b>	<b>357</b>
15.1 Introduction .....	357
15.2 Historical Background and Trend Toward Small Satellites and New Commercial Satellite Constellations .....	361
15.3 Are Small Satellites a Disruptive Innovation or Just a Phenomenon of the Space Industry That Demonstrates Constant Change and Innovation?.....	363
15.4 Small Satellites and New Commercial Launch Service Providers .....	367
15.5 Assessment of the Trend to Small Satellites and Constellations .....	369
15.6 Conclusion and Summary Tables .....	373
References.....	375

<b>16</b>	<b>Space Mining and Use of Space Natural Resources.....</b>	<b>379</b>
16.1	Introduction .....	379
16.2	Evolution, Current Status, and Key Future Trends in the Development of Space Activities Related to Space Mining .....	382
16.2.1	Extracting Space Resources from Outer Space Locations .....	382
16.2.2	The Significance of Remote Sensing.....	382
16.2.3	Processing Techniques in Space .....	383
16.2.4	Space Resource Extraction, Retrieval, and Processing Systems .....	383
16.2.5	Sample Return Missions and <i>In Situ</i> Analysis.....	384
16.3	Lunar Resources.....	385
16.4	Near-Earth Objects (NEOs) .....	386
16.5	The Challenges to Successful Space Mining in the Future.....	387
16.5.1	The Business and Financial Challenges .....	387
16.5.2	Key Developmental Goals for New Technologies for Space Mining .....	388
16.6	Space Mining and International Space Law, Space Regulation, and Relevant Precedents.....	389
16.6.1	Interpretation of the Outer Space Treaty and the Moon Agreement .....	390
16.6.2	The Private Sector in Outer Space.....	391
16.6.3	Sovereignty and Non-Appropriation vs. “Use” of Celestial Bodies .....	392
16.7	Outer Space Resources and Future Regulatory Needs.....	394
16.7.1	Considerations for Potential Regulatory Action.....	395
16.7.2	Adopting Model National Space Law .....	395
16.7.3	Unilateral Interpretations by National Space Law.....	396
16.7.4	Need for International Consensus in the Governance of Space Mining.....	398
16.8	Environmental and Public Health Risks, Hazards, and Concerns with Space Mining Operations.....	400
16.9	Specific Potential, Innovative, and Appropriate Governance Solutions .....	401
16.10	The UNCOPUOS and Other Potential Forums.....	403
16.11	Challenges and Options.....	404
16.11.1	Options for Taxing Commercial Space Activities or Other Financial Arrangements with Regard to “Global Sharing” .....	405
16.11.2	Is the U. S. Space Resource Exploration and Utilization Act of 2015 a Good Model for Future Regulation of Space Mining? .....	405
16.12	Conclusion and Summary Tables.....	408
	References.....	411

## Part V Into the Longer Term Future

<b>17 Cosmic Hazards and Planetary Defense</b> .....	417
17.1 Introduction .....	417
17.2 Relevant Steps to Ameliorate Cosmic Hazards.....	418
17.3 Cosmic Hazards and Technical Challenges	
To Planetary Defense .....	421
17.3.1 Potentially Hazardous Asteroids and Comets.....	421
17.3.2 Legal Issues Involving Planetary Defense, Especially the Use of Nuclear Weapons Against NEOs .....	422
17.3.3 NEO Challenges and Potential Responses .....	424
17.3.4 Severe Space Weather Hazards.....	425
17.3.5 Challenges and Potential Responses.....	427
17.4 Consideration of Potential Action Related to Policy, Legal, Standards, or Other Issues.....	428
17.5 Conclusion and Summary Tables .....	429
References.....	432
<b>18 Space Environmental Issues</b> .....	435
18.1 Introduction .....	435
18.1.1 What is Meant by Space Environmental Issues? .....	435
18.1.2 Approach to Assessing Issues of Environmental Concern.....	436
18.2 Earth and Near-Earth Environment: Effects of Launch Vehicles, Landings, and the Potential Introduction to Earth of “Almost Extraterrestrial Matter” (e.g., Launch Failures).....	439
18.2.1 Physical Hazards to the Use of Near-Earth Space (and Potentially to the Use of Other Worlds) .....	441
18.2.2 Non-Material Environmental Degradation .....	443
18.3 Planetary and Small Body Environment: Potential Effects of the Use of Outer Space .....	444
18.3.1 Threats to Small Bodies and Airless Moons.....	445
18.3.2 Threats to Volatile-Rich Bodies .....	446
18.3.3 Threats to the Environment on a Planetary Scale .....	447
18.3.4 Planetary Parks and Preservation of Unique Sites.....	449
18.4 What if There Is Life Out There? Protection of the Earth .....	449
18.5 Summary of Key Challenges, Opportunities, and Threats.....	450
18.6 Current Governance System for the Protection of the Celestial Environment.....	451
18.6.1 Scientific Planetary Quarantine Requirements (PQR)/Planetary Protection Policy (PPP).....	451
18.6.2 International Regulation .....	453
18.6.3 Environmental Protection, Ethics, and Trans-Science.....	462
18.6.4 Conflicts Between Scientific and Legal Approaches to Planetary Protection.....	463
18.6.5 Should There Be an Environmental Code of Conduct for Outer Space? .....	466

18.6.6	Pollution and Congestion in GEO .....	468
18.7	Conclusion and Summary Tables .....	470
	References.....	473
<b>19</b>	<b>Space Migration and Colonization .....</b>	<b>479</b>
19.1	Background and Evolution.....	479
19.1.1	Human Essence.....	479
19.1.2	Migration .....	481
19.1.3	Migration as a Means of Continued Evolution.....	482
19.1.4	Current Status .....	485
19.1.5	Future Trends .....	486
19.2	Current Governance System.....	487
19.2.1	Historical Roots .....	487
19.2.2	Adequacy .....	488
19.2.3	Inadequacy .....	490
19.3	Recommendations for Future Governance System.....	493
19.3.1	Purpose and Function of the Settlement .....	494
19.3.2	Who Will Settle?.....	496
19.3.3	Behavior.....	497
19.3.4	Environmental Considerations.....	498
19.3.5	Environmental Protection .....	499
19.3.6	Applicable Forums.....	500
19.3.7	Governance Makeup .....	503
19.3.8	Scarcity of Resources .....	505
19.3.9	Independence of Settlements .....	505
19.3.10	Possible Encounters with ETLFs.....	506
19.4	Other Questions That Need to Be Answered .....	508
	Annex: A Draft Mars Convention.....	510
	References.....	517
<b>20</b>	<b>The Role of Space in Long-Term Economic</b>	
	<b>Development on Earth .....</b>	<b>519</b>
20.1	Introduction .....	519
20.2	Benefits of Space Assets and Technologies .....	521
20.2.1	Benefits from Space-Based Information	
	Communication Technology .....	521
20.2.2	Benefits from Space-Based Earth Observation (EO).....	523
20.3	Sustainability, Space Activities, and the Sustainable	
	Development Goals (SDGs).....	529
20.4	Governance Challenges and Potential Solutions.....	534
20.5	Conclusion and Summary Tables .....	536
	References.....	538
<b>21</b>	<b>Extending the Benefits and Uses of Outer Space</b>	
	<b>to All Humankind .....</b>	<b>541</b>
21.1	Introduction .....	541

21.2	Evolution of the Concept of Sharing the Benefits of Outer Space.....	544
21.3	How Can Economically Developing States Share in Space Benefits?.....	545
21.3.1	Space Activities for the Global South and the U. N. Sustainable Development Goals .....	547
21.3.2	Population Growth.....	548
21.3.3	Competition for Radio Frequency .....	548
21.3.4	Earth Observation and Cost-Free Data .....	549
21.3.5	Data Sharing Sustainability .....	549
21.3.6	Private Actors.....	550
21.3.7	Space Applications and the Sharing of Space Benefits ....	550
21.4	Legal Perspectives: The Definition and Comparison of the Notions of “Equitable Access” and “Equitable Sharing” of Outer Space and Their Place in Space Law .....	552
21.5	Perceptions of the International Community .....	554
21.6	Proposed Measures to Move Toward the Desired Equitability .....	556
21.7	Space, Developing States, and Access to Limited Natural Resources .....	557
21.8	Unified <i>De Facto</i> Applicability of International Space Law.....	558
21.9	Analysis of the Current Governance and Consideration of Potential Action .....	559
21.10	Specific, Potential, Innovative, and Appropriate Governance Solutions .....	560
21.11	Summary Tables.....	563
	References.....	565
<b>22</b>	<b>Capacity-Building in Global Space Governance.....</b>	<b>567</b>
22.1	Introduction .....	567
22.2	The Traditional Contours of Space Education .....	569
22.3	Moving Toward a 21st Century Space Training Model .....	571
22.3.1	Existing Institutions .....	571
22.3.2	Education and Research Programs Outside Formal Post-Secondary Programming.....	576
22.4	Analysis and Recommendations .....	579
22.5	Conclusion and Summary Tables.....	582
	References.....	585

## Part VI Conclusions and the Way Forward

<b>23</b>	<b>Conclusions, Consolidated Findings, and General Recommendations .....</b>	<b>589</b>
23.1	Introduction: The Scope and Goals of This Study .....	590
23.2	Traditional and New Mechanisms of Global Space Governance...	592
23.2.1	Cross-Sector Issues of Global Space Governance.....	592

23.2.2	Past Precedents and New Sources for Global Space Governance .....	592
23.2.3	The Challenges to Global Space Governance Posed by NewSpace Initiatives .....	594
23.2.4	The Challenges Ahead .....	596
23.3	Themes That Arise Throughout the Study .....	598
23.4	Conclusion and the Way Forward .....	601
	References .....	603
<b>Appendix A</b>	<b>Biographies of Contributors .....</b>	<b>605</b>
<b>Appendix B</b>	<b>Glossary of Terms .....</b>	<b>653</b>
<b>Appendix C</b>	<b>The Texts of the Key Documents .....</b>	<b>669</b>
1.	UNGA Resolution containing Declaration of Legal Principles .....	670
2.	Outer Space Treaty .....	672
3.	Rescue & Return Agreement.....	678
4.	Liability Convention.....	683
5.	Registration Convention .....	692
6.	Moon Agreement.....	697
7.	UNGA Resolution on principles related to satellite TV broadcasting.....	707
8.	UNGA Resolution on principles related to satellite remote sensing .....	710
