

# Contents

<b>1</b>	<b>Topological Groups</b>	1
1.1	Topological Groups: Examples	1
1.2	Homogeneous Spaces	6
1.3	Elementary Abelian Groups	10
1.4	Proper Group Actions	16
1.5	Discrete Groups with Compact Quotient: Arithmetic Examples	20
1.6	Applications to Algebraic Number Fields	26
<b>2</b>	<b>Simply Connected Spaces and Groups</b>	33
2.1	The Czechist Viewpoint	33
2.2	Extensions of Local Homomorphisms of a Simply Connected Group	38
2.3	Covering Spaces and the Fundamental Group	40
2.4	The Simply Connected Covering of a Space	43
2.5	Classification of Covering Spaces	45
2.6	The Simply Connected Covering of a Topological Group	48
2.7	The Universal Covering of the Group $SL_2(\mathbb{R})$	51
<b>3</b>	<b>Analytic Properties of Linear Groups</b>	61
3.1	Exponential and Logarithm	61
3.2	One-Parameter Subgroups of $GL_n(\mathbb{R})$	69
3.3	Limits of Products and Commutators	70
3.4	Von Neumann's Theorem for a Closed Subgroup	72
3.5	Extension of von Neumann's Theorem to Locally Linear Groups	77
3.6	The Lie Algebra and the Adjoint Representation of a Locally Linear Group	85
3.7	The Analytic Structure on a Locally Linear Group	89
3.8	Analyticity of Continuous Homomorphisms	94

3.9	The Derivative of the Exponential Map . . . . .	99
3.10	The Campbell–Hausdorff Formula . . . . .	103
3.11	Examples of Lie Algebras . . . . .	105
3.12	Cartan Decomposition in a Self-Adjoint Group . . . . .	110
<b>4</b>	<b>Manifolds and Lie Groups . . . . .</b>	<b>113</b>
4.1	Manifolds and Morphisms . . . . .	113
4.2	The Rank of a Morphism at a Point . . . . .	116
4.3	Immersions and Submersions . . . . .	117
4.4	Gluing Open Submanifolds. . . . .	120
4.5	Cartesian Products and Lie Groups. . . . .	122
4.6	Definition of Manifolds by Means of Immersions . . . . .	124
4.7	Submanifolds . . . . .	127
4.8	Lie Subgroups . . . . .	129
4.9	Submersions and Quotient Manifolds . . . . .	132
<b>5</b>	<b>The Lie Algebra of a Lie Group . . . . .</b>	<b>141</b>
5.1	Contacts of Order $n$ , Punctual Distributions . . . . .	141
5.2	Tangent Vectors to a Manifold at a Point. . . . .	146
5.3	Tangent Linear Map to a Morphism. . . . .	150
5.4	Tangent Vectors to a Cartesian Product . . . . .	153
5.5	Tangent Manifold . . . . .	156
5.6	The Adjoint Representation of a Lie Group . . . . .	159
5.7	The Lie Algebra of a Lie Group. . . . .	164
5.8	Effect of a Homomorphism on a Lie Algebra. . . . .	169
5.9	Differential Operators on Manifolds . . . . .	174
5.10	Invariant Differential Operators on a Lie Group . . . . .	177
5.11	Some Concrete Examples . . . . .	187
5.12	Differential Operators with Complex Coefficients. The Case of $SL_2(\mathbb{R})$ . . . . .	193
5.13	Representations of $G$ and Representations of $U(\mathfrak{g})$ . . . . .	201
5.14	Invariant Subspaces. Schur’s Lemma and Burnside’s Theorem. . . . .	205
5.15	Invariant Central Distributions of the Co-adjoint Representation . . . . .	212
5.16	The Universal Property of $U(\mathfrak{g})$ . . . . .	224
<b>6</b>	<b>The Exponential Map for Lie Groups . . . . .</b>	<b>229</b>
6.1	One-Parameter Subgroups. . . . .	229
6.2	Elementary Properties of the Exponential Map. . . . .	231
6.3	Regularity of the Exponential Map. . . . .	233
6.4	The Derivative of the Exponential Map . . . . .	237
6.5	The Campbell–Hausdorff Formula (Integral Form). . . . .	239
6.6	The Campbell–Hausdorff Formula (Series Expansion of Homogeneous Polynomials). . . . .	241

6.7	The Campbell–Hausdorff Formula. (Analyticity of the Function $H$ ) . . . . .	247
6.8	Analyticity of Lie Groups. . . . .	250
6.9	Limits of Products and Commutators . . . . .	253
6.10	Analyticity of Continuous Homomorphisms . . . . .	255
6.11	Simply Connected Group Homomorphisms . . . . .	257
6.12	The Cartan–von Neumann Theorem . . . . .	260
6.13	Subgroups and Lie Subalgebras . . . . .	267
6.14	The Natural Analytic Structure of a Subgroup . . . . .	272
6.15	Commutators in a Lie Group . . . . .	276
6.16	Belated Regrets About Quotient Groups. . . . .	281
<b>Index</b>	. . . . .	<b>285</b>
