19.4.1	Vasospasm After Subarachnoid Haemorrhage	374
19.4.2	Timing of Angioplasty for Vasospasm	374
19.4.3	Indications for Endovascular Treatment of Vasospasm	374
19.4.4	Imaging for Vasospasm	375
19.4.5	Endovascular Treatment Techniques for Vasospasm	375
19.5	Angioplasty and Stenting for Venous Disease	376
	References	377
20	Complications	381
20.1	Generic and Specific Complications	382
20.1.1	Severity of Complications	383
20.2	Complications Caused by Catheter Angiography	383
20.2.1	Complications at the Puncture Site	383
20.2.2	Complications Caused by Catheters and Guidewires	385
20.2.3	Reactions to Radiographic Contrast Medium and Periprocedural Drugs	386

20.2.4	Radiation-Induced Skin Damage	387
20.2.5	Benchmark Levels for Complications Related to Angiography	387
20.3	Complications Specific to Endovascular Treatments for Specific Conditions.	387
20.3.1	Aneurysms	387
20.3.2	Arteriovenous Malformations and Arteriovenous Fistulas	390
20.3.3	Angioplasty and Stenting.	391
20.3.4	Embolisation for Tumours	392
20.3.5	Functional Testing and Large Artery Occlusion	393
	References.	394
21	Obtaining the Patient's Consent	397
21.1	The Legal Principles of Consent to a Medical Procedure	398
21.1.1	Duty of Care.	398
21.1.2	Level of Risk	399
21.1.3	Competency	399
21.2	Informed Consent.	400
21.2.1	Guidance on Obtaining Patients Consent to Medical Procedures	400
21.2.2	The Informed Consent Process Under Ordinary Circumstances	401
21.2.3	Situations in Which Obtaining Informed Consent Is Impossible or When Patients Are Judged Incompetent	402
	References.	403
	Index.	405

Tutorials in Endovascular Neurosurgery and
Interventional Neuroradiology

Byrne, J.V.

2017, XVIII, 421 p. 122 illus., 62 illus. in color.,
Hardcover
