1	Introduction	1
1.1	Thermal Comfort	2
	References	12
2	Radiators in Hydronic Heating Installations. Historical Outline, Types and Structure	15
2.1	Historical Outline	15
2.2	Current Realizations of the Concept of a Radiator Intended for a Hydronic Heating Installation	19
2.2.1	Segment (Column) Radiators	19
2.2.2	Panel Radiators	21
2.2.3	Convactor Radiators	24
2.2.4	Canal Radiators	26
2.2.5	Tube Radiators	27
2.2.6	Surface Radiators	29
	References	45
3	Radiator Thermal Characteristic	49
3.1	Introduction	49
3.2	The Radiator Static Thermal Characteristic Assuming Constant Surface Film Conductance from the Radiator Wall External Surface	50
3.3	The Radiator Static Thermal Characteristic Taking Account of Variable Surface Film Conductance from the Radiator Wall External Surface	53
3.4	The Radiator Static Thermal Characteristic Taking Account of the Variability in Surface Film Conductance to the Radiator Wall Internal Surface	65
3.5	The Radiator Dynamic Thermal Characteristic	88
3.5.1	The Convactor Radiator Dynamic Thermal Characteristic	89

3.5.2	The Surface Radiator Dynamic Thermal Characteristic	94
	References.	104
4	Methods of the Radiator Heat Output Control.	109
4.1	The Convector Radiator Heat Output Control.	116
4.2	The Surface Radiator Heat Output Control.	116
4.2.1	The Underfloor Radiator Temperature Control System with a One-Way Thermostatic Valve	117
4.2.2	The Underfloor Radiator Temperature Control System with a Two-Way Thermostatic Valve on the Return Pipe	121
4.2.3	The Underfloor Radiator Temperature Control System with a Two-Way Thermostatic Valve on the Supply Pipe.	124
4.2.4	The Underfloor Radiator Temperature and the Room Temperature Control System with a Thermostatic Control Valve	126
4.2.5	The Underfloor Radiator and the Room Temperature Control System with an Electric Regulator	128
4.2.6	The Underfloor Radiator and the Room Temperature Control System with an Electronic Regulator	130
4.2.7	Control System of a Surface Heating Installation with Numerous Heating Loops	132
4.2.8	The Underfloor Radiator Temperature Control System Using the Return Water Temperature Limiter	135
4.3	The Impact of the Radiator Connection Method on the Heat Output	137
	References.	142
5	The Sizing of Surface Radiators.	145
5.1	The Underfloor Radiator Thermal Calculations and Sizing.	145
5.1.1	Equivalent Resistance Method (Trapezoidal Rule)	153
5.1.2	The Method According to Standard EN 1264.	162
	References.	178
6	Selection of Radiators for Heating Installations Computational Examples	181
