

Contents

1	Introduction	1
1.1	Some Regression Models	2
1.2	Multiple Linear Regression	5
1.3	Variable Selection	9
1.4	Other Issues	13
1.5	Complements	14
1.6	Problems	15
2	Multiple Linear Regression	17
2.1	The MLR Model	17
2.2	Checking Goodness of Fit	20
2.3	Checking Lack of Fit	24
2.3.1	Residual Plots	24
2.3.2	Other Model Violations	28
2.4	The ANOVA F Test	29
2.5	Prediction	36
2.6	The Partial F Test	45
2.7	The Wald t Test	49
2.8	The OLS Criterion	53
2.9	Two Important Special Cases	56
2.9.1	The Location Model	56
2.9.2	Simple Linear Regression	57
2.10	The No Intercept MLR Model	59
2.11	Summary	61
2.12	Complements	64
2.12.1	Lack of Fit Tests	66
2.13	Problems	68
3	Building an MLR Model	85
3.1	Predictor Transformations	86
3.2	Graphical Methods for Response Transformations	92

3.3	Main Effects, Interactions, and Indicators	97
3.4	Variable Selection	99
3.4.1	Bootstrapping Variable Selection	119
3.5	Diagnostics	129
3.6	Outlier Detection	133
3.7	Summary	138
3.8	Complements	141
3.9	Problems	146
4	WLS and Generalized Least Squares	163
4.1	Random Vectors	163
4.2	GLS, WLS, and FGLS	165
4.3	Inference for GLS	170
4.4	Complements	172
4.5	Problems	172
5	One Way Anova	175
5.1	Introduction	175
5.2	Fixed Effects One Way Anova	177
5.3	Random Effects One Way Anova	189
5.4	Response Transformations for Experimental Design	191
5.5	Summary	193
5.6	Complements	197
5.7	Problems	202
6	The K Way Anova Model	213
6.1	Two Way Anova	213
6.2	K Way Anova Models	218
6.3	Summary	219
6.4	Complements	221
6.5	Problems	222
7	Block Designs	227
7.1	One Way Block Designs	227
7.2	Blocking with the K Way Anova Design	233
7.3	Latin Square Designs	234
7.4	Summary	239
7.5	Complements	241
7.6	Problems	242
8	Orthogonal Designs	245
8.1	Factorial Designs	245
8.2	Fractional Factorial Designs	258
8.3	Plackett Burman Designs	263
8.4	Summary	266
8.5	Complements	275
8.6	Problems	277

9	More on Experimental Designs	283
9.1	Split Plot Designs	283
9.1.1	Whole Plots Randomly Assigned to A	284
9.1.2	Whole Plots Assigned to A as in a CRBD	286
9.2	Review of the DOE Models	288
9.3	Summary	291
9.4	Complements	294
9.5	Problems	294
10	Multivariate Models	299
10.1	The Multivariate Normal Distribution	300
10.2	Elliptically Contoured Distributions	303
10.3	Sample Mahalanobis Distances	307
10.4	Complements	309
10.5	Problems	309
11	Theory for Linear Models	313
11.1	Projection Matrices and the Column Space	313
11.2	Quadratic Forms	317
11.3	Least Squares Theory	323
11.3.1	Hypothesis Testing	330
11.4	Nonfull Rank Linear Models	335
11.5	Summary	336
11.6	Complements	338
11.7	Problems	340
12	Multivariate Linear Regression	343
12.1	Introduction	343
12.2	Plots for the Multivariate Linear Regression Model	348
12.3	Asymptotically Optimal Prediction Regions	350
12.4	Testing Hypotheses	356
12.5	An Example and Simulations	367
12.5.1	Simulations for Testing	372
12.5.2	Simulations for Prediction Regions	375
12.6	Summary	377
12.7	Complements	381
12.8	Problems	383
13	GLMs and GAMs	389
13.1	Introduction	389
13.2	Additive Error Regression	393
13.3	Binary, Binomial, and Logistic Regression	394
13.4	Poisson Regression	403
13.5	Inference	410
13.6	Variable Selection	419

13.7	Generalized Additive Models	428
13.7.1	Response Plots	431
13.7.2	The EE Plot for Variable Selection	432
13.7.3	An EE Plot for Checking the GLM	433
13.7.4	Examples	433
13.8	Overdispersion	437
13.9	Complements	440
13.10	Problems	442
14	Stuff for Students	459
14.1	R and Arc	459
14.2	Hints for Selected Problems	465
14.3	Tables	470
	References	473
	Index	489
