

Contents

1	Introduction	1
1.1	Background	1
1.2	Spiking Neurons	2
1.2.1	Biological Background	2
1.2.2	Generations of Neuron Models	3
1.2.3	Spiking Neuron Models	4
1.3	Neural Codes	5
1.3.1	Rate Code	6
1.3.2	Temporal Code	7
1.3.3	Temporal Code Versus Rate Code	7
1.4	Cognitive Learning and Memory in the Brain	8
1.4.1	Temporal Learning	8
1.4.2	Cognitive Memory in the Brain	11
1.5	Objectives and Contributions	12
1.6	Outline of the Book	14
	References	15
2	Rapid Feedforward Computation by Temporal Encoding and Learning with Spiking Neurons	19
2.1	Introduction	19
2.2	The Spiking Neural Network	21
2.3	Single-Spike Temporal Coding	22
2.4	Temporal Learning Rule	26
2.4.1	The Tempotron Rule	26
2.4.2	The ReSuMe Rule	27
2.4.3	The Tempotron-Like ReSuMe Rule	28
2.5	Simulation Results	29
2.5.1	The Data Set and the Classification Problem	29
2.5.2	Encoding Images	30
2.5.3	Choosing Among Temporal Learning Rules	30

2.5.4	The Properties of Tempotron Rule	32
2.5.5	Recognition Performance	34
2.6	Discussion	37
2.6.1	Encoding Benefits from Biology	37
2.6.2	Types of Synapses	37
2.6.3	Schemes of Readout	38
2.6.4	Extension of the Network for Robust Sound Recognition.	38
2.7	Conclusion	39
	References.	39
3	A Spike-Timing Based Integrated Model for Pattern Recognition	43
3.1	Introduction	43
3.2	The Integrated Model	45
3.2.1	Neuron Model and General Structure	45
3.2.2	Latency-Phase Encoding	46
3.2.3	Supervised Spike-Timing Based Learning.	49
3.3	Numerical Simulations	50
3.3.1	Network Architecture and Encoding of Grayscale Images	51
3.3.2	Learning Performance	52
3.3.3	Generalization Capability	53
3.3.4	Parameters Evaluation.	55
3.3.5	Capacity of the Integrated System.	57
3.4	Related Works	59
3.5	Conclusions	60
	References.	61
4	Precise-Spike-Driven Synaptic Plasticity for Hetero Association of Spatiotemporal Spike Patterns	65
4.1	Introduction	65
4.2	Methods	67
4.2.1	Spiking Neuron Model	67
4.2.2	PSD Learning Rule	68
4.3	Results	71
4.3.1	Association of Single-Spike and Multi-spike Patterns	71
4.3.2	Generality to Different Neuron Models	76
4.3.3	Robustness to Noise	77
4.3.4	Learning Capacity	79
4.3.5	Effects of Learning Parameters	81
4.3.6	Classification of Spatiotemporal Patterns.	83
4.4	Discussion and Conclusion.	84
	References.	86

5 A Spiking Neural Network System for Robust Sequence Recognition	
Recognition	89
5.1 Introduction	89
5.2 The Integrated Network for Sequence Recognition.	91
5.2.1 Rationale of the Whole System.	91
5.2.2 Neural Encoding Method	92
5.2.3 Item Recognition with the PSD Rule	94
5.2.4 The Spike Sequence Decoding Method.	94
5.3 Experimental Results	97
5.3.1 Learning Performance Analysis of the PSD Rule	97
5.3.2 Item Recognition.	100
5.3.3 Spike Sequence Decoding.	105
5.3.4 Sequence Recognition System.	107
5.4 Discussions.	110
5.4.1 Temporal Learning Rules and Spiking Neurons	110
5.4.2 Spike Sequence Decoding Network	110
5.4.3 Potential Applications in Authentication	111
5.5 Conclusion	112
References.	112
6 Temporal Learning in Multilayer Spiking Neural Networks Through Construction of Causal Connections.	115
6.1 Introduction	115
6.2 Multilayer Learning Rules	116
6.2.1 Spiking Neuron Model	116
6.2.2 Multilayer PSD Rule.	117
6.2.3 Multilayer Tempotron Rule.	119
6.3 Heuristic Discussion on the Multilayer Learning Rules	120
6.4 Simulation Results	121
6.4.1 Construction of Causal Connections	121
6.4.2 The XOR Benchmark	123
6.4.3 The Iris Benchmark.	127
6.5 Discussion and Conclusion.	128
References.	129
7 A Hierarchically Organized Memory Model with Temporal Population Coding.	131
7.1 Introduction	131
7.2 The Hierarchical Organized Memory Model.	133
7.2.1 Neuron Models and Neural Oscillations	133
7.2.2 Temporal Population Coding.	135
7.2.3 The Tempotron Learning and STDP.	135

7.3	Simulation Results	136
7.3.1	Auto-Associative Memory.	142
7.3.2	Episodic Memory	145
7.4	Discussion	147
7.4.1	Information Flow and Emergence of Neural Cliques.	147
7.4.2	Storage, Recall and Organization of Memory	148
7.4.3	Temporal Compression and Information Binding	149
7.4.4	Related Works	149
7.5	Conclusion	150
	References.	151
8	Spiking Neuron Based Cognitive Memory Model.	153
8.1	Introduction	153
8.2	SRM-Based CA3 Model.	155
8.2.1	Spike Response Model	156
8.2.2	SRM-Based Pyramidal Cell.	156
8.2.3	SRM-Based Interneuron	159
8.3	Convergence of Synaptic Weight	160
8.4	Maximum Synaptic Weight to Prevent Early Activation.	161
8.5	Pattern Completion of Auto-Associative Memory.	163
8.6	Discussion	164
8.7	Conclusion	169
	References.	170

Neuromorphic Cognitive Systems
A Learning and Memory Centered Approach
Yu, Q.; Tang, H.; Hu, J.; Tan, K.C.
2017, XIV, 172 p., Hardcover
ISBN: 978-3-319-55308-5
