1	Introduction	1
1.1	Prescriptive Analytics	3
1.2	Scope of This Work	4
1.3	Outline of the Following Chapters	4
1.4	A Recipe for ADP in SDVRPs	6
1.4.1	The Application	6
1.4.2	The Model	7
1.4.3	Anticipatory Approaches	8
 Part I Dynamic Vehicle Routing		
2	Rich Vehicle Routing: Environment	15
2.1	Vehicle Routing	15
2.2	RVPR: Characteristics and Definition	16
2.3	RVRPs in Logistics Management	17
2.4	RVRPs in Hierarchical Decision Making	18
2.5	Recent Developments of the RVRP-Environment	19
2.5.1	E-Commerce and Globalization	19
2.5.2	Urbanization and Demography	20
2.5.3	Urban Environment and Municipal Regulations	21
2.5.4	Technology	22
2.5.5	Data and Forecasting	22
2.6	Implications	24
3	Rich Vehicle Routing: Applications	25
3.1	General RVRP-Entities	26
3.1.1	Infrastructure	26
3.1.2	Vehicles	26
3.1.3	Customers	27
3.2	Plans	27

3.3	Objectives	28
3.3.1	Costs	28
3.3.2	Reliability	28
3.3.3	Objective Measures	29
3.4	Constraints	29
3.4.1	Time Windows	29
3.4.2	Working Hours	29
3.4.3	Capacities	30
3.5	Drivers of Uncertainty	30
3.5.1	Travel Times	30
3.5.2	Service Times	30
3.5.3	Demands	31
3.5.4	Requests	31
3.6	Classification	31
3.7	Service Vehicles	32
3.8	Transportation Vehicles	34
3.8.1	Passenger Transportation	34
3.8.2	Transportation of Goods	35
3.9	Implications	37
3.9.1	Decision Support	37
3.9.2	Modeling of Planning Situations	38
3.9.3	Modeling of Uncertainty	38
3.9.4	Modeling of Subsequent Planning	38
3.9.5	Modeling of Applications	39
3.9.6	Modeling of Anticipation	39
3.9.7	Anticipatory Methods	39
4	Modeling	41
4.1	Stochastic Dynamic Decision Problem	41
4.1.1	Dynamic Decision Problems	42
4.2	Markov Decision Process	43
4.2.1	Definition	43
4.2.2	Decision Policies and Problem Realizations	44
4.3	Stochastic Dynamic Vehicle Routing	45
4.4	Modeling Planning Situations	46
4.4.1	Decision State	46
4.4.2	Decision Making	48
4.5	Modeling Uncertainty	49
4.5.1	Deterministic Modeling	49
4.5.2	Travel Time	49
4.5.3	Service Time	51
4.5.4	Demands	51
4.5.5	Requests	52
4.5.6	Stochastic Transitions in SDVRPs	54

4.6	Modeling SDVRPs as MDPs	54
4.6.1	Decision Points	55
4.6.2	Travel Times	55
4.6.3	Service Times	57
4.6.4	Demands	57
4.6.5	Requests	58
4.7	Vehicle Routing with Recourse Actions	59
4.8	Route-Based Markov Decision Process.	59
4.9	Implications	60
4.9.1	Properties of SDVRP.	60
4.9.2	Definition, Reconstruction, and Simulation	60
4.9.3	Anticipation and Prescriptive Analytics	61
5	Anticipation	63
5.1	Definition	63
5.2	Anticipation in SDVRPs.	64
5.3	Perfect Anticipation	65
5.3.1	Optimal Policies	65
5.3.2	Derivation of Optimal Policies	66
5.3.3	Limitations	67
5.4	Classification of Anticipation	67
5.4.1	Reactive Versus Non-reactive	68
5.4.2	Implicit, Explicit, and Perfect	68
5.4.3	Focus of Anticipation: Offline and Online.	68
5.5	Reactive Explicit Anticipation	69
6	Anticipatory Solution Approaches	71
6.1	Non-reactive Anticipation	71
6.1.1	Non-reactive Implicit Anticipation.	71
6.1.2	Non-reactive Explicit Anticipation.	72
6.2	Reactive Anticipation	72
6.2.1	Reactive Implicit Anticipation	73
6.2.2	Reactive Explicit Anticipation	74
6.2.3	Approximate Dynamic Programming.	74
6.2.4	Reducing the SDP.	75
6.2.5	Resulting Approaches	76
6.3	Lookahead and Rollout Algorithm	76
6.3.1	Functionality	78
6.3.2	Efficient Computing: Indifference Zone Selection	78
6.4	Value Function Approximation.	84
6.5	Approximate Value Iteration.	85
6.5.1	Post-decision State Space Representation	87
6.5.2	Aggregation.	88
6.5.3	Partitioning: Lookup Table	88

6.5.4	Efficient Approximation Versus Effective Decision Making	89
6.5.5	Equidistant Lookup Table	91
6.5.6	Weighted Lookup Table	91
6.5.7	Dynamic Lookup Table	92
6.6	Hybrid Reactive Explicit Anticipation	96
6.6.1	Motivation	97
6.6.2	Hybrid Rollout Algorithm	97
6.6.3	Example: Comparison of Online and Hybrid RAs.	98
7	Literature Classification	103
7.1	Classification	104
7.2	Travel Times	104
7.3	Service Times	106
7.4	Demands	106
7.5	Requests	107
7.6	Analysis	109
7.6.1	Time Distribution	109
7.6.2	Problem	110
7.6.3	Approaches	112
7.7	Implications	112
 Part II Stochastic Customer Requests		
8	Motivation	117
8.1	Application	117
8.2	Replanning and Anticipation	119
8.3	Outline	122
9	SDVRP with Stochastic Requests	123
9.1	Problem Statement	123
9.2	Markov Decision Process Formulation	125
9.3	Literature Review	127
10	Solution Algorithms	131
10.1	Routing and Sequencing Decisions	132
10.1.1	Subset Selection	132
10.1.2	Cheapest Insertion	133
10.1.3	Improvements	134
10.2	Myopic Policy	134
10.3	Non-reactive Implicit: Waiting Policies	135
10.4	Non-reactive Explicit: Anticipatory Insertion	135
10.5	Non-reactive Explicit: Cost Benefit	136

10.6	Offline Reactive Explicit: ATB	137
10.6.1	Aggregation and Partitioning	137
10.6.2	Extending the AVI-Vector Space.	142
10.7	Online Reactive Explicit: Ad Hoc Sampling.	143
10.8	Online/Hybrid Reactive Explicit: Rollout Algorithm.	145
10.8.1	Myopic-Based Rollout Algorithm	145
10.8.2	ATB-Based Rollout Algorithm	146
11	Computational Evaluation	147
11.1	Instances	147
11.2	Parameter Tuning	149
11.2.1	Non-reactive	149
11.2.2	Reactive.	150
11.3	Non-reactive Versus Offline Reactive	151
11.4	Offline Reactive Anticipation	154
11.4.1	Routing and Subset Selection	161
11.4.2	Budgeting Time.	163
11.5	Online Reactive Anticipation	166
11.5.1	Online Versus Offline Anticipation	167
11.5.2	Runtime.	167
11.5.3	Sample Runs	168
11.5.4	Indifference Zone Selection	171
11.5.5	Hybrid Anticipation.	173
11.5.6	Spatial Versus Temporal Anticipation	174
11.6	Implications	176
12	Conclusion and Outlook	177
12.1	Summary	177
12.2	Managerial Implications	178
12.3	Future Research	179
12.3.1	Application Fields	179
12.3.2	Reactive Anticipation for SDVRPs	180
