

Contents

1	Introduction to Service Oriented Architecture	1
1.1	The Service Oriented Architecture Paradigm	1
1.1.1	Goals of Service Orientation	2
1.1.2	What Is a Service?	5
1.1.3	The SOA Architectural Stack	6
1.2	Service Composition and Data-Flow	11
1.2.1	Data-Flow Paradigms	12
1.2.2	Composition Techniques	13
1.2.3	End-User Mashups	14
1.3	Goals, Structure and Organization	14
1.4	Lab Exercise 00 – Practical Exercise Environment Setup	15
1.4.1	SOA-Book Github Site	16
1.4.2	Preliminaries	16
1.4.3	Installing Apache Maven and Eclipse Maven Plug-in	18
2	Web Services – SOAP and WSDL	25
2.1	Simple Object Access Protocol (SOAP)	26
2.1.1	Binding SOAP Messages to a Transportation Protocol	29
2.1.2	SOAP Extension Using SOAP Headers	31
2.2	Web Services Description Language (WSDL)	32
2.3	WSDL Main Elements	33
2.4	Message Communication Model in SOAP/WSDL	39
2.4.1	RPC-Style	40
2.4.2	Document-Style	41
2.5	Lab Exercise 01 – Developing Simple Web Services with Apache CXF and Maven	42
2.5.1	Activity 1: HelloWorld with Apache CXF	42
2.5.2	Activity 2: Building Simple Services	46

2.6	Lab Exercise 02: Fault Handling in Apache CXF and Web Service Client Development	54
2.6.1	Activity 1: Adding SOAP Faults to TopDownSimpleService	54
2.6.2	Activity 2: Developing a Web Service Client Application	62
3	Web Services – REST or Restful Services.	67
3.1	REST Design Principles	67
3.2	Resources	68
3.3	Resource Identification	68
3.4	Addressability	69
3.5	Statelessness	70
3.6	Resource Representations	71
3.7	Uniform Interfaces in REST	72
3.8	Web API Design for RESTful Services	73
3.8.1	Designing URIs	73
3.8.2	Design of the Responses	74
3.8.3	HATEOAS – Taking Your API to the Next Level	75
3.9	REST-Based Service Implementation	78
3.9.1	Building REST Web Services	78
3.10	Lab Exercise 03: A Simple REST Service with Apache CXF (JAX-RS)	84
3.10.1	Activity 1: Start with Hello World	85
3.10.2	Activity 2: Testing the HelloWorld Service	87
3.10.3	Activity 3: CRUD Operations on Resources	88
3.10.4	Activity 4: Developing a Client for RESTful Services	90
4	Web Services – Data Services.	93
4.1	Data Services	93
4.1.1	WS-* and RESTful Services	93
4.1.2	Data Access as a Service	94
4.2	Implementing Data Services	95
4.3	XML Transformation and Query Techniques	96
4.3.1	XPath	96
4.3.2	XSLT	102
4.3.3	XQuery	127
4.4	Exposing Data as Services	140
4.5	Lab04: Data Service Enablers – XSLT and XQuery	143
4.5.1	Working Through XSLT Examples	143
4.5.2	Working Through XQuery Examples	147

5	Web Service Composition: Overview	149
5.1	From Atomic to Composite Services	150
5.2	Service Orchestration vs. Service Choreography	152
5.3	Service Composition View from Orchestration and Choreography	152
5.4	Benefits of Web Service Composition	155
5.5	Web Service Composition Environment	156
6	Web Service Composition: Control Flows	159
6.1	BPEL (Business Process Execution Language)	159
6.1.1	BPEL Model	160
6.1.2	BPEL Example	164
6.2	BPMN (Business Process Model and Notation)	166
6.2.1	BPMN Model	171
6.2.2	BPMN Example	175
6.3	Lab Exercise 05: Web Service Composition with BPEL and Apache ODE	176
6.3.1	Software Setup	177
6.3.2	Activity 1: Hello World in BPEL	180
6.3.3	Activity 2: Simple HomeLoan Process Service	185
7	Web Service Composition: Data Flows	193
7.1	Data-Flow Paradigms	193
7.1.1	Blackboard	193
7.1.2	Explicit Data Flow	196
8	Service Component Architecture (SCA)	203
8.1	Introduction to SCA	203
8.1.1	The SOA Integration Problem	204
8.1.2	Overview of SCA	205
8.1.3	Application of SCA to Use Case	208
8.1.4	SCA Runtime	209
8.1.5	Benefits of SCA	209
8.2	The Stock Application	210
8.3	The SCA Assembly Model	211
8.3.1	SCA Composite	211
8.3.2	SCA Component	212
8.4	Lab Exercise 06: SCA	229
8.4.1	Activity 1: Building the First SCA Composite – Hello World Service	230
8.4.2	Activity 2: Building the Stock Application	238
9	Conclusion	251
	References	253
	Index	255

Web Service Implementation and Composition
Techniques

Paik, H.H.-Y.; Lemos, A.L.; Barukh, M.C.; Benatallah, B.;
Natarajan, A.

2017, XIII, 256 p. 102 illus., 80 illus. in color., Hardcover
