## Volume I

<b>ANHA Series Preface .....</b>	<b>v</b>
<b>Preface .....</b>	<b>ix</b>
<b>Part I Introduction</b>	
<b>Frames: Theory and Practice .....</b>	<b>3</b>
Isaac Pesenson	
<b>Part II Frames in Abstract Spaces</b>	
<b>Dynamical Sampling and Systems from Iterative Actions     of Operators .....</b>	<b>15</b>
Akram Aldroubi and Armenak Petrosyan	
<b>Optimization Methods for Frame Conditioning and     Application to Graph Laplacian Scaling .....</b>	<b>27</b>
Radu Balan, Matthew Begué, Chae Clark, and Kasso Okoudjou	
<b>A Guide to Localized Frames and Applications     to Galerkin-Like Representations of Operators .....</b>	<b>47</b>
Peter Balazs and Karlheinz Gröchenig	
<b>Computing the Distance Between Frames and Between     Subspaces of a Hilbert Space .....</b>	<b>81</b>
Travis Bemrose, Peter G. Casazza, Desai Cheng, John Haas, and Hanh Van Nguyen	
<b>Sigma-Delta Quantization for Fusion Frames and Distributed     Sensor Networks.....</b>	<b>101</b>
Jiayi Jiang and Alexander M. Powell	

### Part III Space-Frequency Analysis in Function Spaces on $\mathbb{R}^n$

<b>Recent Progress in Shearlet Theory: Systematic Construction of Shearlet Dilation Groups, Characterization of Wavefront Sets, and New Embeddings</b> .....	127
Giovanni S. Alverti, Stephan Dahlke, Filippo De Mari, Ernesto De Vito, and Hartmut Führ	
<b>Numerical Solution to an Energy Concentration Problem Associated with the Special Affine Fourier Transformation</b> .....	161
Amara Ammari, Tahar Moumni, and Ahmed Zayed	
<b>A Frame Reconstruction Algorithm with Applications to Magnetic Resonance Imaging</b> .....	185
John J. Benedetto, Alfredo Nava-Tudela, Alexander M. Powell, and Yang Wang	
<b>Frame Properties of Shifts of Prolate and Bandpass Prolate Functions</b> .....	215
Jeffrey A. Hogan and Joseph D. Lakey	
<b>Fast Fourier Transforms for Spherical Gauss-Laguerre Basis Functions</b> .....	237
Jürgen Prestin and Christian Wülker	
<b>Multiscale Radial Basis Functions</b> .....	265
Holger Wendland	

### Part IV Frames in Spaces of Functions on Manifold and Groups

<b>Orthogonal Wavelet Frames on Manifolds Based on Conformal Mappings</b> .....	303
Swanhild Bernstein and Paul Keydel	
<b>Quasi Monte Carlo Integration and Kernel-Based Function Approximation on Grassmannians</b> .....	333
Anna Breger, Martin Ehler, and Manuel Gräf	
<b>Construction of Multiresolution Analysis Based on Localized Reproducing Kernels</b> .....	355
K. Nowak and M. Pap	
<b>Regular Sampling on Metabelian Nilpotent Lie Groups: The Multiplicity-Free Case</b> .....	377
Vignon S. Oussa	
<b>Parseval Space-Frequency Localized Frames on Sub-Riemannian Compact Homogeneous Manifolds</b> .....	413
Isaac Pesenson	

## Volume II

<b>ANHA Series Preface</b> .....	v
<b>Preface</b> .....	ix
<b>Part I Introduction</b>	
<b>Frames: Theory and Practice</b> .....	441
Isaac Pesenson	
<b>Part II Fourier Analysis, Its Generalizations and Applications</b>	
<b>Characterization of Gevrey Regularity by a Class of FBI Transforms</b> .....	451
S. Berhanu and Abraham Hailu	
<b>A Novel Mathematical Approach to the Theory of Translation Invariant Linear Systems</b> .....	483
Hans G. Feichtinger	
<b>Asymptotic Behavior of the Fourier Transform of a Function of Bounded Variation</b> .....	517
Elijah Liflyand	
<b>Convergence and Regularization of Sampling Series</b> .....	533
W.R. Madych	
<b>Part III Analysis on Non-Euclidean Spaces</b>	
<b>Harmonic Analysis in Non-Euclidean Spaces: Theory and Application</b> .....	565
Stephen D. Casey	
<b>A Harmonic Analysis of Directed Graphs from Arithmetic Functions and Primes</b> .....	603
Ilwoo Cho and Palle E.T. Jorgensen	
<b>Sheaf and Duality Methods for Analyzing Multi-Model Systems</b> ...	653
Michael Robinson	
<b>Part IV Harmonic Analysis and Differential Equations</b>	
<b>On Boundary-Value Problems for a Partial Differential Equation with Caputo and Bessel Operators</b> .....	707
Praveen Agarwal, Erkinjon Karimov, Murat Mamchuev, and Michael Ruzhansky	

<b>On the Solvability of the Zaremba Problem in Infinite Sectors and the Invertibility of Associated Singular Integral Operators.....</b>	<b>719</b>
Hussein Awala, Irina Mitrea, and Katharine Ott	

<b>On the Solution of the Oblique Derivative Problem by Constructive Runge-Walsh Concepts.....</b>	<b>753</b>
Willi Freeden and Helga Nutz	

## **Part V Harmonic Analysis for Data Science**

<b>An Overview of Numerical Acceleration Techniques for Nonlinear Dimension Reduction .....</b>	<b>797</b>
Wojciech Czaja, Timothy Doster, and Avner Halevy	

<b>Adaptive Density Estimation on the Circle by Nearly Tight Frames.....</b>	<b>831</b>
Claudio Durastanti	

<b>Interactions Between Kernels, Frames, and Persistent Homology .....</b>	<b>861</b>
Mijail Guillemard and Armin Iske	

<b>Multi-Penalty Regularization for Detecting Relevant Variables .....</b>	<b>889</b>
Kateřina Hlaváčková-Schindler, Valeriya Naumova, and Sergiy Pereverzyev Jr.	

<b>Stable Likelihood Computation for Gaussian Random Fields .....</b>	<b>917</b>
Michael McCourt and Gregory E. Fasshauer	

Frames and Other Bases in Abstract and Function  
Spaces

Novel Methods in Harmonic Analysis, Volume 1

Pesenson, I.; Le Gia, Q.T.; Mayeli, A.; Mhaskar, H.; Zhou,  
D.-X. (Eds.)

2017, XIV, 438 p. 62 illus., 41 illus. in color., Hardcover

ISBN: 978-3-319-55549-2

A product of Birkhäuser Basel
