Contents

1 Introduction 1
References 4

2 Fire Safety and Building Heritage: The Occupants Perspective 7
2.1 Safety in (and of) Building Heritage: Main Issues and Concepts 7
2.2 Fire Safety in Building Heritage 10
2.3 The Traditional Fire Safety Approach 13
2.4 Behavioral Issues in a Fire as Exposure-Increasing Factors: Beyond the Performance-Based Approach 18
2.4.1 Man-Environment Interactions in Building Heritage Evacuation 18
2.4.2 Representing and Simulating Human Behaviors: The Performance-Based Approach 28
2.4.3 How to Help Occupants: Problems to Be Solved 36
References 38

3 How to Increase Occupants Safety with No Architectural Modifications: Defining Effective Wayfinding Systems 45
3.1 Wayfinding as a Low-Impact Solution for Fire Safety in Building Heritage 45
3.2 Passive Wayfinding Systems: Punctual and Continuous Solutions 50
3.3 "Active" Wayfinding Systems: The Intelligent Evacuation Guidance Systems 55
3.4 Evaluating Wayfinding Systems Effectiveness 59
3.4.1 Experimental Drills 61
3.4.2 Simulation Software 64
3.4.3 Key Performance Indicators 67
References 70

4 Application to a Case Study: Fire Safety in Historical Theaters 77
4.1 Historical Theaters and Fire Safety: An Overview 77
4.1.1 The Italian-Style Historical Theater as Significant Environment: The Gentile da Fabriano Theater Case-Study 81
4.2 Punctual and Continuous Systems Evaluation: A Comparison Through Egress Drills 86
4.2.1 CWS Proposal and Comparison with PWS 86
4.2.2 Experimental Activities 87
4.3 IEGS Evaluation: A Comparison Through Simulations 95
4.3.1 IEGS Proposal 95
4.3.2 IEGS Effectiveness Analysis 97
4.4 General Remarks 101
References 102

5 Conclusions and Perspectives 105
5.1 Building Heritage Fire Safety and Wayfinding Solutions 105
5.2 Building Heritage and BD Approach: New Perspectives of Works 107
