1	An introduction to the 4th edition of the International Workshop on Functional and Operatorial Statistics	1
	Germán Aneiros, Enea G. Bongiorno, Ricardo Cao and Philippe Vieu	
1.1	Functional Data Analysis along the last decade	1
1.2	On Peter Hall's impact on IWFOs conferences	2
1.3	Methodological contribution for Statistics with Functional Data	3
1.4	Contribution on Mathematical background for Infinite Dimensional Statistics	3
1.5	Applied Functional Data Analysis contributions	4
1.6	Contributions on related fields	4
1.7	Concluding comments	4
	References	5
2	Robust fusion methods for Big Data	7
	Catherine Aaron, Alejandro Cholaquidis, Ricardo Fraiman and Badih Ghattas	
2.1	Introduction	7
2.2	A general setup for RFM.	8
2.3	Robust Fusion for covariance operator	11
	References	14
3	Functional linear regression models for scalar responses on remote sensing data: an application to Oceanography	15
	Nihan Acar-Denizli, Pedro Delicado, Gülay Başarır and Isabel Caballero	
3.1	Introduction	15
3.2	Methods	16
3.3	Data	17
3.4	Results	18
3.5	Conclusions	20
	References	21

4	A diagonal componentwise approach for ARB(1) prediction	23
	Javier Álvarez-Liébana and M. Dolores Ruiz-Medina	
4.1	Introduction.	23
4.2	Preliminaries: ARB(1) general framework and estimator of autocorrelation operator.	24
4.3	Strong-consistency results: ARH(1) framework.	27
4.4	Strong-consistency results: ARC(1) framework.	28
4.5	Final comments and open research lines.	29
	References	30
5	A general sparse modeling approach for regression problems involving functional data	33
	Germán Aneiros and Philippe Vieu	
5.1	Difference and similarities between High Dimensional and Functional problems in Statistics	33
5.2	A short discussion on sparse functional regression models	34
5.3	The two-stage splitting ideas for impact points selection in functional regression	35
5.4	About the properties of the functional two-stage selection procedure	37
5.5	Future work	38
	References	38
6	A time-dependent PDE regularization to model functional data defined over spatio-temporal domains	41
	Eleonora Arnone, Laura Azzimonti, Fabio Nobile and Laura M. Sangalli	
6.1	Space-Time Regression with PDE Penalization	41
6.2	Motivating application	42
	References	43
7	An asymptotic factorization of the Small-Ball Probability: theory and estimates	45
	Jean-Baptiste Aubin, Enea G. Bongiorno and Aldo Goia	
7.1	Introduction	45
7.2	Framework and Notations	46
7.3	Estimates	48
7.4	Conclusions	49
	References	49
8	Estimating invertible functional time series	51
	Alexander Aue and Johannes Klepsch	
8.1	Introduction	51
8.2	Estimation methodology	52
8.3	Algorithms.	53
8.4	Large-sample properties	55
8.5	Empirical results	56
	References	57

9	On the Geometric Brownian Motion assumption for financial time series	59
	Enea G. Bongiorno, Aldo Goia and Philippe Vieu	
9.1	Introduction	59
9.2	Recognizing some Brownian functionals	60
9.3	Analysis of financial time series	61
	References	64
10	Commutator of projectors and of unitary operators	67
	Alain Boudou and Sylvie Viguier-Pla	
10.1	Introduction	67
10.2	Prerequisites, recalls and notation	68
10.3	Commutator of two projectors	70
10.4	Commutator of a projector and of a unitary operator	71
10.5	Commutator of two unitary operators	73
	References	74
11	Permutation tests in the two-sample problem for functional data	77
	Alejandra Cabaña, Ana M. Estrada, Jairo Peña and Adolfo J. Quiroz	
11.1	Introduction	77
11.2	Schilling's type test	78
11.3	Depths-based tests	79
11.4	Empirical comparison of powers and real data applications	81
	References	84
12	Functional data analysis of "Omics" data: how does the genomic landscape influence integration and fixation of endogenous retroviruses?	87
	Marzia A. Cremona, Rebeca Campos-Sánchez, Alessia Pini, Simone Vantini, Kateryna D. Makova and Francesca Chiaromonte	
12.1	Introduction and motivations	87
12.2	Data	88
12.3	Methods	90
12.4	Results	91
12.5	Conclusion	92
	References	92
13	Functional data analysis in kinematics of children going to school	95
	Manuel Escabias, Ana M. Aguilera, Jose M. Heredia-Jiménez and Eva Orantes-González	
13.1	Introduction	95
13.2	Data	97
13.3	Functional data analysis with repeated measures	98
13.4	Functional principal component analysis	100
13.5	ANOVA modelling	100
	References	102

14	Parameter estimation of the functional linear model with scalar response with responses missing at random	105
	Manuel Febrero-Bande, Pedro Galeano and Wenceslao González-Manteiga	
14.1	Introduction	105
14.2	The functional linear model with scalar response	106
14.3	Estimation and prediction with responses missing at random	108
	References	110
15	Variable selection in Functional Additive Regression Models	113
	Manuel Febrero-Bande, Wenceslao González-Manteiga and Manuel Oviedo de la Fuente	
15.1	Introduction	113
15.2	The procedure	117
15.3	Real data application	119
	References	121
16	Functional data analysis approach of Mandel's h and k statistics in Interlaboratory Studies	123
	Miguel Flores, Salvador Naya, Javier Tarrío-Saavedra and Rubén Fernández-Casal	
16.1	Introduction	123
16.2	$H(t)$ and $K(t)$ statistics for functional data	125
16.3	Bootstrap algorithm	127
16.4	A simulation study	127
	References	130
17	High-dimensional functional time series forecasting	131
	Yuan Gao, Hanlin L. Shang and Yanrong Yang	
17.1	Introduction	131
17.2	Research methods	132
17.3	Empirical studies	135
	References	136
18	Essentials of backward nested descriptors inference	137
	Stephan F. Huckemann and Benjamin Eltzner	
18.1	Introduction	137
18.2	Setup	138
18.3	Assumptions	140
18.4	Asymptotic Theorems	142
	References	144
19	Two-sample tests for multivariate functional data	145
	Qing Jiang, Simos G. Meintanis and Lixing Zhu	
19.1	Introduction	145
19.2	Test Statistics	146
19.3	Computations and Interpretations	148

19.4	Resampling procedures	151
19.5	Conclusion	152
	References	152
20	Functional quantile regression: local linear modelisation	155
	Zoulikha Kaid and Ali Laksaci	
20.1	Introduction	155
20.2	The model and the estimator	156
20.3	Main results	157
	References	159
21	Uniform in the smoothing parameter consistency results in functional regression	161
	Lydia Kara-Zaïtri, Ali Laksaci, Mustapha Rachdi and Philippe Vieu	
21.1	Introduction	161
21.2	Study framework	162
21.3	Generalized regression kernel estimator	163
21.4	Generalized regression kNN type estimator	165
21.5	Conclusion and prospects	166
	References	166
22	Functional data analysis of neuroimaging signals associated with cerebral activity in the brain cortex	169
	Eardi Lila, John A. D. Aston, Laura M. Sangalli	
22.1	Motivating application	169
22.2	Principal component analysis of functional data observed over two-dimensional manifolds	170
	References	172
23	On asymptotic properties of functional conditional mode estimation with both stationary ergodic and responses MAR	173
	Nengxiang Ling, Yang Liu and Philippe Vieu	
23.1	Introduction	173
23.2	Model and methodology	174
23.3	Asymptotic properties	176
23.4	Further research	177
	References	178
24	Predicting the physiological limits of sport stress tests with functional data	179
	Marcos Matabuena, Mario Francisco-Fernández and Ricardo Cao	
24.1	Introduction	179
24.2	Material and methods	181
24.3	Statistical procedure	181
24.4	Results	182
24.5	Conclusions	184
	References	185

25	An overview of consistency results for depth functionals	189
	Stanislav Nagy	
25.1	Functional Data Depth	189
25.2	Band Depth	191
25.3	Infimal Depth	192
25.4	Integrated Depth	193
25.5	Depth for Imperfectly Observed Random Functions	194
25.6	Depth for Discontinuous Random Functions	195
	References	196
26	Statistical functional depth	197
	Alicia Nieto-Reyes and Heather Battey	
26.1	Introduction	197
26.2	Definition	199
26.3	Implications of the functional depth properties	200
	References	201
27	Differential interval-wise testing for local inference in Sobolev spaces	203
	Alessia Pini, Lorenzo Spreafico, Simone Vantini and Alessandro Vietti	
27.1	Introduction	203
27.2	Methodology	204
27.3	Data Analysis	206
27.4	Conclusions	208
	References	209
28	Hotelling in Wonderland	211
	Alessia Pini, Aymeric Stamm and Simone Vantini	
28.1	Introduction	211
28.2	Hotelling's T^2 revisited	212
28.3	Hotelling's T^2 in Hilbert spaces	213
	References	215
29	Confidence and prediction intervals in semi-functional partial linear regression	217
	Paula Raña, Germán Aneiros, Philippe Vieu and Juan Vilar	
29.1	Introduction	217
29.2	Semi-functional partial linear regression	218
29.3	Bootstrap in the SFPL model	219
29.4	Building the confidence intervals	221
29.5	Building the prediction intervals	222
29.6	Concluding remarks	223
	References	224

30	Linear causality in the sense of Granger with stationary functional time series	225
	Matthieu Saumard	
30.1	Introduction	225
30.2	Linear causality with two functional time series	226
30.3	Testing linear causality in the autoregressive model	227
30.4	Conclusion	231
	References	231
31	Grouped multivariate functional time series method: An application to mortality forecasting	233
	Han Lin Shang and Yang Yang	
31.1	Introduction	233
31.2	Japanese data set	234
31.3	Multivariate functional principal component analysis	234
31.4	Grouped functional time series forecasting techniques	236
31.5	Results of the point forecasts	239
	References	241
32	Tests for separability in nonparametric covariance operators of random surfaces	243
	Shahin Tavakoli, Davide Pigoli and John A. D. Aston	
32.1	Introduction	243
32.2	Separable Covariances: definitions, estimators and asymptotic results	245
32.3	Application to acoustic phonetic data	248
	References	249
33	Contribution of functional approach to the classification and the identification of acoustic emission source mechanisms	251
	Oumar I. Traore, Paul Cristini, Nathalie Favretto-Cristini, Laurent Pantera, Philippe Vieu and Sylvie Viguier-Pla	
33.1	Context of the study and Raw data processing	252
33.2	Unsupervised classification method and parameters settings	255
33.3	Some analysis results	256
33.4	conclusion	257
	References	258
34	Parameter regimes in partially functional linear regression for panel data	261
	Fabian Walders and Dominik Liebl	
34.1	Introduction	261
34.2	Model	262
34.3	Estimation	263
34.4	Asymptotic Theory	265
34.5	Regime Dependent Pricing of Idiosyncratic Risk	267

34.6	Conclusion	269
	References	270
35	Registration for exponential family functional data	271
	Julia Wrobel and Jeff Goldsmith	
35.1	Introduction	271
35.2	Methods	272
35.3	Data Analysis	274
	References	276
36	Random functional variable and Fourier series	279
	Jiří Zelinka	
36.1	Introduction	279
36.2	Decomposition into components in L^2	280
36.3	Simulations	282
36.4	Normally distributed components	284
	References	285
