

Contents

1	Introduction: The African Diaspora and Disease-Specific Disparities	1
1.1	The African Diaspora	1
1.2	Disease-Specific Disparities of the African Diaspora	2
1.3	Why the Disparity in Health?	7
1.4	Health Disparities Are a Complex Combination of Several Causal Factors	9
1.5	Summary	11
	References	12
 Part I: Genetic Factors		
2	Genetic Basis of Health Disparity	17
2.1	Introduction: Genetic Basis of Human Diseases	17
2.2	What Gives Rise to Genetic Variation?	20
2.3	Tools for Studying Genetic Variants	21
2.4	Genetic Variation in the African Population	25
2.5	Infectious Diseases and Inherited Conditions in African Populations	27
2.6	Non-Communicable Diseases	32
2.7	GWAS in the African Population	32
2.8	Genetic Variation in the African Diaspora—The African-American Population	33
2.9	Cardiovascular Disease (CVD) Disparities	34
2.10	Diabetes	38
2.11	Obesity	42
2.12	Kidney Disease	44
2.13	Genetic Variants in Dementia (Alzheimer’s)	46
2.14	Septicemia-Sepsis	48
2.15	Pneumonia and Influenza	49

2.16	Cancer	50
2.17	Summary	59
	References.	62
3	The Role of Epigenetics	75
3.1	Introduction	75
3.2	Epigenetics and Development	80
3.3	Neuronal Development and Disease	82
3.4	Epigenetics Changes, Aging, and Disease Disparities	83
3.5	Cardiovascular Disease Disparity	87
3.6	Obesity Disparity	87
3.7	Type 2 Diabetes Disparity	89
3.8	Chronic Kidney Disease Disparity	90
3.9	HIV Disease Disparity	91
3.10	Cancer Disparities.	92
3.11	Genetic Association and Natural Human Variation	99
3.12	Summary	100
	References.	101
 Part II: Non-Genetic Factors		
4	Economic Factors and Health Disparities	111
4.1	Introduction	111
4.2	The Economic Factor	113
4.3	Health and Human Capital	114
4.4	Economic Investment in the Intrauterine Environment	117
4.5	Infant Mortality.	119
4.6	Economic Investment in Childhood	120
4.7	Investing in Child and Adolescent Health.	123
4.8	Investing in Adult Health	124
4.9	Summary	124
	References.	125
5	Social Determinants and Health Disparities	129
5.1	Introduction: The Non-Genetic Factors that Affect Our Health	129
5.2	Education as a Social Determinant of Health	131
5.3	Income as a Social Determinant of Health	133
5.4	Occupation as a Social Determinant of Health	134
5.5	Socioeconomic Status (SES) and Family Factors	136
5.6	SES and Neighborhood Factors	140
5.7	SES, Interaction of Family Values, and Neighborhood Norms.	142
5.8	SES and Health Behaviors	142
5.9	SES and Transportation	143

5.10	SES and Access to Health Care	143
5.11	SES and Psychosocial Factors	145
5.12	SES and Psychological Characteristics	145
5.13	Summary	146
	References.	146
6	Behavior and Health Disparities.	153
6.1	Introduction	153
6.2	Dietary Behavior.	154
6.3	Physical Activity.	155
6.4	Tobacco Use.	157
6.5	Excessive Alcohol Consumption.	160
6.6	Behavioral Intervention and Health Disparities	162
6.7	Behavior in the Post-Genome Era.	165
6.8	Summary	166
	References.	167
7	Health Literacy Deficits.	171
7.1	Introduction	171
7.2	Individual Self-Care	174
7.3	Patient Navigation System	177
7.4	Mistrust of the Healthcare System	177
7.5	Health Literacy and Professionals.	178
7.6	Health Literacy and Culture	179
7.7	What About Cultural Competence and Acculturation?	180
7.8	Summary	181
	References.	181
8	The Impact of Culture on Health Disparities	185
8.1	Introduction	185
8.2	Diet and Its Cultural Impact	186
8.3	Religion and Its Cultural Impact.	187
8.4	Cultural Behavior in Alternative Medicine	189
8.5	Cultural Competence and Linguistics	191
8.6	Culturally Sensitive Medical Care.	193
8.7	Summary	193
	References.	194
9	Psychological Factors and Health Disparities	197
9.1	Introduction	197
9.2	Environmental Stressors	199
9.3	Psychological Stress and Socioeconomic Status	200
9.4	Biological Mechanism of Psychological Stress	202
9.5	Different Categories of Stress	205
9.6	Measurement of a Stress Indicator (Allostatic Load).	206

9.7	Prenatal Stress	207
9.8	Parental Care and Stress	209
9.9	Cognitive Stimulation in the Home Environment	210
9.10	Community Stressors and Health	211
9.11	Psychosocial Relationships in Community and Health	212
9.12	Resilience and Psychological Impact on Health	213
9.13	Psychosocial Factors and Adverse Health Outcomes in African Americans	215
9.14	Psychosocial Factors and Psychological Implications of Health Disparities	215
9.15	Summary	222
	References	222

Part III: Gene-Environment Interactions

10	Gene-Environment Interactions in Health Disparities	233
10.1	Introduction	233
10.2	Fetal Origin of Health Disparities	236
10.3	Mechanisms of Epigenetic Programming and Maternal Care	247
10.4	Epigenetic Programming in Early Life	248
10.5	Infant and Child Gene-Environmental Conditions	249
10.6	The Role of Gene-Environment Interactions in Disease Disparities	250
10.7	Summary	266
	References	268
11	Race: a Biological or Social Concept	279
11.1	Introduction	279
11.2	Anthropological Rationale for the Scientific Basis of Human Classification	280
11.3	Skin Color as Basis for Racial Classification	283
11.4	The Human Genome Sequence and Race Classification	285
11.5	Racism and Health Disparities	286
11.6	Race Categorization and Health Disparities	288
11.7	Genetic Variation and Race Categorization	290
11.8	Race-Based Genetic Testing and Personalized Medicine	293
11.9	Summary	295
	References	296
12	Translating Health Disparities	299
12.1	Introduction	299
12.2	Life Course Programs	303
12.3	Community-Based Participatory Research (CBPR)	303
12.4	Diabetes Outcomes	305

12.5	Behavioral Intervention Approaches	305
12.6	Cancer	306
12.7	Importance of Health Literacy	307
12.8	Financial Cost of Insurance.	307
12.9	Precision Medicine	309
12.10	Summary	310
	References.	311
	Glossary	313
	Index	315

Health Outcomes in a Foreign Land
A Role for Epigenomic and Environmental Interaction
Kwabi-Addo, B.
2017, XXVI, 324 p. 16 illus., Hardcover
ISBN: 978-3-319-55864-6
