1	Membrane Computing - Key Concepts and Definitions	1
1.1	Introduction	1
1.2	Origins of Membrane Computing	2
1.3	Preliminary Concepts and Notations	2
1.4	Membrane Computing Concepts	3
1.5	Summary	9
	References	9
2	Fundamentals of Evolutionary Computation	11
2.1	Introduction	11
2.2	Genetic Algorithms	12
2.3	Quantum-Inspired Evolutionary Algorithms	14
2.4	Ant Colony Optimization	19
2.5	Particle Swarm Optimization	22
2.6	Differential Evolution	25
2.7	Conclusions	27
	References	27
3	Membrane Algorithms	33
3.1	Introduction	33
3.2	Membrane Algorithms with Nested Membrane Structure	35
3.2.1	Principle	35
3.2.2	Genetic Algorithm Based on P System	36
3.3	Membrane Algorithms with One-Level Membrane Structure	39
3.3.1	Principle	39
3.3.2	Quantum-Inspired Evolutionary Algorithm Based on P Systems	41
3.3.3	Ant Colony Optimization Based on P Systems	45
3.3.4	Differential Evolution Based on P Systems	54
3.4	Membrane Algorithms with Hybrid Hierarchical Membrane Structure	66

3.5	Membrane Algorithms with Dynamic Hierarchical Membrane Structure	67
3.5.1	Brief Introduction	67
3.5.2	Approximate Algorithm Using P Systems with Active Membranes	68
3.6	Membrane Algorithms with Static Network Structure.	74
3.6.1	Brief Introduction	74
3.6.2	A Hybrid Approach Based on Differential Evolution and Tissue P Systems	75
3.7	Membrane Algorithms with Dynamic Network Structure	83
3.7.1	Brief Introduction	84
3.7.2	Population Membrane-System-Inspired Evolutionary Algorithm	84
3.7.3	Multi-objective Membrane Algorithm Based on Population P Systems and DE.	90
3.8	P Systems Roles in Membrane Algorithms.	100
3.8.1	Population Diversity Analysis.	100
3.8.2	Convergence Analysis.	106
3.9	Conclusions	110
	References.	111
4	Engineering Optimization with Membrane Algorithms	117
4.1	Introduction	117
4.2	Engineering Optimizations with Cell-Like P Systems.	118
4.2.1	Signal Analysis	118
4.2.2	Image Processing	123
4.2.3	Controller Design	130
4.2.4	Mobile Robot Path Planning	134
4.2.5	Other Applications	141
4.3	Engineering Optimization with Tissue-Like P Systems.	141
4.3.1	Manufacturing Parameter Optimization Problems	141
4.3.2	Distribution Network Reconfiguration.	146
4.4	Engineering Optimization with Neural-Like P Systems	149
4.5	Conclusions	155
	References.	155
5	Electric Power System Fault Diagnosis with Membrane Systems	159
5.1	Introduction	159
5.2	Preliminaries.	161
5.2.1	Fuzzy Knowledge Representation and Reasoning	161
5.2.2	Essentials of Electric Power System Fault Diagnosis	164
5.2.3	Principles of Model-Based Fault Diagnosis Methods	167

5.3	Spiking Neural P Systems for Fault Diagnosis	168
5.3.1	Models	168
5.3.2	Algorithms	176
5.4	Fault Diagnosis with Spiking Neural P Systems	181
5.4.1	Transformer Fault Diagnosis with rFRSN P Systems	182
5.4.2	Traction Power Supply Systems Fault Diagnosis with WFRSN P Systems	187
5.4.3	Power Transmission Networks Fault Diagnosis with tFRSN P Systems	196
5.5	Conclusions	210
	References.	210
6	Robot Control with Membrane Systems	213
6.1	Introduction	213
6.2	Numerical P Systems	214
6.2.1	NPS	214
6.2.2	An Example for NPS	216
6.2.3	ENPS	219
6.3	Preliminaries of Mobile Robot Control.	224
6.4	Membrane Controllers	226
6.5	Software Platforms	229
6.5.1	SNUPS: Numerical P System Simulator	230
6.5.2	Webots: Mobile Robot Simulator	234
6.6	Design of Membrane Controller for Robots	237
6.6.1	Mobile Robot Trajectory Tracking Problem	237
6.6.2	Kinematic Controller Design for Wheeled Mobile Robots	240
6.6.3	Dynamic Controller Design for Wheeled Mobile Robots.	243
6.7	Experiments	249
6.7.1	Experiments on Kinematic Controller	249
6.7.2	Experiments on PID Based Membrane Controller.	251
6.7.3	Experiments on Trajectory Tracking Control of Wheeled Mobile Robots	255
6.8	Conclusions	255
	References.	256
7	Data Modeling with Membrane Systems: Applications to Real Ecosystems	259
7.1	Introduction	259
7.2	A General Bioinspired Computing Modeling Framework.	261
7.2.1	Membrane Systems for Modeling Biological Data	262
7.2.2	Multienvironment P Systems.	264
7.2.3	Simulation Algorithms for PDP Systems: DNDP and DCBA	269

7.3	Simulation Platform	282
7.3.1	P-Lingua: A General Framework to Simulate P Systems	282
7.3.2	MeCoSim: A Graphical User Interface to Convey Virtual Experimentation	289
7.3.3	Parallel Simulators on Multi-core and Many-Core Platforms.	301
7.4	Case Studies	310
7.4.1	Scavenger Birds	310
7.4.2	Pyrenean Chamois.	318
7.4.3	Zebra Mussel	331
7.4.4	Giant Panda	338
7.5	Conclusions	347
	References.	349

Real-life Applications with Membrane Computing

Zhang, G.; Pérez-Jiménez, M.J.; Gheorghe, M.

2017, XII, 355 p. 148 illus., 54 illus. in color., Hardcover

ISBN: 978-3-319-55987-2
