

Contents

1	Introduction to the Book	1
1.1	The Material World	1
1.2	Embodied Cognition	3
1.3	Interactional and Contributory Knowledge	6
1.4	Themes	10
1.4.1	On the Agenda	11
1.4.2	Other Approaches	13
1.4.3	Introducing ‘Derived Embodiment’	16
1.5	Obvious Objections	21
1.5.1	Embodied Cognition and Representations	21
1.5.2	Language as Representation	23
1.5.3	The Concrete and the Abstract	25
1.5.4	Linguistic Stages	28
1.6	Content of the Book	30
2	Interactional Expertise	35
2.1	The Tacit Dimension	35
2.2	Red Herrings?	38
2.3	Empirical Results	40
2.4	The Midwife Case	43
2.5	The Role of the Body	44
2.6	The Body-Language Relation	47
2.7	The Primacy of Language	49
2.8	Pretence and Lying	50
2.8.1	Misinformation Studies	53
3	Grounded Cognition	57
3.1	Empirical Results	58
3.2	Biological Considerations	60

3.3	Links Between Language and Perception	63
3.3.1	Process of Linguification.	66
3.4	Fire Together, Wire Together	68
3.4.1	What Correlates to the Correlate?	69
3.4.2	Neural Aggregates and Categories—An Example	71
3.5	Bottom-Up and Top-Down	72
3.5.1	Zooming in on Selection	73
3.6	Implicit Processes in Linguification	75
3.6.1	What About Accessibility?	77
3.6.2	Entering the Correlate Using ‘Back Doors’	79
3.7	Attention and Top-Down Processing	82
3.8	Summing up Linguification Processes, Back Doors, and Linguistic Handles	84
4	Concrete and ‘Abstract’ Knowledge	87
4.1	World Constraints on Concrete Knowledge	89
4.2	The Switch from Bottom-Up to Top-Down	93
4.3	The Concrete and the Abstract	95
4.3.1	Four Neural Modes of Existence.	97
4.3.2	Differences in on-Line and off-Line Representations?	100
4.4	The Phenomenal Feel in Linguification	102
4.4.1	Emotion Words	106
4.4.2	A-Consciousness Versus P-Consciousness	107
4.4.3	b- and t-Re-enactments Reconsidered	110
4.4.4	Automatic or Voluntary Activation of Imagery?	111
4.5	Rumination Studies: When Words Are Imageless.	113
4.6	The Switch from External Perception to Internal Representation	115
4.6.1	Cognitive Load	117
4.6.2	The Internal State	118
4.7	The Role of the Conversational Partner	121
4.7.1	Repair in Conversation	123
5	Derived Embodiment and Interactional Expertise	127
5.1	Particular Neural Correlates as Handles	128
5.2	Words as Perceptual Inducers	130
5.2.1	The Virtual Room	132
5.3	Interlocutor Tricks of the Trade	134
5.3.1	Instructions, Top-Down and Bottom-Up Linguistic Tools	135
5.4	Conversations Are Cooperative Constructs	139
5.4.1	Varying Levels of the Interlocutor	141

5.5	Derived Embodiment	142
5.5.1	Example 1: Aversive Fear Conditioning	143
5.5.2	Example 2: Metaphorical Expressions in Singer Education	146
5.6	Metaphors in Neural Terms	148
5.6.1	Single Use and Common Metaphors	150
6	Mental Applications	153
6.1	Effects on Cognitive Content and Functioning	155
6.1.1	Cultivation of Phenomenal Processes	155
6.1.2	Degrees of Freedom	158
6.2	Cognitive Changes	160
6.3	Increasing Working Memory Capacity	162
6.4	What Meditation Says About Mind Training	166
6.5	Perceptual Agility	169
6.6	Reading as Exemplification of WMC	171
6.7	Advanced Cognition and Imagination	173
7	Educational Implications	179
7.1	Neural Considerations in Education	181
7.2	Direct Experience and Entry by Back Doors	183
7.2.1	Thoughts on Deeper Understanding	186
7.2.2	Phenomenal Richness and Cognitive Load	188
7.3	Cognitive Load and Attention Restoration Theory (ART)	189
7.4	Post-competent Language Phase and Concrete Crutches	191
7.5	Japanese Interpreters in Brazil	193
8	Issues to Consider	197
8.1	Limiting Conditions	199
8.2	Expanding the Vocabulary—ToM	201
8.2.1	Two Categories of Mental State Contribution	203
8.2.2	Learning ToM and Derived Embodiment Mechanisms	204
8.2.3	Empirical Studies on Top-Down Control of ToM	207
8.3	The Definition of Abstract Knowledge in Derived Embodiment?	211
8.3.1	How Is the ‘Weather’ Concept Acquired?	212
8.4	Phenomenal and Interoceptive Crutches	214
8.5	Status of Derived Embodiment Knowledge	216
8.6	Linguistic Tolerance	217
8.7	Concluding Remarks	220
	References	223

Derived Embodiment in Abstract Language

Schilhab, T.

2017, XI, 242 p. 4 illus., Hardcover

ISBN: 978-3-319-56055-7
