<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	The Current Paradigm of the Star Formation Process	1
1.1.1	The Interstellar Medium (ISM)	1
1.1.2	Molecular Clouds	2
1.1.3	Turbulence and Magnetism in Molecular Clouds	3
1.1.4	Filamentary Structure	6
1.2	Physical Properties of Starless and Prestellar Cores	8
1.2.1	Temperature	8
1.2.2	Mass	9
1.2.3	Magnetic Fields	9
1.2.4	External Pressure	10
1.2.5	Morphology	10
1.2.6	Environment	12
1.3	Stability of Starless and Prestellar Cores	15
1.3.1	The Jeans Mass	15
1.3.2	The Virial Theorem	15
1.3.3	Bonnor-Ebert Stability Criterion	18
1.4	Evolution and Lifetime of Starless Cores	20
1.5	The Initial Mass Function	22
1.6	Protostars	25
1.6.1	Class 0	27
1.6.2	Class I	27
1.6.3	Flat	28
1.6.4	Class II	28
1.6.5	Class III	29
1.7	The Gould Belt	29
1.7.1	JCMT Gould Belt Legacy Survey	31
1.7.2	Herschel Gould Belt Survey	32

1.8	Summary	32
	References.	32
<b>2</b>	<b>Instrumentation</b>	37
2.1	The James Clerk Maxwell Telescope	37
2.1.1	SCUBA-2	38
2.1.2	SCUBA-2 Data Reduction	43
2.1.3	HARP-B and ACSIS	49
2.1.4	Carbon Monoxide Contamination of SCUBA-2 Data	51
2.2	The Herschel Space Observatory	51
2.2.1	SPIRE Data Reduction	52
2.2.2	PACS Data Reduction	54
2.2.3	Absolute Calibration of Herschel Data	54
2.3	IRAM 30m Telescope	55
2.4	SCUBA-2 and Herschel Compatibility	56
2.4.1	Spatial Filtering	56
2.4.2	Common-Resolution Convolution Kernels	56
2.5	Summary	68
	References.	69
<b>3</b>	<b>The Ophiuchus Molecular Cloud</b>	71
3.1	Introduction	71
3.2	Observations	72
3.2.1	SCUBA-2	72
3.2.2	HARP	72
3.2.3	Herschel	76
3.2.4	IRAM	77
3.3	Data Processing	77
3.3.1	CO Contamination	77
3.3.2	Spatial Filtering	78
3.4	Results	78
3.4.1	Source Extraction	78
3.4.2	Source Completeness	86
3.4.3	Source Characterisation from Continuum Data	90
3.4.4	Source Mass Distribution	95
3.4.5	Source Characterisation from Spectral Data	98
3.5	Energy Balance and Stability	102
3.5.1	Gravitational and Internal Energy	103
3.5.2	External Gas Pressure	105
3.5.3	External Pressure from Ionising Photons	107
3.5.4	Magnetic Energy Density	108
3.5.5	Core Stability	109
3.5.6	Bonnor-Ebert Critical Mass	112

3.6	Regional Variations in Core Properties . . . . .	114
3.6.1	Oph A . . . . .	114
3.6.2	Oph A' . . . . .	115
3.6.3	Oph B . . . . .	115
3.6.4	Oph B-11 . . . . .	116
3.6.5	Oph C . . . . .	117
3.6.6	Oph E and F . . . . .	118
3.6.7	L1689 and L1709 . . . . .	119
3.6.8	Gradients Across the Cloud . . . . .	119
3.7	Summary . . . . .	120
	References . . . . .	122
<b>4</b>	<b>The Taurus Molecular Cloud . . . . .</b>	<b>125</b>
4.1	Introduction . . . . .	125
4.2	Observations . . . . .	126
4.2.1	SCUBA-2 . . . . .	126
4.2.2	Herschel Space Observatory . . . . .	126
4.3	Results . . . . .	127
4.3.1	Source Extraction . . . . .	129
4.3.2	Source Characterisation . . . . .	134
4.4	Discussion . . . . .	140
4.5	Energy Balance and Stability . . . . .	147
4.5.1	Gravitational Potential Energy . . . . .	147
4.5.2	Internal Energy . . . . .	148
4.5.3	External Pressure Energy . . . . .	149
4.5.4	Magnetic Energy Density . . . . .	156
4.5.5	Virial Balance . . . . .	156
4.5.6	$^{13}\text{CO}$ Virial Analysis . . . . .	161
4.5.7	Bonnor-Ebert Stability . . . . .	163
4.5.8	Regional Variations . . . . .	164
4.6	Summary . . . . .	166
	References . . . . .	167
<b>5</b>	<b>The Cepheus Flare . . . . .</b>	<b>169</b>
5.1	Introduction . . . . .	169
5.2	Observations . . . . .	172
5.3	Results . . . . .	173
5.3.1	Cepheus Flare Region . . . . .	173
5.3.2	Source Extraction . . . . .	177
5.3.3	Source Characterisation . . . . .	177
5.4	Discussion of Derived Properties . . . . .	181
5.5	Counting Statistics . . . . .	186
5.6	Bonnor-Ebert Stability Analysis . . . . .	188

5.7	Energy Balance and Stability . . . . .	191
5.7.1	Relation Between Gravitational Potential Energy and External Pressure Energy . . . . .	194
5.7.2	Virial Stability of Cores in Cepheus . . . . .	200
5.8	Summary . . . . .	200
	References. . . . .	203
<b>6</b>	<b>Discussion . . . . .</b>	<b>205</b>
6.1	Comparison of Regions . . . . .	205
6.1.1	Clustering of Sources . . . . .	210
6.1.2	Variation Within Regions . . . . .	217
6.2	Core Evolution . . . . .	221
6.2.1	Evolutionary Model . . . . .	221
6.2.2	Core Evolution . . . . .	227
6.2.3	Evolutionary Tracks in the Virial Plane . . . . .	229
6.2.4	Adiabatic Versus Isothermal Evolution . . . . .	231
6.2.5	Non-thermal Motions . . . . .	232
6.2.6	Parameterisation of Magnetic Field Term . . . . .	233
6.2.7	Critical Discussion of the Evolutionary Model . . . . .	236
6.2.8	Concluding Remarks. . . . .	238
6.3	Summary . . . . .	238
	References. . . . .	240
<b>7</b>	<b>Summary and Future Work. . . . .</b>	<b>241</b>
7.1	Chapter 1: Introduction. . . . .	241
7.2	Chapter 2: Instrumentation . . . . .	242
7.3	Chapter 3: The Ophiuchus Molecular Cloud . . . . .	243
7.4	Chapter 4: The Taurus Molecular Cloud . . . . .	244
7.5	Chapter 5: The Cepheus Flare . . . . .	245
7.6	Chapter 6: Discussion. . . . .	247
7.7	Future Work. . . . .	248
	References. . . . .	249
	<b>Index . . . . .</b>	<b>251</b>

Submillimetre Studies of Prestellar and Starless Cores  
in the Ophiuchus, Taurus and Cepheus Molecular  
Clouds

Pattle, K.M.

2017, XVI, 254 p. 113 illus., 82 illus. in color., Hardcover

ISBN: 978-3-319-56519-4
