

Contents

1	Bamboo Taxonomy and Distribution Across the Globe	1
1.1	Introduction	1
1.2	Bamboo's Identification	2
1.3	Bamboo Compared with Trees (Wood)	3
1.3.1	Differences in Characteristics of Bamboo and Trees	4
1.4	Bamboo Origin and Its Habitats	4
1.4.1	Bamboo Habitations	7
1.5	Molecular Taxonomy of Bamboos	10
1.6	Scientific Classifications and Characteristics of Bamboos	12
1.6.1	Diversification of Bamboo	14
1.6.2	Bamboos Tribes, Subtribes, and Genera Classification	18
1.7	Important Bamboo Genera and Species	18
1.7.1	Important Bamboo Genera	18
1.7.2	Important Bamboo Species	18
1.7.3	Other Less/Known Taxa of Value	18
	References	33
2	Regeneration, Cultivation, and Sustenance of Bamboo	39
2.1	Introduction	39
2.2	Methods and Techniques of Bamboo Propagation	40
2.2.1	Bamboo Propagation	41
2.2.2	Production of Bamboo Seedlings	42
2.2.3	Sexual Propagation	42
2.2.4	Asexual Propagation	44
2.2.5	Macro-Proliferation Methods	55
2.2.6	Post-care of Bamboo Cuttings	56

2.3	Pre-planting Operations	58
2.3.1	Selection of Land Site for the Cultivation of Bamboo	59
2.3.2	Preparation of Land or Planting Site	59
2.4	Planting of Bamboo Seedlings	60
2.5	Post-planting Operations	60
2.5.1	Replacement of Dead Plants	60
2.5.2	Culm Maintenance	61
2.5.3	Maintenance of the Soil	61
2.5.4	Weeding	61
2.5.5	Pests, Insects, and Animal Protection	62
2.5.6	Mulching	62
2.5.7	Soil Mounding	63
2.5.8	Pruning Clump of Bamboo	63
2.5.9	Clump Management	63
2.5.10	Protection Bamboo from Fire	65
2.6	Harvesting and Handling	65
2.7	Attacks on Harvested Bamboo	68
2.8	Insect Attacks	68
2.8.1	Beetles	69
2.8.2	Termites	69
2.9	Fungal Attacks	70
2.9.1	Blue-Stain Fungi	71
2.9.2	Mould Fungi	72
2.9.3	Decay Fungi	72
2.10	Post-harvest Treatment and Preservation	73
2.10.1	Air-Drying of Bamboo	73
2.10.2	Kiln-Drying of Bamboo	75
2.10.3	Drying Rate and Defects of Bamboo	75
2.11	Preservation of Bamboo Culm	76
2.11.1	Non-chemical Techniques	76
2.11.2	Chemical Methods	79
2.12	Treatability	80
2.13	Preservatives	81
2.13.1	Waterborne Types	81
2.13.2	Organic Acids	81
2.14	Preservatives and Treatment	82
2.14.1	Pressure Treatments	82
2.14.2	Non-pressure Treatment	82
2.15	Sustainability of Bamboo and Its Products	83
	References	83

3	Properties of Bamboo	87
3.1	Bamboo Growth Morphology	87
3.2	Morphology of the Bamboo Plant	88
3.2.1	Culm	88
3.2.2	Sheath	90
3.2.3	Branches	91
3.2.4	Rhizomes	92
3.2.5	Roots	92
3.2.6	Leaves	93
3.3	Bamboo Culm Anatomy	94
3.4	Moisture Content	98
3.5	Specific Gravity (Density) and Mechanical Properties	99
3.6	Chemical Composition	101
3.7	Mechanical Characterisation	102
3.7.1	Standardisation	103
3.7.2	History of Bamboo Standardization	103
3.7.3	Tensile Testing	103
3.7.4	Compressive Testing	113
3.7.5	Fatigue Testing	113
3.7.6	Impact Testing	115
3.7.7	Shear Testing	117
3.7.8	Bending (Flexural) Testing	121
3.7.9	Torsion Testing	127
3.7.10	Structural Equations for Bamboo	128
3.7.11	Classical Laminate Theory	128
3.7.12	The Effects of Water, Brine, and Acid on Bamboo	138

Bamboo

The Multipurpose Plant

Akinlabi, E.T.; Anane-Fenin, K.; Akwada, D.R.

2017, XI, 262 p. 77 illus., 7 illus. in color., Hardcover

ISBN: 978-3-319-56807-2
