

Contents

1 Representation and Knowledge: The Semiotic Revolution	1
1.1 The Fundamental Epistemological Distinction and the First Knowledge Analysis Scheme.....	2
1.1.1 The Cognitive Issue of Access to the Objects Themselves and Role of Representations	4
1.1.2 Sign and Representation: The Cognitive Divide.....	5
1.2 The Semiotic Revolution: Towards a New Knowledge Analysis Scheme	8
1.3 The Three Models of Sign Analysis That Have Founded Semiotics: Contributions and Limits.....	11
1.3.1 Saussure: Structural Analysis of Semiotic Systems.....	12
1.3.2 Peirce: The Classification of Kinds of Representations.....	14
1.3.3 Frege: Semiotic Substitution and Production of New Knowledge in Mathematics	15
1.4 Conclusion: The Semiotic Representations	17
Annex	19
2 Mathematical Activity and the Transformations of Semiotic Representations	21
2.1 Two Epistemological Situations, One Irreducible to the Other, in the Access to Objects of Knowledge	23
2.1.1 The Juxtaposition Test with a Material Object: The Photo Montage of Kosuth.....	23
2.1.2 The Juxtaposition Test with the Natural Numbers.....	25
2.1.3 How to Recognize the Same Object in Different Representations?	27
2.1.4 A Fundamental Cognitive Operation in Mathematics: One-to-One Mapping	29
2.2 The Transformation of Semiotic Representations at the Heart of the Mathematical Way of Working	31

2.2.1	Description of an Elementary Mathematical Activity: The Development of Polygonal Unit Marks Configuration	32
2.2.2	Representational Transformations Specific to each Kind of Semiotic Representation: The Case of Representation of Numbers.....	36
2.3	Conclusion: The Cognitive Analysis of the Mathematical Activity and the Functioning of the Mathematical Thinking.....	41
3	Registers of Semiotic Representations and Analysis of the Cognitive Functioning of Mathematical Thinking	45
3.1	Semiotic Registers and Cognitive Functioning of Thought.....	47
3.1.1	Two Heterogeneous Kinds of Semiotic Systems: The Codes and Registers.....	47
3.1.2	The Three Types of Discursive Operations and the Cognitive Functions of Natural Languages.....	51
3.1.3	The Relationship Between Thought and Language: Discursive Operations and Linguistic Expression	54
3.1.4	Conclusion: What Characterizes a Register of Semiotic Representation.....	56
3.2	Do the Various Forms of Representation Used in Mathematics Depend on Registers?	57
3.2.1	How do We see a Figure?.....	58
3.2.2	The Two Types of Figural Operations Proper to the Geometrical Figures.....	61
3.2.3	Concealment of the Register of Figures in the Teaching of Geometry and Didactic Analyses	63
3.2.4	Geometric Visualization and Problems from Reality: Direct Passage or Need for Intermediary Representations?.....	65
3.3	Conclusions.....	67
4	The Registers: Method of Analysis and Identification of Cognitive Variables	73
4.1	How to Isolate and Recognize the Meaning Units Mathematically Relevant in the Content of a Representation?.....	75
4.1.1	Production of Graphs and Their Equivocal Obviousness	76
4.1.2	Methodology to Isolate the Mathematically Relevant Meaning Units in Any Representation Content	77
4.1.3	What Kind of Task for Developing the Recognition of Mathematically Relevant Meaning Units?	81
4.2	The Analysis of Mathematical Activity Based on the Couples of Mobilized Registers.....	83
4.2.1	Congruence and Non-Congruence Phenomena in the Conversion of the Representations.....	86

4.2.2	The Particular Role of Natural Language in the Cognitive Functioning Subjacent to the Mathematical Reasoning.....	90
4.2.3	The Understanding of the Problem Statements and the Need for Transitional Auxiliary Representations.....	91
4.2.4	The Problem of Cognitive Connection Between the Natural Language and Other Registers	95
4.3	Functional Variations of Phenomenological Production Methods and Semiotic Representation Registers.....	96
4.3.1	The Misleading Confusion Between Functional and Structural Variations in Production of Representations.....	97
4.3.2	The Computer Monitors: Another Phenomenological Mode of Production of Representations	99
4.4	Method of Analysis of the Activities in Class and Student Productions: The Problem of Didactically Relevant Variables	102
4.4.1	The Organization of Sequences of Activities Always Has Two Sides.....	102
4.4.2	The Field of Work Cognitively Required for a Teaching Sequence of Geometrical Activities at Primary School	104
4.4.3	Observation of the Students and Analysis of Their Productions and Reactions.....	105
4.4.4	Interactions and Cognitive Impact of Three Kinds of Verbalization on Understanding	107
4.5	Conclusions.....	108
Annex	113
	Analysis of an Example of Introduction of the Linear Function Concept in a Textbook for Students Aged 13–14 Years Old.....	113
Index	115

Understanding the Mathematical Way of Thinking – The
Registers of Semiotic Representations

Duval, R.

2017, XXIV, 117 p. 50 illus., 9 illus. in color., Hardcover

ISBN: 978-3-319-56909-3
