

# Contents

- 1 Scientific Method, Human Research Ethics, and Biosafety/Biosecurity . . . . . 1**
  - 1.1 How Is Human Subject Research Different from Engineering? . . . . . 1
  - 1.2 Hypothesis . . . . . 2
  - 1.3 Is a Hypothesis Always Needed? . . . . . 6
  - 1.4 Ethics . . . . . 6
    - 1.4.1 Informed Consent . . . . . 6
    - 1.4.2 Ethically Challenging Research Aspects . . . . . 8
    - 1.4.3 Big Data Research . . . . . 10
    - 1.4.4 Is Ethically Challenging Research Impossible? . . . . . 11
    - 1.4.5 Isn't This Just Excessive Paperwork? . . . . . 11
  - 1.5 Biosafety and Biosecurity . . . . . 11
    - 1.5.1 Biosafety . . . . . 12
    - 1.5.2 Biosecurity . . . . . 13
  - References. . . . . 14
- 2 Experimental Design . . . . . 17**
  - 2.1 Experiments and Quasi-experiments . . . . . 17
  - 2.2 Between-Subjects Design . . . . . 18
    - 2.2.1 Control Groups . . . . . 18
    - 2.2.2 Participant Assignment to Groups . . . . . 20
  - 2.3 Within-Subject Design . . . . . 21
  - 2.4 Choosing Between-Subjects or Within-Subject Design: More Than just a Matter of Statistical Power . . . . . 24
  - 2.5 Validity Threats in Experiments . . . . . 26
    - 2.5.1 Demand Characteristics . . . . . 26
    - 2.5.2 Experimenter Expectancy Effect . . . . . 26

2.6	Quasi-experiments . . . . .	27
2.7	Validity Threat in Quasi-experiments: Causation Versus Correlation . . . . .	29
2.8	Validity Threats in Experiments and Quasi-experiments. . . . .	29
2.8.1	Sample Representativeness . . . . .	29
2.8.2	Attrition . . . . .	30
2.9	Measurements and Measures . . . . .	30
2.9.1	Statistical Reliability . . . . .	31
2.9.2	Self-reported Measures (Questionnaires). . . . .	32
2.10	Finally, Some Tips Before Starting the Experiment . . . . .	35
	References. . . . .	35
<b>3</b>	<b>Statistics</b> . . . . .	41
3.1	What This Chapter Does (Not) Cover . . . . .	41
3.2	Descriptive Statistics. . . . .	42
3.2.1	Central Tendency and Variability . . . . .	42
3.2.2	Effect Sizes . . . . .	44
3.2.3	What is a Strong Effect? . . . . .	47
3.2.4	Why Tables Are Not Enough . . . . .	48
3.3	Inferential Statistics . . . . .	48
3.3.1	Sample Versus Population. . . . .	48
3.3.2	Hypothesis Testing . . . . .	50
3.3.3	Independent-Samples <i>t</i> Test. . . . .	51
3.3.4	Paired-Samples <i>t</i> Test . . . . .	54
3.3.5	One-Tailed Versus Two-Tailed Tests . . . . .	55
3.3.6	Alternatives to the <i>t</i> Test. . . . .	55
3.3.7	Multivariate Statistics . . . . .	56
3.4	Pitfalls of Null Hypothesis Significance Testing. . . . .	56
3.4.1	Most Published Research Findings Are False . . . . .	57
3.4.2	Bias. . . . .	59
3.4.3	Recommendations in Order to Maximize the Replicability of a Work. . . . .	61
3.5	Final Note. . . . .	62
	References. . . . .	62
<b>4</b>	<b>Publishing</b> . . . . .	67
4.1	What Is Publishing and Why Is It Important? . . . . .	67
4.2	What Is a Research Paper? . . . . .	68
4.2.1	Structure of a Research Paper . . . . .	68
4.2.2	Writing Style. . . . .	75
4.2.3	Preventing Plagiarism . . . . .	76
4.2.4	Copyright . . . . .	78
4.2.5	Fraud. . . . .	79

4.3	Publication Bias . . . . .	81
4.4	The Process from Submission to Publishing. . . . .	83
4.5	Open Access Journals. . . . .	85
4.6	Scientometrics. . . . .	88
4.6.1	Impact Factor . . . . .	89
4.6.2	<i>h</i> -Index . . . . .	89
4.6.3	Altmetrics . . . . .	90
	References. . . . .	92
	<b>MATLAB Scripts . . . . .</b>	<b>99</b>

Human Subject Research for Engineers

A Practical Guide

de Winter, J.; Dodou, D.

2017, IX, 105 p. 23 illus., 9 illus. in color., Softcover

ISBN: 978-3-319-56963-5
