

Contents

- 1 Introduction to Granular Computing, Pattern Recognition and Data Mining** 1
 - 1.1 Introduction 1
 - 1.2 Granular Computing 2
 - 1.2.1 Granules 2
 - 1.2.2 Granulation 3
 - 1.2.3 Granular Relationships 3
 - 1.2.4 Computation with Granules 4
 - 1.3 Granular Information Processing Aspects of Natural Computing 4
 - 1.3.1 Fuzzy Set 4
 - 1.3.2 Rough Set 8
 - 1.3.3 Fuzzy Rough Sets 14
 - 1.3.4 Artificial Neural Networks 15
 - 1.4 Integrated Granular Information Processing Systems 21
 - 1.4.1 Fuzzy Granular Neural Network Models 21
 - 1.4.2 Rough Granular Neural Network Models 22
 - 1.4.3 Rough Fuzzy Granular Neural Network Models 23
 - 1.5 Pattern Recognition 23
 - 1.5.1 Data Acquisition 24
 - 1.5.2 Feature Selection/Extraction 25
 - 1.5.3 Classification 26
 - 1.5.4 Clustering 27
 - 1.6 Data Mining and Soft Computing 29
 - 1.7 Big Data Issues 30
 - 1.8 Scope of the Book 31
 - References 34

2	Classification Using Fuzzy Rough Granular Neural Networks	39
2.1	Introduction	39
2.2	Adaptive-Network-Based Fuzzy Inference System	40
2.3	Fuzzy Multi-layer Perceptron	41
2.4	Knowledge Based Fuzzy Multi-layer Perceptron	41
2.5	Rough Fuzzy Multi-layer Perceptron	43
2.6	Architecture of Fuzzy Rough Granular Neural Networks	45
2.7	Input Vector Representation	48
2.7.1	Incorporation of Granular Concept	48
2.7.2	Choice of Parameters of π Membership Functions	49
2.7.3	Defining Class Membership at Output Node	50
2.7.4	Applying the Membership Concept to the Target Vector	51
2.8	Fuzzy Rough Sets: Granulations and Approximations	51
2.8.1	Concepts of Fuzzy Rough Sets: Crisp and Fuzzy Ways	52
2.9	Configuration of the Granular Neural Networks Using Fuzzy Rough Sets	55
2.9.1	Knowledge Encoding Procedures	55
2.9.2	Examples for Knowledge Encoding Procedure	59
2.10	Experimental Results	63
2.11	Conclusion	75
	References.	76
3	Clustering Using Fuzzy Rough Granular Self-organizing Map	77
3.1	Introduction	77
3.2	The Conventional Self-organizing Map	78
3.3	Granular Self-organizing Map.	79
3.4	Rough Lower and Upper Approximations Based Self Organizing Map	80
3.5	Fuzzy Self-organizing Map.	82
3.6	Rough Reduct Based Self-organizing Map.	82
3.7	Fuzzy Rough Granular Self-organizing Map.	83
3.7.1	Strategy.	83
3.7.2	Different Steps of FRGSOM.	84
3.7.3	Granulation of Linguistic Input Data Based on α -Cut.	85
3.7.4	Fuzzy Rough Sets to Extract Domain Knowledge About Data	87
3.7.5	Incorporation of the Domain Knowledge in SOM.	88
3.7.6	Training and Clustering.	88
3.7.7	Examples.	89
3.8	Fuzzy Rough Entropy Measure	91

3.9	Experimental Results	94
3.9.1	Results of FRGSOM	95
3.10	Biological Significance	99
3.11	Conclusion	104
	References.	104
4	Fuzzy Rough Granular Neural Network and Unsupervised	
	Feature Selection	107
4.1	Introduction	107
4.2	Feature Selection with Neural Networks.	108
4.3	Fuzzy Neural Network for Unsupervised Feature Selection	109
4.4	Fuzzy Rough Set: Granulations and Approximations	110
4.4.1	New Notions of Lower and Upper Approximations	110
4.4.2	Scatter Plots of Features in Terms of Lower and Upper Approximations	112
4.5	Fuzzy Rough Granular Neural Network for Unsupervised Feature Selection	113
4.5.1	Strategy	113
4.5.2	Normalization of Features	115
4.5.3	Granulation Structures Based on α -Cut	115
4.5.4	Determination of Input Vector and Target Values.	116
4.5.5	Formation of the Fuzzy Rough Granular Neural Network	117
4.6	Experimental Results	122
4.7	Conclusion	132
	References.	133
5	Granular Neighborhood Function for Self-organizing Map:	
	Clustering and Gene Selection	135
5.1	Introduction	135
5.2	Methods of Clustering	137
5.2.1	Rough Fuzzy Possibilistic c -Means.	138
5.3	Methods of Gene Selection.	139
5.3.1	Unsupervised Feature Selection Using Feature Similarity	140
5.3.2	Fuzzy-Rough Mutual Information Based Method	140
5.4	Fuzzy Rough Granular Neighborhood for Self-organizing Map	141
5.4.1	Strategy	141
5.4.2	Normalization of Data.	142
5.4.3	Defining Neighborhood Function and Properties.	142
5.4.4	Formulation of the Map	143
5.4.5	Algorithm for Training	144
5.5	Gene Selection in Microarray Data.	145

5.6	Experimental Results	146
5.6.1	Results of Clustering	147
5.6.2	Results of Gene Selection	153
5.6.3	Biological Significance	156
5.7	Conclusion	160
	References.	161
6	Gene Function Analysis	163
6.1	Introduction	163
6.2	Gene Expression Analysis: Tasks	165
6.2.1	Preprocessing	166
6.2.2	Distance Measures.	168
6.2.3	Gene Clustering and Ordering Using Gene Expression.	169
6.2.4	Integrating Other Data Sources with Gene Expression . . .	169
6.3	Data Sources.	171
6.3.1	Evaluation for Dependence Among Data Sources.	175
6.3.2	Relevance of Data Sources	176
6.4	Gene Function Prediction	177
6.4.1	Prediction Using Single Data Source.	178
6.4.2	Results and Biological Interpretation.	180
6.4.3	Prediction Using Multiple Data Sources	183
6.5	Relevance of Soft Computing and Granular Networks	189
6.6	Conclusion	190
	References.	190
7	RNA Secondary Structure Prediction: Soft Computing Perspective	195
7.1	Introduction	195
7.2	Basic Concepts in RNA	197
7.2.1	Biological Basics.	197
7.2.2	Secondary Structural Elements in RNA.	197
7.2.3	Example	200
7.3	Dynamic Programming for RNA Structure Prediction	202
7.4	Relevance of Soft Computing in RNA Structure Prediction	204
7.4.1	Characteristics of Different Soft Computing Technologies.	205
7.5	RNA Secondary Structure Prediction Using Soft Computing . . .	206
7.5.1	Genetic Algorithms	207
7.5.2	Artificial Neural Networks	209
7.5.3	Fuzzy Logic	210
7.6	Meta-Heuristics in RNA Secondary Structure Prediction with . .	211
7.6.1	Simulated Annealing.	211
7.6.2	Particle Swarm Optimization.	212

7.7 Other Methods 213

7.8 Comparison Between Different Methods. 214

7.9 Challenging Issues and Granular Networks. 215

7.10 Conclusion 218
