
Contents

1	Molecular Considerations in Cell Transplant Imaging	1
	Aline M. Thomas and Jeff W.M. Bulte	
2	Considerations for Successful Encapsulated β-Cell Therapy	19
	Christopher G. Thanos, Jason L. Gaglia, and Felicia W. Pagliuca	
3	Stem Cell Therapy for Neurovascular and Traumatic Brain Diseases	53
	Marci G. Crowley, M. Grant Liska, and Cesar V. Borlongan	
4	Cell Replacement Strategies for Parkinson's Disease	73
	Diptaman Chatterjee, Dustin R. Wakeman, and Jeffrey H. Kordower	
5	Cell Therapy for Epilepsy	85
	Chiara Falcicchia, Giovanna Paolone, and Michele Simonato	
6	Dendritic Cell-Based Cancer Therapies: Current Status and Future Directions	99
	Shah Md. Shahjahan Miah, Timothy K. Erick, and Dwaine F. Emerich	
7	Encapsulation Approaches to Cell Therapy	121
	Paul de Vos	
8	Biomaterials and Cells for Revascularization	139
	Priscilla A. Williams, Kevin T. Campbell, and Eduardo A. Silva	
9	Cell Reprogramming for Cardiac Regeneration and Rare Disease Modeling	173
	Xonia Carvajal-Vergara, Juan Roberto Rodríguez-Madoz, Beatriz Pelacho, and Felipe Prósper	

10	Engineering Organoid Systems to Model Health and Disease	197
	James A. Ankrum, Thomas J. Bartosh, Xiaolei Yin, Alexander J. Brown, Anthony J. Burand Jr, and Lauren Boland	
11	3D Printing for Cell Therapy Applications.	227
	Ashley N. Leberfinger, Kazim Kerim Moncal, Dino J. Ravnic, and Ibrahim T. Ozbolat	
12	Cell Therapy for Ophthalmic Diseases	249
	Konrad Kauper and Arne Nystuen	
13	Cell Therapy: Approaching a Partnership with Pharma	281
	Vincent Ling	
14	Stem Cell Therapy in Duchenne Muscular Dystrophy	297
	Mirella Meregalli, Marzia Belicchi, and Yvan Torrente
