

Contents

1	Basic concepts in category theory	1
	<i>Dominique Bourn</i>	
1.1	Categories and functors	1
1.2	Monomorphisms and epimorphisms	1
1.3	Split epimorphisms	3
1.4	Reflexive graphs and relations	4
1.5	Pullbacks	5
1.6	The art of recognizing pullbacks	8
1.6.1	Pullback lemmas	8
1.6.2	Internal equivalence relations	9
1.6.3	The square construction $R \square S$	13
1.6.4	Split graphs and relations	14
1.6.5	The fibration of points	16
1.7	The different notions of epimorphism	18
1.8	Barr-Kock theorem	20
1.9	Terminal object and products	22
1.10	Duality and pushouts	24
2	Internal structures	27
	<i>Dominique Bourn</i>	
2.1	Internal unitary magmas and monoids	27
2.2	Internal groups	30
2.3	Yoneda embedding and internal structures	31
2.3.1	Natural transformations and functor categories	31
2.3.2	Yoneda embedding	32
2.3.3	Embedding for internal structures	32
3	Four basic facts in Algebra	33
	<i>Dominique Bourn</i>	
3.1	Pointed categories	33
3.2	Kernel, cokernel and exact sequences	34
3.3	Observation (A)	36
3.4	Observation (B)	37
3.4.1	Observation (B_1)	37
3.4.2	Observation (B_2)	38
3.5	Observation (C)	39
3.6	Observation (D)	40
3.7	Natural structures	41
4	Unital and protomodular categories	43
	<i>Dominique Bourn</i>	
4.1	Definitions	43

4.2	Characterization of protomodular categories	45
4.3	The five main consequences	47
4.3.1	(a): characterization of monomorphisms	47
4.3.2	(b): exact sequences	48
4.3.3	(c): the class of normal monomorphisms	50
4.3.4	(d): intrinsic commutation	52
4.3.5	(e): reflexive relations are equivalence relations	56
4.4	Commutative and abelian objects	57
5	Regular and homological categories	59
	<i>Dominique Bourn</i>	
5.1	Regular categories	59
5.2	Direct image of equivalence relations	61
5.3	Regular pushouts	63
5.4	Homological categories	66
5.5	Associated commutative and abelian objects	68
5.6	Exact protomodular categories	69
6	Linear and additive categories	71
	<i>Dominique Bourn</i>	
6.1	Definitions	71
6.2	Characterizations	72
6.3	Abelian categories	74
6.4	Essentially affine categories	76
7	Mal'tsev and naturally Mal'tsev categories	79
	<i>Dominique Bourn</i>	
7.1	Examples of Mal'tsev categories	79
7.2	Strongly unital and Mal'tsev categories	80
7.3	Strongly unital linear categories	85
7.4	Centralization of equivalence relations	86
7.5	Stiffly Mal'tsev categories	89
7.6	Regular and exact Mal'tsev categories	90
7.6.1	Regular Mal'tsev categories	90
7.6.2	Associated affine object	93
7.6.3	Exact Mal'tsev categories	94
7.7	Naturally Mal'tsev categories	96
7.8	Exact naturally Mal'tsev categories	100
	Servicepart	101
	Conclusion	102
	References	104
	Index	106
