

# Contents

<b>1</b>	<b>Green's Functions for ODE</b>	<b>1</b>
1.1	Two-Point-Posed Boundary Value Problems	1
1.1.1	Existence and Uniqueness Theorem	3
1.1.2	Symmetry of Green's Functions	15
1.1.3	An Alternative Procedure	23
1.2	Multiple-Point-Posed Problems	33
1.2.1	Matrices of Green's Type	34
1.2.2	Existence and Uniqueness	36
1.2.3	Construction Procedure	41
1.3	Chapter Exercises	49
<b>2</b>	<b>Spherical Surface</b>	<b>51</b>
2.1	Basics of the Resolving Algorithm	52
2.2	Triangular Shaped Region	57
2.3	Belt-Shaped Region	63
2.4	Quadrilateral-Shaped Region	70
2.5	Robin Problem for Spherical Cap	73
2.6	Spherical Sector	78
2.7	Chapter Exercises	81
<b>3</b>	<b>Toroidal Surface</b>	<b>85</b>
3.1	Quadrilateral-Shaped Region	85
3.2	Toroidal Sector	92
3.3	Belt-Shaped Region	98
3.4	Chapter Exercises	104
<b>4</b>	<b>Compound Structures</b>	<b>107</b>
4.1	Matrices of Green's Type for PDE	107
4.2	Compound Hemisphere	110
4.3	Hemisphere Joint to Cylinder	118

4.4 Three-Fragment Assembly ..... 128

4.5 Chapter Exercises ..... 142

**5 Irregular Configurations ..... 147**

5.1 Green’s Function Version of the BIEM ..... 148

5.2 Regions of Irregular Shape ..... 157

5.3 Optimal Shape Design Problems ..... 165

**Appendix A: Catalogue of Green’s Functions. .... 173**

**References ..... 197**

Green's Functions

Potential Fields on Surfaces

Melnikov, Y.A.; Borodin, V.N.

2017, XVI, 198 p. 32 illus., 21 illus. in color., Hardcover

ISBN: 978-3-319-57242-0
