## Part I Mitochondrial Genetics and Ion Transportation

<b>Nuclear Transcription Factors in the Mitochondria: A New Paradigm in Fine-Tuning Mitochondrial Metabolism . . . . .</b>	<b>3</b>
Naresh Babu V. Sepuri, Prasad Tammineni, Fareed Mohammed, and Arunkumar Paripati	
<b>The Mitochondrial Permeability Transition Pore and ATP Synthase . . .</b>	<b>21</b>
Gisela Beutner, Kambiz N. Alavian, Elizabeth A. Jonas, and George A. Porter, Jr	
<b>The Roles of Mitochondrial Cation Channels Under Physiological Conditions and in Cancer . . . . .</b>	<b>47</b>
Ildikò Szabò and Luigi Leanza	
<b>Anion Channels of Mitochondria . . . . .</b>	<b>71</b>
Devasena Ponnalagu and Harpreet Singh	
<b>Guide to the Pharmacology of Mitochondrial Potassium Channels . . . .</b>	<b>103</b>
Bartłomiej Augustynek, Wolfram S. Kunz, and Adam Szewczyk	
<b>The Mitochondrial <math>\text{Ca}^{2+}</math> Uniporter: Structure, Function, and Pharmacology . . . . .</b>	<b>129</b>
Jyotsna Mishra, Bong Sook Jhun, Stephen Hurst, Jin O-Uchi, György Csordás, and Shey-Shing Sheu	

## Part II Mitochondria in Health and Diseases

<b>Mitochondrial Fission in Human Diseases . . . . .</b>	<b>159</b>
Madhavika N. Serasinghe and Jerry E. Chipuk	
<b>Mitochondrial Cholesterol and the Paradox in Cell Death . . . . .</b>	<b>189</b>
Carmen García-Ruiz, Vicente Ribas, Anna Baulies, and Jose C. Fernández-Checa	
<b>Mitochondrial Changes in Cancer . . . . .</b>	<b>211</b>
Shubha Gururaja Rao	

<b>The Emerging Role of Mitochondrial Targeting in Kidney Disease . . . .</b>	<b>229</b>
Alfonso Eirin, Amir Lerman, and Lilach O. Lerman	
<b>Mitochondrial Dynamics as a Therapeutic Target for Treating Cardiac Diseases . . . . .</b>	<b>251</b>
Sang-Bing Ong and Derek J. Hausenloy	
<b>Mitochondria in Alzheimer's Disease and Diabetes-Associated Neurodegeneration: License to Heal! . . . . .</b>	<b>281</b>
Susana M. Cardoso, Sónia C. Correia, Cristina Carvalho, and Paula I. Moreira	
<b>Leber Hereditary Optic Neuropathy: A Mitochondrial Disease Unique in Many Ways . . . . .</b>	<b>309</b>
Rui Bi, Ian Logan, and Yong-Gang Yao	
<b>Part III Therapeutic Approaches and Mitochondria</b>	
<b>Leber Hereditary Optic Neuropathy: Exemplar of an mtDNA Disease . . .</b>	<b>339</b>
Douglas C. Wallace and Marie T. Lott	
<b>Equipping Physiologists with an Informatics Tool Chest: Toward an Integrated Mitochondrial Phenome . . . . .</b>	<b>377</b>
Anders Olav Garlid, Jennifer S. Polson, Keith D. Garlid, Henning Hermjakob, and Peipei Ping	
<b>Mitochondrial Flashes: Elemental Signaling Events in Eukaryotic Cells . . . . .</b>	<b>403</b>
Gaomin Feng, Beibei Liu, Tingting Hou, Xianhua Wang, and Heping Cheng	
<b>Mitochondria-Targeted Agents: Mitochondriotropics, Mitochondriotoxics, and Mitocans . . . . .</b>	<b>423</b>
Diana Guzman-Villanueva and Volkmar Weissig	
<b>Role of Mitochondrial Reactive Oxygen Species in the Activation of Cellular Signals, Molecules, and Function . . . . .</b>	<b>439</b>
Hiroko P. Indo, Clare L. Hawkins, Ikuo Nakanishi, Ken-ichiro Matsumoto, Hirofumi Matsui, Shigeaki Suenaga, Michael J. Davies, Daret K. St Clair, Toshihiko Ozawa, and Hideyuki J. Majima	
<b>MITO-Porter for Mitochondrial Delivery and Mitochondrial Functional Analysis . . . . .</b>	<b>457</b>
Yuma Yamada and Hideyoshi Harashima	
<b>Toxicity of Antiepileptic Drugs to Mitochondria . . . . .</b>	<b>473</b>
Josef Finsterer	

---

<b>Erratum to: The Mitochondrial Permeability Transition Pore and ATP Synthase . . . . .</b>	<b>489</b>
Gisela Beutner, Kambiz N. Alavian, Elizabeth A. Jonas, and George A. Porter, Jr	
<b>Index . . . . .</b>	<b>491</b>

Pharmacology of Mitochondria

Singh, H.; Sheu, S.-S. (Eds.)

2017, XI, 493 p., Hardcover

ISBN: 978-3-319-57311-3
