

Contents

Part I Invited Papers

Bound-Preserving High Order Finite Volume Schemes for Conservation Laws and Convection-Diffusion Equations	3
Chi-Wang Shu	
Some Geophysical Applications with Finite Volume Solvers of Two-Layer and Two-Phase Systems	15
E.D. Fernández-Nieto	
Some Discrete Functional Analysis Tools	29
Thierry Gallouët	
A Simple Finite-Volume Method on a Cartesian Mesh for Pedestrian Flows with Obstacles	43
Yuanzhen Cheng, Alina Chertock and Alexander Kurganov	

Part II Benchmark on Discretization Methods for Viscous Incompressible Flows

Benchmark Proposal for the FVCA8 Conference: Finite Volume Methods for the Stokes and Navier–Stokes Equations	59
Franck Boyer and Pascal Omnes	
A High-Order Finite Volume Solver on Locally Refined Cartesian Meshes—Benchmark Session	73
Louis Vittoz, Guillaume Oger, Zhe Li, Matthieu de Leffe and David Le Touzé	
Benchmark Session: The 2D Hybrid High-Order Method	91
Daniele A. Di Pietro and Stella Krell	
Benchmark: Two Hybrid Mimetic Mixed Schemes for the Lid-Driven Cavity	107
Jérôme Droniou and Robert Eymard	

Results with a Locally Refined MAC-Like Scheme—Benchmark Session	125
Eric Chénier, Robert Eymard and Raphaële Herbin	
Numerical Results for a Discrete Duality Finite Volume Discretization Applied to the Navier–Stokes Equations	141
Sarah Delcourte and Pascal Omnes	
Benchmark Session: The 2D Discrete Duality Finite Volume Method.	163
Franck Boyer, Stella Krell and Flore Nabet	
FVCA8 Benchmark for the Stokes and Navier–Stokes Equations with the TrioCFD Code—Benchmark Session	181
P.-E. Angeli, M.-A. Puscas, G. Fauchet and A. Cartalade	
 Part III Theoretical Aspects of Finite Volumes	
Analysis of a Positive CVFE Scheme for Simulating Breast Cancer Development, Local Treatment and Recurrence	205
Françoise Foucher, Moustafa Ibrahim and Mazen Saad	
Céa-Type Quasi-Optimality and Convergence Rates for (Adaptive) Vertex-Centered FVM	215
Christoph Erath and Dirk Praetorius	
Numerical Convergence for a Diffusive Limit of the Goldstein–Taylor System on Bounded Domain	225
Hélène Mathis and Nicolas Therme	
Lagrange-Flux Schemes and the Entropy Property	235
Florian De Vuyst	
L^∞-Stability of IMEX-BDF2 Finite Volume Scheme for Convection-Diffusion Equation.	245
Caterina Calgaro and Meriem Ezzoug	
Low Mach Number Limit of a Pressure Correction MAC Scheme for Compressible Barotropic Flows	255
Raphaële Herbin, Jean-Claude Latché and Khaled Saleh	
Convergence of the MAC Scheme for Variable Density Flows	265
T. Gallouët, R. Herbin, J.-C. Latché and K. Mallem	
Uniform-in-Time Convergence of Numerical Schemes for a Two-Phase Discrete Fracture Model.	275
J. Droniou, J. Hennicker and R. Masson	

Design and Analysis of a Finite Volume Scheme for a Concrete Carbonation Model	285
Claire Chainais-Hillairet, Benoît Merlet and Antoine Zurek	
Equilibrated Stress Reconstructions for Linear Elasticity Problems with Application to a Posteriori Error Analysis.	293
Rita Riedlbeck, Daniele A. Di Pietro and Alexandre Ern	
Uniform Second Order Convergence of a Complete Flux Scheme on Nonuniform 1D Grids	303
Patricio Farrell and Alexander Linke	
The Asymmetric Gradient Discretisation Method.	311
J. Droniou and R. Eymard	
DGM, an Item of GDM	321
Robert Eymard and Cindy Guichard	
Positive Lower Bound for the Numerical Solution of a Convection-Diffusion Equation	331
Claire Chainais-Hillairet, Benoît Merlet and Alexis F. Vasseur	
Raviart Thomas Petrov–Galerkin Finite Elements	341
François Dubois, Isabelle Greff and Charles Pierre	
Towards Pressure-Robust Mixed Methods for the Incompressible Navier–Stokes Equations	351
Naveed Ahmed, Alexander Linke and Christian Merdon	
Numerical Analysis of the DDFV Method for the Stokes Problem with Mixed Neumann/Dirichlet Boundary Conditions.	361
Thierry Goudon, Stella Krell and Giulia Lissoni	
An Error Estimate for the Approximation of Linear Parabolic Equations by the Gradient Discretization Method	371
J. Droniou, R. Eymard, T. Gallouët, C. Guichard and R. Herbin	
Uniform L^∞ Estimates for Approximate Solutions of the Bipolar Drift-Diffusion System.	381
M. Bessemoulin-Chatard, C. Chainais-Hillairet and A. Jüngel	
Some Convergence Results of a Multi-dimensional Finite Volume Scheme for a Time-Fractional Diffusion-Wave Equation	391
Abdallah Bradji	
Optimal Order of Convergence for the Upwind Scheme for the Linear Advection on a Bounded Domain	401
Nina Aguillon and Franck Boyer	

Numerical Scheme for Regularised Riemannian Mean Curvature Flow Equation	411
Matúš Tibenský and Angela Handlovičová	
A Finite Volume Scheme for a Seawater Intrusion Model with Cross-Diffusion	421
Ahmed Ait Hammou Oulhaj	
Finite Volume Approximation of a Degenerate Immiscible Two-Phase Flow Model of Cahn–Hilliard Type	431
Clément Cancès and Flore Nabet	
A Nonlinear Discrete Duality Finite Volume Scheme for Convection-Diffusion Equations	439
Clément Cancès, Claire Chainais-Hillairet and Stella Krell	
Stationarity and Vorticity Preservation for the Linearized Euler Equations in Multiple Spatial Dimensions	449
Wasilij Barsukow	
Goal-Oriented Error Analysis of a DG Scheme for a Second Gradient Elastodynamics Model	457
Jan Giesselmann and Tristan Pryer	
Simplified Model for the Clarinet and Numerical Schemes	467
Alain Prignet	
Author Index	475

Finite Volumes for Complex Applications VIII - Methods
and Theoretical Aspects

FVCA 8, Lille, France, June 2017

Cancès, C.; Omnes, P. (Eds.)

2017, XII, 476 p. 74 illus., 52 illus. in color., Hardcover

ISBN: 978-3-319-57396-0
